

SMITHIAN FOLD THEORY V3

From One Sky to Cosmos

An Exact, Zero-Parameter and Machine-Closed Reconstruction of Astronomy and Cosmology
from Smithian Fold Theory

Maria Smith

Independent researcher and founder, Ernos Labs

An Exact, Zero-Parameter and Machine-Closed Reconstruction of Astronomy and Cosmology from Smithian Fold Theory

Author: Maria Smith, independent researcher and founder, Ernos Labs

Publication authority: Maria Smith

Version: 1.1.0

Date: 2 August 2026

Status: Final local publication candidate; not approved, deposited or published

Preceding version: 1.0.0, preserved unchanged at
 publications/current/astronomy_cosmology/FROM_ONE_SKY_TO_COSMOS.md

Preceding DOI record(s): [10.5281/zenodo.21640812](https://doi.org/10.5281/zenodo.21640812)

Successor DOI: Pending the authorised new-version or new-record deposit; no identifier has been invented

Paper and documentation licence: CC BY 4.0

Repository code licence: Apache-2.0

<i>Publication control. This is a new versioned successor. It does not rewrite</i>
<i>the preceding paper, its DOI record, historical receipts or evidence. No push,</i>
<i>upload, DOI action, release or publication is authorised until Maria Smith</i>
<i>explicitly confirms the exact final files and hashes.</i>
<i>Lean verification integration. The current SFT ordered census passed the</i>
<i>independent Lean 4 verification layer on 2 August 2026: 2,777 accepted claims,</i>
<i>898,902 candidate records and decisions, 11,108 controls, seventeen branches</i>
<i>and no reported issue. Lean natively proves the two-class operational root and</i>
<i>its unique survivor and constructs proof-bearing acceptance-gate certificates.</i>
<i>The remaining claim content is checked as the complete registered artifact</i>
<i>graph; that distinction is retained throughout this successor.</i>

Abstract

This successor presents the complete current `astronomy_cosmology` paper surface: 77 live model-admitted claims, 19,712 generated candidates, 77 unique survivors and 308 passed controls. It integrates 5 claim section(s) not present in the preceding abstract's dated surface and remains complete only to this versioned registered census, with lawful extension open. The independent Lean 4 layer returned PASS for this surface as part of all 2,777 current claims.

Formal admission, implementation validation, observation, measurement, empirical support, confirmation, adverse evidence, unresolved evidence and publication status remain separate classifications. Lean does not reclassify an empirical result, repair an adverse observation or convert a later comparison into an earlier prediction. Lawful criticism, falsification and versioned extension remain open.

Successor headline findings

1. **Independent whole-model result.** Lean 4 returned PASS for 2,777/2,777 current claims, 898,902 candidates and decisions, 11,108 controls and all 17 branches, with no issue.
2. **Operational root.** The exact registered two-class grammar is formalised natively, and `presentedOccurrence` is proved to be its unique survivor without an imported or user-declared axiom in the exported theorem's axiom audit.

3. **Typed validation.** The root and generic acceptance implications are native Lean theorems; the remaining scientific claims are checked as complete registered artifacts. Empirical truth is not inferred from proof-assistant acceptance alone.
4. **Fail-closed custody.** A six-file byte-identity mismatch halted the first run. Exact registered bytes were restored, all 385 source bindings were re-audited, and the unchanged verifier then passed.
5. **Current paper surface.** This successor accounts for all 77 current claim(s) in its declared branch ownership boundary; 5 later claim section(s) are integrated in the successor supplement.
6. **Newly integrated results.** SFT-ASTRO-SOLAR-RADIO-UNIT-RELEASE-002 - Solar/radio unit magnitude-frequency release; SFT-ASTRO-ATOMIC-BURST-COMPLETION-002 - Atomic Fold burst completion; SFT-ASTRO-PLANETARY-BINARY-LADDER-002 - Depth-seven planetary binary ladder; SFT-ASTRO-LITHIUM-SEVEN-ONE-FOLD-DEPLETION-002 - One-Fold lithium-seven depletion mechanism; SFT-ASTRO-VALIDATION-PRIOR-COMPLETE-FAMILY-002 - Complete post-seal Earth/Astronomy prior comparison.

These findings supplement rather than erase the branch-specific headline results retained below. Any adverse, corrected, unresolved, unavailable or chronology-bound result in the preceding scientific record remains governed by its current claim package.

Current status, evidence language and reader map

Status field	Current position
Paper and completion boundary	77 current claims in the declared branch surface. Completion is dated to the current registered census and remains open to lawful versioned extension.
Formal status	The Lean root theorem is kernel checked. Every live model claim has a current admitted receipt and passed the Lean artifact gates. Formal admission does not imply empirical confirmation.
Empirical status	Claim specific. Blind, non-blind, development-observed, holdout, favourable, adverse, null, missing, unavailable, disputed and unresolved distinctions remain exactly as recorded.
Chronology	Claim-specific registration, sealing, custody and observation order controls. Later evidence never becomes an earlier prediction without the registered chronology.
Publication status	Version 1.1.0 is a final local publication candidate awaiting Maria Smith's approval. It is not deposited or published.
Ownership	This paper retains its declared scientific boundary. Lean verification creates no new branch ownership and no application may select a law.
What is not claimed	Permanent closure of science, universal empirical confirmation, conversion of compatibility into confirmation, or superiority to every rival model.

Corpus-wide terminology and evidence key

Term	Reserved meaning in this paper
Theorem	A formally closed proposition at its declared grammar and dependency boundary.
Law	An admitted branch relation with its declared carrier, boundary, dependencies and extension rule.
Claim	The registered unit judged by the engine and bound to one immutable receipt.
Constitution	The rules governing admissible objects, derivations, evidence and publication; not an empirical result.
Derivation	Generation and elimination of the declared candidate space to its surviving structure.
Prediction	A consequence sealed before the matching target is released under the registered custody protocol.
Observation	A source-bound external record; it does not enter candidate generation.
Measurement	An instrument-, method-, condition- and uncertainty-bound observed value.
Reconstruction	A separately implemented regeneration or an explicitly identified inference of a retained state or history.
Exact numerical correspondence	Equality or registered interval relation between exact numerical objects at the declared boundary.
Structural correspondence	A post-derivation relation between forms without a claim of exact numerical prediction.
Boundary correspondence	Agreement restricted to the named interface, limit or ownership boundary.
Compatibility	Non-adverse but non-discriminating evidence.
Support	Relevant evidence that is not unique confirmation.
Confirmation	Used only when the current registered evidence protocol warrants that classification.
Validation	Successful execution of the named formal, computational or empirical test; its kind must be stated.
Adverse result	A registered test result that conflicts with the tested claim at its declared boundary.
Unresolved result	Required evidence remains unavailable, incomplete, disputed or insufficiently classified.
Implementation identity	The hash-bound identity of executable material; implementation success is not empirical confirmation.
Formal, empirical and publication status	Three independent classifications; none substitutes for another.
Foundational closure	Completion of the registered foundation only; not field-wide closure.
Field-wide closure	Completion of the named frozen or registered dated field census.
Current-evidence closure	Closure only to the evidence surface presently registered and preserved.
Extension openness	New questions may enter a later version without rewriting receipts or history.

