

SMITHIAN FOLD THEORY V3

Smithian Fold Theory V3 Complete Claim Inventory

Complete dependency-ordered audit of 2,751 model-admitted claims

Author and publication authority: Maria Smith

Version: 0.1.0

Version DOI: 10.5281/zenodo.21717584

Status: Audit appendix for the authorised first standalone V3 preliminary publication

Claims: 2,751

Candidates: 892,246

Survivors: 2,751

Controls: 11,004

This appendix is the complete compact inventory. Exact statements, reasons, carriers, boundaries, relations, candidate grammars, elimination logic, falsification conditions, source capture, chronology and full receipt identities remain in the dependency-ordered branch audit volumes and machine packages.