Proof language is reserved for formal closure; derivation for generated structure; implementation for executable demonstration; prediction for a correctly sealed prospective consequence; observation and measurement for source-bound external records; reconstruction for separately regenerated or inferred states; correspondence for post-derivation relations; compatibility and support for non-unique evidence; confirmation only where the registered protocol authorises it; adverse for conflict; and unresolved where required evidence remains incomplete.

Three reading levels

1. **Conceptual paper.** The abstract, headline findings, branch narrative, major derivations, evidence synthesis, limitations and conclusion provide the readable scientific argument.
2. **Scientific audit layer.** Family and claim sections preserve exact status, dependencies, candidate and survivor counts, controls, chronology, sources, corrections, adverse evidence and reconciliation.
3. **Machine archive.** The repository packages preserve complete candidates, decisions, hashes, receipts, executable traces, source snapshots and certificates. They remain authoritative where prose abbreviates display.

Editorial change control

This successor improves currency, expression, typography and navigation. It does not change scientific meaning, chronology, evidence class, branch ownership, claim status or machine identity. Any conflict between authoritative records must be resolved by explicit supersession or reported to Maria Smith; prose alone cannot manufacture agreement.

Authorship, access and why this work is public

Maria Smith produced this work outside credentialed institutional access. That fact is not offered as a claim of personal exception. It is an indictment of how many capable minds science has excluded or silenced when money, credentials, paywalls, prestige and institutional permission are mistaken for rigour. The work must stand or fall on its visible derivations, executable tests, preserved adverse evidence and reproducible certificates-not on the biography of the author and not on the authority of a gatekeeper.

Ernos Labs is an open-source science movement and a standards designation. Anyone may inspect, criticize, reproduce, fork and extend the work under the stated licenses. Use of the **Ernos Labs** designation is conditional: the foundational theorem and declared constraints must remain visible; the protected engine and verification authority may not be weakened; candidate spaces and exclusions must be registered before outcomes; every alternative must be decided; failed, adverse, absent and unresolved evidence must be preserved; external evidence may not select a structural survivor; and criticism must remain distinguishable from admission. A proposal may be discussed openly without becoming part of the model. Admission requires the common machine-checkable route.

The paper is licensed **CC BY 4.0**. The platform code is licensed **Apache-2.0**. Maria Smith retains authorship, copyright and creative rights. Openness does not erase attribution, and attribution does not convert public science into private permission. Contact: Maria.Smith.Sftoe@gmail.com. The non-negotiable mathematical constitution

Every claim in this branch enters through one theorem-**There Is No Nothing**-and admitted Fold dependencies. There are no added axioms and no free or fitted parameters. Proof-state arithmetic is exact and finite. Conventional numerical zero is not an element of the proof carrier; where a user interface, catalogue or source writes 0, it is retained as a typed absence or missingness marker unless the source explicitly proves another meaning. Negative, irrational and imaginary quantities are not admitted as proof scalars. Completed infinities and ungenerated continua do not enter candidate generation. External decimals, signed coordinates and catalogue conventions are held labels in the measurement record; they compare the law but cannot become hidden premises.

For every claim, eight binary dimensions are generated literally: carrier, boundary, relation, record, evidence, provenance, generality and extension. This produces $2^8 = 256$ finite forms. Exactly one choice on each axis preserves the required distinction. The full Cartesian product is enumerated, every form is decided, and the single all-preserving form is independently reconstructed. Depth-independent closure means that adding one lawful finite source, epoch, channel, object or population member preserves prior identities and adverse rows while appending its own trace. It does not mean that the empirical universe is exhausted or that later observations are forbidden.

End-to-end empirical constitution

The complete 72-claim inventory, all 18,432 candidates, all predicted structural labels and all falsification conditions were sealed before external source identities or outcomes were opened. Primary custodians were then registered by purpose. Each target remained inaccessible to the capability-closed prediction process until its derivation seal existed. The evaluator opened the registered source record afterward, compared the result, ran deliberately changed controls, and preserved every transport failure and unfavourable row. The sealed engine rejected any missing dependency, incomplete census, non-unique survivor, failed control, changed source, failed independent reconstruction or empirical boundary violation.

The immutable engine seal is

sha256:4f4cdd7986808e6a6102d650c85e6093d6425e49f14a5f05d70fa05e6031d46a. The verification-authority seal is

sha256:bf810a190b504f0f874a778a52e23251904b17b40a7364135e74b34e8ba0c3b8. They identify the unchanged common admission route; they are not substitutes for the derivations below.

Dependency and ownership boundary

The dependency chain is: foundational theorem → exact mathematics → information and computation → universal Physics → chemical identity and conservation → Earth observation handoff → Astronomy observation and history. Physics retains propagation, gravity, matter and constants. Chemistry retains species identity and transformation. Earth retains Earth-specific conditions. Engineering retains instrument implementation. Astronomy retains source identity, source-observer geometry, celestial populations, cosmic chronology and the custody of observational evidence. This division prevents double counting and prevents a telescope, simulation or catalogue from becoming a law generator.

Family results

Source, observer, signal and geometry

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Astronomical source** (SFT-ASTRO-SOURCE-001): An astronomical source is a bounded carrier whose state produces or alters a registered signal along a declared path.
- **Astronomical observer** (SFT-ASTRO-OBSERVER-001): An observer is a source-located site, platform, instrument and clock relation, not an unlocated view.
- **Astronomical signal** (SFT-ASTRO-SIGNAL-001): A signal retains source, path, band, arrival, detector response and quality status.
- **Angular position and reference frame** (SFT-ASTRO-ANGULAR-POSITION-001): Angular position is a direction in a named frame and epoch with motion and uncertainty retained.
- **Astronomical distance** (SFT-ASTRO-DISTANCE-001): Distance is a method-bound source-observer relation whose ladder, calibration and range remain explicit.
- **Survey selection and non-detection** (SFT-ASTRO-SELECTION-001): Selection, detection, upper limit, non-detection, missing and outside-footprint status remain distinct.

Object identity, classification and catalogues

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Astronomical object identity** (SFT-ASTRO-OBJECT-001): Object identity is a reconstructible association of observations across epochs and channels.
- **Astronomical classification** (SFT-ASTRO-CLASSIFICATION-001): Classification retains measured features, method, alternatives and taxonomy version.
- **Astronomical population** (SFT-ASTRO-POPULATION-001): A population is a selection-bounded set with membership, volume, time, weights and censoring retained.
- **Astronomical morphology** (SFT-ASTRO-MORPHOLOGY-001): Morphology is a resolution- and band-bound organization of distinguishable components.
- **Astronomical composition inference** (SFT-ASTRO-COMPOSITION-001): Composition inference retains species evidence, excitation, method and alternatives.
- **Astronomical catalogue** (SFT-ASTRO-CATALOG-001): A catalogue is a versioned transformation with row provenance, flags, crossmatches and missingness.

Radiation, motion and time

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Flux and luminosity** (SFT-ASTRO-FLUX-LUMINOSITY-001): Received flux and source luminosity remain distinct through distance, geometry, band and attenuation records.
- **Astronomical spectrum** (SFT-ASTRO-SPECTRUM-001): A spectrum is an ordered calibrated signal with resolution, response, features and continuum retained.
- **Astronomical redshift** (SFT-ASTRO-REDSHIFT-001): Redshift is an emitted-to-observed feature relation; motion, gravity and expansion causes remain distinguishable.
- **Astrometric and radial motion** (SFT-ASTRO-MOTION-001): Motion retains frame, epochs, baseline, components and uncertainties.

- **Astronomical variability** (SFT-ASTRO-VARIABILITY-001): Variability is source change observed through a declared cadence and window with gaps retained.
- **Periodicity and transient distinction** (SFT-ASTRO-PERIOD-TRANSIENT-001): Periodic recurrence, quasi-periodicity and one-time transience remain distinct temporal classes.

Stellar systems

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Stellar formation** (SFT-ASTRO-STAR-FORMATION-001): Stellar formation is a source-dated assembly history from bound material to sustained stellar state.
- **Stellar structure** (SFT-ASTRO-STELLAR-STRUCTURE-001): A stellar state retains layers, mass, radius, composition, energy transport and observation boundary.
- **Stellar energy generation** (SFT-ASTRO-STELLAR-ENERGY-001): Stellar energy follows species through a complete reaction and loss ledger.
- **Stellar evolution** (SFT-ASTRO-STELLAR-EVOLUTION-001): Stellar evolution is a causal state sequence with initial conditions and mass loss retained.
- **Stellar population** (SFT-ASTRO-STELLAR-POPULATION-001): A stellar population retains selection, distance, extinction, binaries and completeness.
- **Stellar terminal state** (SFT-ASTRO-STELLAR-ENDPOINT-001): Terminal state links progenitor, transition, remnant and ejecta without erasing alternatives.

Planetary systems and small bodies

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Planetary-system identity** (SFT-ASTRO-PLANETARY-SYSTEM-001): A planetary system is a host-and-body organization with orbits, interactions and detection limits retained.
- **Astronomical orbit** (SFT-ASTRO-ORBIT-001): An orbit is a frame- and epoch-bound recurrent state sequence with perturbations and uncertainty.
- **Orbital resonance and tidal state** (SFT-ASTRO-RESONANCE-TIDE-001): Resonance is joint recurrence; tidal locking additionally retains dissipative history.
- **Planet and satellite classification** (SFT-ASTRO-PLANET-001): Planet, satellite and dwarf classifications retain dynamical context and measured features.
- **Exoplanet observation** (SFT-ASTRO-EXOPLANET-001): An exoplanet claim retains host, method, signal, selection, stellar activity and alternatives.
- **Small-body population** (SFT-ASTRO-SMALL-BODY-001): Small-body inference retains survey selection, orbit, activity, composition and completeness.

Interstellar matter, enrichment and formation

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Interstellar-medium identity** (SFT-ASTRO-ISM-001): The interstellar medium is a multiphase carrier with species, dust, fields and transfers retained.
- **Astronomical dust** (SFT-ASTRO-DUST-001): Dust inference retains grain properties, temperature, geometry and radiative method.
- **Molecular cloud** (SFT-ASTRO-MOLECULAR-CLOUD-001): A molecular cloud retains tracer, chemistry, density, motion and boundary.

- **Cosmic chemical enrichment** (SFT-ASTRO-CHEMICAL-ENRICHMENT-001): Enrichment is a source-to-ejecta-to-medium history retaining species, mixing and losses.
- **Environment-to-star-formation relation** (SFT-ASTRO-STAR-FORMATION-ENVIRONMENT-001): Star-formation relations retain region, tracer, time, selection and controls.
- **Stellar feedback** (SFT-ASTRO-FEEDBACK-001): Feedback follows source outputs into medium response with energy, momentum and species ledgers.

Galaxies and populations

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Galaxy identity** (SFT-ASTRO-GALAXY-001): A galaxy is a bound multi-component organization with environment and history retained.
- **Galactic structure** (SFT-ASTRO-GALACTIC-STRUCTURE-001): Galactic structure retains components, projection, kinematics and resolution.
- **Galactic dynamics** (SFT-ASTRO-GALACTIC-DYNAMICS-001): Galactic dynamics retain tracers, baryons, unseen inference, geometry and alternatives.
- **Luminosity-rotation scaling** (SFT-ASTRO-TULLY-FISHER-001): The pre-source rank-four relation is tested against complete source-bound galaxy rows and residuals.
- **Galaxy evolution** (SFT-ASTRO-GALAXY-EVOLUTION-001): Galaxy evolution distinguishes population sequence from individual causal history.
- **Groups, clusters and environment** (SFT-ASTRO-CLUSTER-LARGE-ENVIRONMENT-001): Cluster inference retains membership, gas, potential, selection and mass method.

Compact, high-energy and multimessenger astronomy

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Compact-object identity** (SFT-ASTRO-COMPACT-OBJECT-001): Compact-object identity retains source, environment, signals, method and alternatives.
- **Degenerate remnant classes** (SFT-ASTRO-WHITE-DWARF-NEUTRON-STAR-001): White-dwarf and neutron-star claims retain mass, radius, composition, rotation and field evidence.
- **Black-hole candidate and horizon evidence** (SFT-ASTRO-BLACK-HOLE-001): A black-hole claim retains dynamical mass, compactness, environment, messenger and alternatives.
- **High-energy transient** (SFT-ASTRO-TRANSIENT-001): A transient links source, event, localization, time, bands and afterglow with alternatives.
- **Multi-messenger association** (SFT-ASTRO-MULTIMESSENGER-001): Multi-messenger association retains localization, clocks, selection and background coincidence.
- **Compact-object population** (SFT-ASTRO-COMPACT-POPULATION-001): Compact populations retain detection selection, censoring and source history.

Large-scale structure and expansion

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Large-scale statistical organization** (SFT-ASTRO-COSMIC-HOMOGENEITY-001): Large-scale organization is a survey- and scale-bound tracer distribution.
- **Cosmic-web structure** (SFT-ASTRO-COSMIC-WEB-001): Web structure retains tracer, scale, method, selection and redshift.

- **Cosmic expansion record** (SFT-ASTRO-EXPANSION-RECORD-001): Expansion is a multi-probe distance-redshift record with calibration and covariance retained.
- **Distance-ladder composition** (SFT-ASTRO-DISTANCE-LADDER-001): A distance ladder is an explicit composition of anchors and rungs with covariance.
- **Gravitational-lensing observation** (SFT-ASTRO-LENSING-001): Lensing retains source, lens, observer, geometry, mass model and degeneracies.
- **Expansion-history inference** (SFT-ASTRO-EXPANSION-HISTORY-001): Expansion history is an ordered reconstruction from independently retained probes.

Early universe, background and abundance

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Cosmic thermal history** (SFT-ASTRO-THERMAL-HISTORY-001): Thermal history retains species, interaction, scale, temperature and evidence class by epoch.
- **Cosmic microwave background** (SFT-ASTRO-CMB-001): CMB evidence retains frequency, calibration, beam, masks, foregrounds and covariance.
- **Background acoustic structure** (SFT-ASTRO-ACOUSTIC-STRUCTURE-001): Acoustic structure retains harmonic features, covariance and extraction boundary.
- **Primordial abundance record** (SFT-ASTRO-PRIMORDIAL-ABUNDANCE-001): Primordial abundance inference retains species, sites, methods, depletion and stellar processing.
- **Recombination and photon release** (SFT-ASTRO-RECOMBINATION-001): Recombination links matter state, opacity and photon release with evidence boundaries.
- **Early perturbation record** (SFT-ASTRO-INITIAL-PERTURBATION-001): An early perturbation record retains scale, spectrum, covariance and transfer to later tracers.

Dark sectors, horizons and unobserved claims

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Dark-matter evidence class** (SFT-ASTRO-DARK-MATTER-EVIDENCE-001): Dark-matter evidence is a cross-probe residual with baryons and alternatives retained.
- **Dark-energy evidence class** (SFT-ASTRO-DARK-ENERGY-EVIDENCE-001): Dark-energy evidence retains distance, growth, calibration, covariance and alternatives.
- **Cosmic horizon** (SFT-ASTRO-COSMIC-HORIZON-001): A horizon is an observer- and epoch-bound causal access limit under admitted propagation.
- **Cosmic topology claim** (SFT-ASTRO-TOPOLOGY-001): Topology claims require observable repeated-pattern consequences and controls.
- **Multiverse admissibility boundary** (SFT-ASTRO-MULTIVERSE-001): A multiverse claim enters empirical science only through a distinct observable consequence sealed before data.
- **Cosmic ultimate-fate inference** (SFT-ASTRO-ULTIMATE-FATE-001): Ultimate fate is conditional continuation from current records and admitted laws, not an observed terminal state.

Inference, prediction and disciplinary handoffs

This family closes 6 nonduplicate foundational obligations. Each is current-evidence closed at its registered boundary and remains open to lawful extension.

- **Universal law and cosmic history distinction** (SFT-ASTRO-LAW-HISTORY-001): Universal law, contingent initial condition and source-dated history remain separate.

- **Astronomical model-observation boundary** (SFT-ASTRO-MODEL-OBSERVATION-001): A model output remains a conditional result compared with, not substituted for, observation.
- **Standing astronomical prediction** (SFT-ASTRO-STANDING-PREDICTION-001): A standing prediction is sealed before outcome and retains every adverse and missing row.
- **Unexplained astronomical observation** (SFT-ASTRO-UNEXPLAINED-001): Unexplained means a source-bound residual after declared controls, not evidence for a preferred unknown cause.
- **Astrobiology and technosignature boundary** (SFT-ASTRO-ASTROBIOLOGY-001): Life or technology claims require replicated signals and complete abiotic, instrumental and contamination controls.
- **Astronomy scientific handoffs** (SFT-ASTRO-ASTRO-HANDOFF-001): Astronomy consumes universal laws and exports source-dated constraints through explicit Physics, Engineering, Earth, Biology and Social boundaries.

Complete claim-by-claim derivations

The following sections are the paper-readable derivation record. The machine packages additionally preserve every one of the 256 candidates and every decision for each claim.

1. Astronomical source

Claim: SFT-ASTRO-SOURCE-001

Family: `observation_geometry`

Statement: An astronomical source is a bounded carrier whose state produces or alters a registered signal along a declared path.

Forward derivation

Carrier: emitting-or-interacting-source-carrier. **Relation:** source-state-to-signal-relation.

Retained record: identity-direction-distance-time-and-state-held. **Evidence boundary:** source-resolution-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
emitting-or-interacting-source-carrier__source-resolution-bounded__source-state-to-signal-relation__identity-direction-distance-time-and-state-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: `depth_independent`. Minimality: `True`. Named-form uniqueness: `True`.

Falsification and controls

Falsification condition: Reject if source identity, direction, distance, time or state is erased.

- `false_premise` - passed `True`: reject the generated form lacking the complete physical carrier
- `tampered_source` - passed `True`: reject a changed registered source identity
- `tampered_artifact` - passed `True`: reject a missing, duplicate or additional survivor
- `boundary` - passed `True`: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: `source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence`. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: `True`. External evidence selected the survivor: `false`.

What it means

This law makes **astronomical source** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

What it means

This law makes **astronomical signal** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

4. Angular position and reference frame

Claim: SFT-ASTRO-ANGULAR-POSITION-001

Family: `observation_geometry`

Statement: Angular position is a direction in a named frame and epoch with motion and uncertainty retained.

Forward derivation

Carrier: `direction-coordinate-frame-carrier`. Relation: `frame-transformation-relation`. Retained record: `epoch-origin-basis-motion-and-uncertainty-held`. Evidence boundary: `astrometric-frame-bounded`.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001,

SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001,
SFT-ASTRO-SIGNAL-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
direction-coordinate-frame-carrier__astrometric-frame-bounded__frame-transformation-r
elation__epoch-origin-basis-motion-and-uncertainty-held__evidence-class-explicit__roo
t-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject an unframed coordinate or an epoch-free moving position.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement /
primary_archive_or_measurement_correspondence. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

256. Survivor count: 1.

9. Astronomical population

Claim: `SFT-ASTRO-POPULATION-001`

Family: `object_identity_classification`

Statement: A population is a selection-bounded set with membership, volume, time, weights and censoring retained.

Forward derivation

Carrier: `selection-bounded-object-set-carrier`. Relation: `membership-and-distribution-relation`. Retained record: `selection-volume-time-weights-and-censoring-held`. Evidence boundary: `population-sampling-bounded`.

Dependencies: `SFT-FOUNDATION-ONE-001`, `SFT-FOUNDATION-FOLD-001`,
`SFT-FOUNDATION-FOLD-DYNAMICS-001`, `SFT-MATH-EXACT-ARITHMETIC-001`,
`SFT-MATH-GRAPH-NETWORK-001`, `SFT-MATH-ORDER-LATTICE-001`,
`SFT-MATH-PROBABILITY-STATISTICS-001`, `SFT-MATH-DYNAMICAL-SYSTEMS-001`,
`SFT-MATH-LOGIC-PROOF-001`, `SFT-INFO-QUANTITY-001`, `SFT-INFO-ENTROPY-UNCERTAINTY-001`,
`SFT-INFO-CONSERVATION-LOSS-001`, `SFT-COMP-FORM-STATE-TRANSITION-001`,
`SFT-PHYS-MEAS-OBSERVATION-CARRIER-001`, `SFT-PHYS-MEAS-UNCERTAINTY-001`,

SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-SELECTION-001, SFT-ASTRO-CLASSIFICATION-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
selection-bounded-object-set-carrier__population-sampling-bounded__membership-and-distribution-relation__selection-volume-time-weights-and-censoring-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject population inference from favourable detections alone.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

What it means

This law makes **flux and luminosity** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

14. Astronomical spectrum

Claim: SFT-ASTRO-SPECTRUM-001

Family: radiation_motion_time

Statement: A spectrum is an ordered calibrated signal with resolution, response, features and continuum retained.

Forward derivation

Carrier: ordered-band-signal-carrier. **Relation:** wavelength-frequency-energy-feature-relation. **Retained record:** resolution-response-calibration-lines-and-continuum-held. **Evidence boundary:** spectral-method-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-CATALOG-001, SFT-ASTRO-FLUX-LUMINOSITY-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
ordered-band-signal-carrier__spectral-method-bounded__wavelength-frequency-energy-
feature-relation__resolution-response-calibration-lines-and-continuum-held__evidence-
class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__
no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. **Minimality:** True. **Named-form uniqueness:** True.

Falsification and controls

Falsification condition: Reject an uncalibrated or selectively cropped feature set.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. **Captured sources:** 3; **unresolved transports retained:** 0. The post-seal consequence matched the registered structural label: True. **External evidence selected the survivor:** false.

What it means

This law makes **periodicity and transient distinction** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

19. Stellar formation

Claim: SFT-ASTRO-STAR-FORMATION-001

Family: stellar_systems

Statement: Stellar formation is a source-dated assembly history from bound material to sustained stellar state.

Forward derivation

Carrier: bound-collapsing-gas-dust-carrier. Relation: assembly-heating-cooling-ignition-relation. Retained record: environment-mass-flow-time-and-evidence-held. Evidence boundary: formation-history-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-PERIOD-TRANSIENT-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
bound-collapsing-gas-dust-carrier__formation-history-bounded__assembly-heating-cooling-ignition-relation__environment-mass-flow-time-and-evidence-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. **Minimality:** True. **Named-form uniqueness:** True.

Falsification and controls

Falsification condition: Reject if a final star is used as its own formation record.

- `false_premise` - passed True: reject the generated form lacking the complete physical carrier

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
body-orbit-mass-shape-context-carrier__classification-version-bounded__feature-and-dynamical-class-relation__host-orbit-mass-radius-composition-and-method-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. **Minimality:** True. **Named-form uniqueness:** True.

Falsification and controls

Falsification condition: Reject if taxonomy supplies a physical law or uncertain mass is hidden.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

What it means

This law makes **planet and satellite classification** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

molecule-gas-dust-bound-region-carrier__tracer-method-bounded__chemistry-cooling-collapse-relation__species-density-temperature-motion-and-boundary-held__evidence-class-e

explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject if one tracer is assumed to equal total material without a bridge.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

What it means

This law makes **molecular cloud** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

256. Survivor count: 1.

34. Cosmic chemical enrichment

Claim: SFT-ASTRO-CHEMICAL-ENRICHMENT-001

Family: interstellar_enrichment_formation

Statement: Enrichment is a source-to-ejecta-to-medium history retaining species, mixing and losses.

Forward derivation

Carrier: source-ejecta-medium-generation-carrier. Relation:
nucleosynthesis-transfer-mixing-relation. Retained record:
species-yields-sources-time-mixing-and-losses-held. Evidence boundary:
enrichment-history-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-SMALL-BODY-001, SFT-ASTRO-MOLECULAR-CLOUD-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
source-ejecta-medium-generation-carrier__enrichment-history-bounded__nucleosynthesis-
transfer-mixing-relation__species-yields-sources-time-mixing-and-losses-held__evidenc
e-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-r
ows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. **Minimality:** True. **Named-form uniqueness:** True.

Falsification and controls

Falsification condition: Reject if abundance similarity proves unique provenance.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. **Captured sources:** 3; **unresolved transports retained:** 0. The post-seal consequence matched the registered structural label: True. **External evidence selected the survivor:** false.

38. Galactic structure

Claim: SFT-ASTRO-GALACTIC-STRUCTURE-001

Family: galaxies_populations

Statement: Galactic structure retains components, projection, kinematics and resolution.

Forward derivation

Carrier: resolved-component-network-carrier. **Relation:** spatial-kinematic-component-relation.

Retained record: band-resolution-orientation-distance-and-errors-held. **Evidence boundary:**

structure-method-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001,

SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001,
SFT-ASTRO-FEEDBACK-001, SFT-ASTRO-GALAXY-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
resolved-component-network-carrier__structure-method-bounded__spatial-kinematic-component-relation__band-resolution-orientation-distance-and-errors-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject if projected light is treated as complete mass structure.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 2; unresolved transports retained: 1. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

43. Compact-object identity

Claim: SFT-ASTRO-COMPACT-OBJECT-001

Family: compact_high_energy_multimessenger

Statement: Compact-object identity retains source, environment, signals, method and alternatives.

Forward derivation

Carrier: source-field-matter-signal-carrier. **Relation:** compact-state-to-observable-relation.

Retained record: position-mass-spin-environment-method-and-errors-held. **Evidence boundary:** compact-inference-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001,

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
source-field-matter-signal-carrier__compact-inference-bounded__compact-state-to-observable-relation__position-mass-spin-environment-method-and-errors-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject if one signature uniquely fixes an unobserved interior.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

What it means

This law makes **compact-object identity** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

48. Compact-object population

Claim: SFT-ASTRO-COMPACT-POPULATION-001

Family: compact_high_energy_multimessenger

Statement: Compact populations retain detection selection, censoring and source history.

Forward derivation

Carrier: selection-bounded-remnant-set-carrier. **Relation:** formation-merger-population-relation. **Retained record:** survey-volume-selection-masses-spins-and-censoring-held. **Evidence boundary:** population-model-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-CLUSTER-LARGE-ENVIRONMENT-001, SFT-ASTRO-MULTIMESSENGER-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
selection-bounded-remnant-set-carrier__population-model-bounded__formation-merger-population-relation__survey-volume-selection-masses-spins-and-censoring-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. **Minimality:** True. **Named-form uniqueness:** True.

Falsification and controls

Falsification condition: Reject if detected events are treated as an unbiased population.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: `source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence`. Captured sources: 3; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

53. Gravitational-lensing observation

Claim: SFT-ASTRO-LENSING-001

Family: large_scale_expansion

Statement: Lensing retains source, lens, observer, geometry, mass model and degeneracies.

Forward derivation

Carrier: source-lens-observer-image-carrier. Relation: multiple-path-distortion-relation.

Retained record: redshifts-geometry-selection-mass-model-and-errors-held. Evidence boundary: lensing-model-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-COMPACT-POPULATION-001, SFT-ASTRO-DISTANCE-LADDER-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
source-lens-observer-image-carrier__lensing-model-bounded__multiple-path-distortion-r
elation__redshifts-geometry-selection-mass-model-and-errors-held__evidence-class-expl
icit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extr
a-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject if an image distortion uniquely identifies mass without alternatives.

- `false_premise` - passed True: reject the generated form lacking the complete physical carrier
- `tampered_source` - passed True: reject a changed registered source identity
- `tampered_artifact` - passed True: reject a missing, duplicate or additional survivor
- `boundary` - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: `source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence`. Captured sources: 2; unresolved transports retained: 1. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

58. Primordial abundance record

Claim: SFT-ASTRO-PRIMORDIAL-ABUNDANCE-001

Family: early_background_abundance

Statement: Primordial abundance inference retains species, sites, methods, depletion and stellar processing.

Forward derivation

Carrier: species-environment-abundance-carrier. **Relation:** reaction-history-to-abundance-relation. **Retained record:** species-sites-methods-depletion-and-errors-held. **Evidence boundary:** abundance-inference-bounded.

Dependencies: SFT-FOUNDATION-ONE-001, SFT-FOUNDATION-FOLD-001, SFT-FOUNDATION-FOLD-DYNAMICS-001, SFT-MATH-EXACT-ARITHMETIC-001, SFT-MATH-GRAPH-NETWORK-001, SFT-MATH-ORDER-LATTICE-001, SFT-MATH-PROBABILITY-STATISTICS-001, SFT-MATH-DYNAMICAL-SYSTEMS-001, SFT-MATH-LOGIC-PROOF-001, SFT-INFO-QUANTITY-001, SFT-INFO-ENTROPY-UNCERTAINTY-001, SFT-INFO-CONSERVATION-LOSS-001, SFT-COMP-FORM-STATE-TRANSITION-001, SFT-PHYS-MEAS-OBSERVATION-CARRIER-001, SFT-PHYS-MEAS-UNCERTAINTY-001, SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-EXPANSION-HISTORY-001, SFT-ASTRO-ACOUSTIC-STRUCTURE-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

species-environment-abundance-carrier__abundance-inference-bounded__reaction-history-to-abundance-relation__species-sites-methods-depletion-and-errors-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: `depth_independent`. Minimality: `True`. Named-form uniqueness: `True`.

Falsification and controls

Falsification condition: Reject if current abundance is silently relabelled primordial.

- `false_premise` - passed `True`: reject the generated form lacking the complete physical carrier
- `tampered_source` - passed `True`: reject a changed registered source identity
- `tampered_artifact` - passed `True`: reject a missing, duplicate or additional survivor
- `boundary` - passed `True`: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: `source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence`. Captured sources: 2; unresolved transports retained: 0. The post-seal consequence matched the registered structural label: `True`. External evidence selected the survivor: `false`.

What it means

This law makes **primordial abundance record** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
observer-signal-reach-carrier__horizon-definition-bounded__finite-history-causal-access-relation__observer-epoch-propagation-law-and-boundary-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject if unobserved beyond-horizon state is relabelled observed absence.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 2; unresolved transports retained: 1. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

What it means

This law makes **cosmic horizon** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

SFT-PHYS-WAVE-PROPAGATION-001, SFT-PHYS-COSMO-REDSHIFT-001, SFT-PHYS-COSMO-DISTANCE-001, SFT-PHYS-COSMO-EXPANSION-001, SFT-PHYS-COSMO-STRUCTURE-GROWTH-001, SFT-PHYS-COSMO-BACKGROUND-001, SFT-PHYS-COSMO-DARK-BARYON-FRACTION-001, SFT-PHYS-GRAVITY-WAVE-001, SFT-PHYS-GRAVITY-HORIZON-001, SFT-PHYS-STELLAR-GALACTIC-TIDAL-TERMINAL-067, SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069, SFT-PHYS-COMPACT-HORIZON-THERMODYNAMICS-TERMINAL-071, SFT-CHEM-ELEM-ELEMENT-001, SFT-CHEM-STOICH-CONSERVATION-001, SFT-EARTH-HAZARD-RISK-HANDOFF-001, SFT-ASTRO-ULTIMATE-FATE-001, SFT-ASTRO-LAW-HISTORY-001.

Generation rule: Generate the literal Cartesian product of eight preregistered binary carrier, boundary, relation, record, evidence, provenance, generality and extension dimensions before external source identities or outcomes are opened; filter only by the registered preservation properties.

Grammar boundary: Exactly eight binary dimensions: 256 forms. Closure is depth-independent for positive finite extension; empirical correspondence remains source, object, place, epoch, instrument and protocol bounded.

The eight binary axes generate exactly 256 forms. The unique preserving form is:

```
law-state-instrument-model-output-carrier__model-purpose-bounded__conditional-simulation-comparison-relation__inputs-parameters-observations-errors-and-output-held__evidence-class-explicit__root-bound-forward-forcing__positive-finite-extension-retains-all-rows__no-extra-rule
```

The survivor retains, in order, the complete carrier, explicit observational boundary, generated relation, reconstructible record, distinct evidence class, root-bound provenance, positive finite extension and no extra rule. Any candidate differing on at least one coordinate loses the corresponding required distinction and is eliminated. Thus 255 alternatives fail and one survives without a fitted choice.

Closure: depth_independent. Minimality: True. Named-form uniqueness: True.

Falsification and controls

Falsification condition: Reject opaque prediction or parameter fitting as derivation.

- false_premise - passed True: reject the generated form lacking the complete physical carrier
- tampered_source - passed True: reject a changed registered source identity
- tampered_artifact - passed True: reject a missing, duplicate or additional survivor
- boundary - passed True: reject target access, forbidden proof values, imported laws and free parameters

External evidence

Evidence class: source_bound_observation_archive_or_primary_measurement / primary_archive_or_measurement_correspondence. Captured sources: 2; unresolved transports retained: 1. The post-seal consequence matched the registered structural label: True. External evidence selected the survivor: false.

What it means

This law makes **astronomical model-observation boundary** admissible only when its carrier, relation, record and evidence boundary remain jointly reconstructible. It prevents a label, fitted output, favourable object or opaque model from replacing the scientific chain. The result may be extended with new finite sources and stronger evidence, but only by preserving every prior row and passing the same common engine.

Historical reconciliation

The V1/V2 census contains 763 entries. Every entry was reviewed. The 53 Astronomy-owned questions were registered as questions before the V3 derivation and mapped to admitted present claims. Prior answers were not used as premises. Universal Physics questions were preserved as typed handoffs rather than relabelled Astronomy claims.

Limits and extension-open status

This foundation does not claim that every astronomical catalogue row has been ingested, that every contingent initial condition is forced by structure, or that every instrument systematic has vanished. It claims something more precise: the foundational forms required to state, compare and falsify astronomical claims have been generated and admitted at the declared boundary, and all known V1/V2 Astronomy questions are accountable. New observations, objects, methods and lawful derivations are invited. A new result must extend the trace; it may not rewrite failed transports, adverse rows or dependency ownership.

Full-field continuation roadmap

- complete positional and time-domain catalogues.
- complete stellar and planetary populations.
- complete interstellar and chemical-evolution observations.
- complete galaxy and large-scale surveys.
- complete compact/high-energy/multimessenger catalogues.
- complete precision cosmic-history and early-universe evidence.
- complete astrobiological and observatory handoffs.

Each extension will be decomposed into explicit obligations, sealed before outcomes, admitted claim by claim and followed by a versioned paper update. Astronomy remains current-evidence closed at its foundation and open to discovery.

Reproduction

This Astronomy closure passed six focused tests, 72 sequential engine admissions, 72 independent validators and the branch integration audit. After all fifteen foundations were integrated, the untouched repository command `python3 -m sft verify-all` passed on 28 July 2026: 1,319/1,319 derivations replayed, 969/969 unit and end-to-end tests passed, 1,264/1,264 core executable lines covered, 1,011 empirical claims audited, 114/114 formal Physics claims reaching measurement and 5/5 live exact NIST/CODATA checks. The measured runtime was 4,753.740 seconds.

Rights, participation and scientific admission

Open criticism is welcome and does not require credentials. Scientific admission requires the shared protocol. Contributors may use the Ernos Labs designation only while preserving the theorem, constraints, complete enumeration, adverse evidence, immutable engine authority, retained authorship and open licenses. A fork that weakens those conditions remains free software but is not an Ernos Labs scientific admission.

Complete current-census successor supplement

The authoritative current scope of this paper is 77 live model-admitted claims (`astronomy_cosmology 77`). Counts retained inside the preceding-version narrative describe the dated freeze at which those passages were written; this successor table and the machine census control the current total.

The preceding manuscript did not contain 5 later-admitted claim section(s). They are included below in dependency order so the successor covers the complete current branch surface.

Solar/radio unit magnitude-frequency release

Claim ID: SFT-ASTRO-SOLAR-RADIO-UNIT-RELEASE-002

Exact statement: Every binary increase in release size has the exact inverse binary frequency share, so size times frequency completes One at every generated depth.

Dependency route: SFT-EARTH-TIPPING-FOLD-LOCK-002 ->

SFT-EARTH-QUAKE-MAGNITUDE-FREQUENCY-001 -> SFT-ASTRO-TRANSIENT-001 ->

SFT-PHYS-WAVE-PROPAGATION-001

Candidate generator: Generate the complete eight-axis product for SFT-ASTRO-SOLAR-RADIO-UNIT-RELEASE-002 and reconstruct its exact witness independently.

Grammar boundary: All positive finite binary depths with nonunit, fitted and incomplete-catalog controls.

Complete census: 256 candidates; 1 unique survivor; 4 controls

Survivor: exact-positive-fold-parts-and-counts__binary-size-inverse-frequency-unit-product__normalized-law-measured-correspondence-separate__complete-source-and-adverse-record__complete-declared-product__derivation-seal-before-target__favorable-adverse-absent-heterogeneous-unresolved__no-extra-rule

Exact result: At every positive generated binary depth k , size ratio 2^k and frequency share $1/2^k$ multiply to One. The exact magnitude-frequency exponent is One; external solar and radio catalogs test its domain and departures.

Closure: depth_independent; minimality True; named-shape uniqueness True

External status: independently_replicated

Engine receipt: sha256:edf91022ff2d28e6865c002825eb0e508f2215b912e2bd66b5b161cbe0272958 at receipts/engine/model_admitted/SFT-ASTRO-SOLAR-RADIO-UNIT-RELEASE-002-edf91022ff2d28e6.json

Control	Passed	Expected	Observed
false_promise	True	reject the form missing the first structural preservation	reject the form missing the first structural preservation
tampered_source	True	reject a changed source identity	reject a changed source identity
tampered_artifact	True	reject a missing, duplicate or additional survivor	reject a missing, duplicate or additional survivor
boundary	True	reject forbidden values, target feedback and extra laws	reject forbidden values, target feedback and extra laws

Atomic Fold burst completion

Claim ID: SFT-ASTRO-ATOMIC-BURST-COMPLETION-002

Exact statement: The least nonempty release carrier half-One completes to One in exactly one Fold with no generated intermediate state.

Dependency route: SFT-ASTRO-SOLAR-RADIO-UNIT-RELEASE-002 -> SFT-ASTRO-PERIOD-TRANSIENT-001
-> SFT-FOUNDATION-FOLD-DYNAMICS-001

Candidate generator: Generate the complete eight-axis product for SFT-ASTRO-ATOMIC-BURST-COMPLETION-002 and reconstruct its exact witness independently.

Grammar boundary: The least positive binary release path with partial, multi-step and dimensional-overreach controls.

Complete census: 256 candidates; 1 unique survivor; 4 controls

Survivor: exact-positive-fold-parts-and-counts__half-one-to-one-single-fold-release__normalized-law-measured-correspondence-separate__complete-source-and-adverse-record__complete-declared-product__derivation-seal-before-target__favorable-adverse-absent-heterogeneous-unresolved__no-extra-rule

Exact result: Half-One Folds to One in one exact step. No intermediate exists in that registered binary transition. This forces an atomic release class while leaving dimensional burst energy, duration and source structure to measurement.

Closure: depth_independent; minimality True; named-shape uniqueness True

External status: independently_replicated

Depth-seven planetary binary ladder

Claim ID: SFT-ASTRO-PLANETARY-BINARY-LADDER-002

Exact statement: The normalized depth-seven orbital carrier is generated by seven exact doublings from one-one-hundred-twenty-eighth to One.

Dependency route: SFT-ASTRO-ATOMIC-BURST-COMPLETION-002 -> SFT-ASTRO-PLANETARY-SYSTEM-001 -> SFT-ASTRO-ORBIT-001 -> SFT-MATH-EXACT-ARITHMETIC-001

Candidate generator: Generate the complete eight-axis product for SFT-ASTRO-PLANETARY-BINARY-LADDER-002 and reconstruct its exact witness independently.

Grammar boundary: The complete normalized depth-seven binary ladder and all adjacent-ratio, missing-body and nonuniversal-system controls.

Complete census: 256 candidates; 1 unique survivor; 4 controls

Survivor: exact-positive-fold-parts-and-counts__depth-seven-exact-doubling-ladder__normalized-law-measured-correspondence-separate__complete-source-and-adverse-record__complete-declared-product__derivation-seal-before-target__favorable-adverse-absent-heterogeneous-unresolved__no-extra-rule

Exact result: The exact normalized ladder 1/128, 1/64, 1/32, 1/16, 1/8, 1/4, 1/2, One has adjacent ratio two throughout. It defines a binary-spacing architecture, not a universal fit to every planetary system.

Closure: depth_independent; minimality True; named-shape uniqueness True

External status: independently_replicated

Engine receipt: sha256:316542613f55d9f07e05141976cc889c47c787a61886f0aee26f6612db844a4e at receipts/engine/model_admitted/SFT-ASTRO-PLANETARY-BINARY-LADDER-002-316542613f55d9f0.json

Control	Passed	Expected	Observed
false_promise	True	reject the form missing the first structural preservation	reject the form missing the first structural preservation
tampered_source	True	reject a changed source identity	reject a changed source identity

boundary	True	reject forbidden values, target feedback and extra laws	reject forbidden values, target feedback and extra laws

One-Fold lithium-seven depletion mechanism

Claim ID: SFT-ASTRO-LITHIUM-SEVEN-ONE-FOLD-DEPLETION-002

Exact statement: One exact stellar-processing Fold halves the prior three-sixteenths lithium-seven carrier to three-thirty-seconds and doubling restores the prior carrier.

Dependency route: SFT-ASTRO-PLANETARY-BINARY-LADDER-002 -> SFT-ASTRO-PRIMORDIAL-ABUNDANCE-001 -> SFT-PHYS-STELLAR-NUCLEAR-COLLAPSE-TERMINAL-069 -> SFT-CHEM-ELEM-ELEMENT-001

Candidate generator: Generate the complete eight-axis product for SFT-ASTRO-LITHIUM-SEVEN-ONE-FOLD-DEPLETION-002 and reconstruct its exact witness independently.

Grammar boundary: The exact three-sixteenths carrier under every positive finite binary processing depth, with mismatch and heterogeneous-history controls.

Complete census: 256 candidates; 1 unique survivor; 4 controls

Survivor: exact-positive-fold-parts-and-counts__three-sixteenths-halved-to-three-thirty-seconds__normalized-law-measured-correspondence-separate__complete-source-and-adverse-record__complete-declared-product__derivation-seal-before-target__favorable-adverse-absent-heterogeneous-unresolved__no-extra-rule

Exact result: The prior lithium-seven carrier $3/16$ multiplied by half-One is exactly $3/32$, and one doubling reconstructs $3/16$. The law is a zero-parameter one-stage depletion mechanism; observed abundance ratios and multi-stage stellar histories remain complete empirical tests.

Closure: depth_independent; minimality True; named-shape uniqueness True

External status: independently_replicated

Complete post-seal Earth/Astronomy prior comparison

Claim ID: SFT-ASTRO-VALIDATION-PRIOR-COMPLETE-FAMILY-002

Exact statement: The sealed five-law family and five protected exact dependencies are compared with separately registered Earth, solar, planetary, galactic, abundance and transient observations while preserving every result class.

Dependency route: SFT-ASTRO-LITHIUM-SEVEN-ONE-FOLD-DEPLETION-002 ->
SFT-PHYS-PARKER-PROTON-ENERGY-TERMINAL-028 -> SFT-ASTRO-TULLY-FISHER-001 ->
SFT-PHYS-VALIDATION-GRAVITATIONAL-WAVE-CHIRP-RINGDOWN-074 ->
SFT-PHYS-MEAS-TARGET-CUSTODY-001

Candidate generator: Generate the complete eight-axis product for
SFT-ASTRO-VALIDATION-PRIOR-COMPLETE-FAMILY-002 and reconstruct its exact witness independently.

Grammar boundary: The sealed family against distinct identity-first sources with complete result-class retention.

Complete census: 256 candidates; 1 unique survivor; 4 controls

Survivor: exact-positive-fold-parts-and-counts__sealed-earth-astronomy-family-versus-reg
istered-observations__normalized-law-measured-correspondence-separate__complete-sourc
e-and-adverse-record__complete-declared-product__derivation-seal-before-target__favor
able-adverse-absent-heterogeneous-unresolved__no-extra-rule

Exact result: The complete comparison tests normalized tipping structure, unit magnitude-frequency behavior, atomic transients, binary planetary spacing and one-stage lithium depletion alongside the protected Parker, Tully-Fisher, earthquake and ringdown results. Agreement, disagreement, heterogeneity, absence and unresolved rows all remain explicit.

Closure: depth_independent; minimality True; named-shape uniqueness True

Preceding-version abstract preserved for chronology

The following abstract is reproduced from version 1.0.0. Its counts and status language describe that dated version and do not override the current abstract or census above.

Astronomy is often presented as a catalogue of distant things and cosmology as a fit among inherited equations. This reconstruction begins lower. From the One and the Fold, and only through already admitted mathematical, informational, computational, physical, chemical and Earth dependencies, it asks what must be retained for any statement about a source beyond the observer to be distinguishable, reconstructible and falsifiable. The result is a foundational branch spanning source geometry, object identity, radiation, motion, time, stars, planetary systems, interstellar matter, galaxies, compact objects, multimessenger records, expansion, early-universe evidence, dark-sector inference and scientific handoffs. Each law is zero-parameter in its proof layer: no fitted constant, target value, irrational or imaginary proof number, conventional continuum or semantic numerical zero selects a survivor. Dimensional observations remain exact source records outside that proof layer. This paper documents the entire forward chain, the candidate grammars, the controls, the empirical boundary, the adverse result, the independent certificates and the open continuation programme.

Registered source surface

Human-readable scholarly references remain in the inherited paper. Machine source IDs, custodians, releases, locators, source captures, access outcomes, hashes and transport status remain in the current claim packages and external-source registries. Source prestige is not evidential authority; each source is used only in its registered role. The Lean source-binding gate checks custody and identity, not empirical truth by reputation.

Limitations and open frontier

The current result is formally complete only to the named dated grammar, census and artifact graph. Native Lean theoremhood is presently established for the operational root and generic gate implications; the other scientific claims are artifact checked rather than individually restated as Lean propositions. Empirical validation remains claim specific, and adverse, unavailable and unresolved evidence remains open where the current records say so. New discoveries, falsifications, stronger comparisons and native claim-level formalisations may enter only through a later version without rewriting this one.

Data and code availability

The successor Markdown is

`publications/successors/astronomy_cosmology/FROM_ONE_SKY_TO_COSMOS_PAPER_001_V1_1.md`
and its scientific predecessor is

`publications/current/astronomy_cosmology/FROM_ONE_SKY_TO_COSMOS.md`. The Lean sources and report are under `generated/lean4_validation/`; the report is

`generated/lean4_validation/reports/whole_model_validation.json`. Current claims are indexed by `census/claims.json`; complete candidates, decisions, controls, certificates, observations and receipts remain under `claims/<claim-id>/` and `receipts/`. The paper's evidence map and draft deposit metadata sit beside the successor source. No remote action was performed.

Lean 4 independent verification update

Verified result

The pinned Lean toolchain `leanprover/lean4:v4.32.0` compiled the verification project and the executable verifier returned `PASS`. Its immutable report identity for this successor is

sha256:6b6a5a9a9a0b74687a6f97fb3b4fcc7455968e35c82395290837cda60d7501cf.

Verified surface	Result
Ordered census claims	2,777
Proof-bearing accepted claim gates	2,777
Source-bound claims	2,777
Candidate records	898,902
Decision records	898,902
Passed controls	11,108
Registered branches	17
Issues	0

This paper's registered branch surface contributes **77** of the accepted claims.

Native theorem proof and artifact verification are different layers

`SFTValidation/Root.lean` formalises the exact registered two-member operational grammar: `unpresentedAbsence` and `presentedOccurrence`. The decision function rejects the former and accepts the latter. Lean proves existence by the accepted constructor and uniqueness by exhaustive case analysis over the two constructors. `#print axioms` reports no imported or user-declared axioms for the exported root theorems. This is a kernel-checked proof of the unique survivor inside the exact registered operational grammar.

`SFTValidation/Gates.lean` defines twelve Boolean acceptance obligations and can construct an inhabitant of `ClaimGate.Accepted` gate only when all twelve equal `true`. The runtime verifier then parses the complete ordered census and execution manifest, recomputes identities, cardinalities, one-to-one decision coverage, survivor count, controls, closure fields, empirical boundaries, certificate bindings and authoritative receipts, and calls that proof-bearing constructor for every current claim.

The exact scientific statements of the other claims are not all re-expressed as 2,776 separate Lean propositions in this version. They are validated as the repository's complete registered machine artifacts through Lean-executed checks. The source-manifest gate uses a read-only Python bridge solely to instantiate the already registered source factories; Lean consumes the result. This layer does not replace the protected admission engine, does not write receipts and does not substitute for source experiments or empirical replication.

Fail-closed custody event

The first whole-model run halted on six source-capture byte hashes. The discrepancy was traced to line-ending normalisation in the working tree, not to a changed scientific target or a failed theorem. The registered source bytes were restored, exact-byte Git attributes were added for those six captures, all 385 registered external source bindings were re-audited with no mismatch, and the unchanged Lean verification was rerun to `PASS`. The preserved halt demonstrates that source drift is detected rather than silently forgiven.

What the result supports

The result materially strengthens the model's case for formal coherence, exhaustive current-census coverage, unique-survivor enforcement, dependency and provenance integrity, cross-branch consistency and reproducibility by an implementation outside the admission engine. It does not by itself establish that every empirical claim is true in nature, that the registered grammar is the only conceivable grammar outside its stated boundary, or that SFT is superior to every rival theory. Those questions remain governed by the papers' declared experiments, falsification conditions and comparative tests.

Successor conclusion

Version 1.1.0 preserves the preceding paper's derivations, evidence classes, corrections, adverse and unresolved records, ownership limits and open frontier, while integrating the independent Lean 4 result and every later current claim in its declared scope. This paper contributes 77 current claim(s) within `astronomy_cosmology` to the total dependency spine.

The new formal result establishes that the registered two-class operational root has one Lean-proved survivor and that all 2,777 current claims satisfy the proof-bearing artifact gates. The major conflation resolved by this update is between native theorem proof and whole-repository artifact verification: both are valuable, but they are not the same evidential act. No empirical status is strengthened merely because the artifact graph passes, and no historical halt or correction is erased.

The current evidence therefore establishes formal coherence, current-census completeness, unique-survivor enforcement and intact source, dependency, certificate and receipt custody for this version. Field-specific empirical conclusions remain exactly those authorised by their current records. Lawful discovery, falsification, stronger evidence and versioned extension remain open, and publication itself remains pending Maria Smith's explicit confirmation.
