Independent reconstruction. Implementation hash

sha256: ee3917008c755d08a81ee18899dad31c21f2f09b4a7a3478c210d1c0ae776d3b; independent certificate sha256: dee1b9268693ee13f42f60890322fa5c10e36ce1f8abaf42ce90269b4d5265d0; external-validation hash sha256: 4c1747959ec1966fc14b2526057e185558f1897ba71d0ccadfd6b005146a2f92. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: **True**. All registered rows were preserved: **True**. The capability-isolation and custody certificates passed. External source identities:

- IUPAC-N04249
- IUPAC-08191
- IUPAC-E02130
- IUPAC-S06078
- IUPAC-H02809
- PUBCHEM-PUG-BROMOMETHANE-STRUCTURE
- PUBCHEM-PUG-HYDROXIDE-STRUCTURE
- PUBCHEM-PUG-METHANOL-STRUCTURE
- PUBCHEM-PUG-BROMIDE-STRUCTURE

Comparison records:

- complete nine-record external structure and mechanism vector retained
- seven exact IUPAC and PubChem payloads opened only after the ORG-007 seal; two development-observed IUPAC rows disclosed
- source formula inventory {'Br': 1, 'C': 1, 'H': 4, 'O': 1}; terminal formula inventory {'Br': 1, 'C': 1, 'H': 4, 'O': 1}; exact conservation **True**
- connectivity CBr plus [OH-] becomes CO plus [Br-]
- post-seal IUPAC records preserve entering-group bond formation, elementary-or-stepwise replacement, and both-electron heterolysis
- V1 development-snapshot hash transcription error preserved; V2 correction changes no source, target, prediction, law or outcome and performs no recapture
- deliberately omitted-row and tampered-label controls rejected

Falsification boundary: The claim fails if any carrier, source bond, free pair, atom or electron occurrence is omitted; if more or fewer than one centre bond is replaced; if formation-before-cleavage is accepted; if either generated path family is omitted; if the census has other than 256 forms and one survivor; if any of nine external records is erased; if the post-seal IUPAC entering-group, substitution or heterolysis records fail their declared relations; if the PubChem source and terminal formula inventories differ; or if C-Br to C-O connectivity replacement is absent.

Measurement receipt: sha256:8d78610af3fe9c19b535e725245880d6490a4a0f9f1013ebd86f74a17c86cc1e.

Isolation certificate: sha256:acf3e362bc6acccc247083c5af9d598f0a88b600c690ed32a6b9eae0535ae503.

Custody certificate: sha256:3ac0e70009001d3a242d802f02cbc47a42a262637572850bc2c08fe427ed5781.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. The organic extension derives conjugation, resonance, aromatic recurrence and its measured stability excess, antiaromatic/nonaromatic distinction, conformer classes and populations, substitution, addition, elimination and composition-retaining rearrangement with complete adverse evidence. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no native numerical zero; structural absence is EmptyOne
- no negative irrational imaginary continuum fitted free random or imported native parameter
- no conventional nucleophilic SN1 SN2 rate energy solvent or substrate rule used to generate the survivor
- no external substrate product mechanism structure formula charge or source response opened before its applicable seal
- the two development-observed IUPAC records are disclosed and never relabelled blind
- all nine source rows and the V1 identity-hash transcription correction remain preserved

Immutable identities. Source manifest

181. Exact acceptor-driven aromatic substitution family law

Claim identity: SFT-CHEM-ELECTROPHILIC-SUBSTITUTION-FAMILY-008

Question and theorem. The structural-EmptyOne entering acceptor receives the complete aromatic donor pair; the entering bond forms, the leaving bond closes, and the complete leaving pair restores the opened aromatic incidence through the complete one- or two-transition family.

complete-aromatic-source-ordered-carrier__structural-EmptyOne-entering-acceptor-slot__complete-aromatic-donor-pair-transfer__entering-bond-formed-leaving-bond-cleaved__complete-concerted-and-addition-then-restoration-path-family__leaving-pair-restores-aromatic-incidence__value-free-aromatic-structure-and-mechanism-target-seal__fresh-aromatic-successor-no-extra-rule

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-FOUNDATION-MEASURED-VALUE-BOUNDARY-001
- SFT-MATH-EXACT-ARITHMETIC-001

- SFT-CHEM-NUCLEOPHILIC-SUBSTITUTION-FAMILY-007

Generated grammar. Generate the literal product of carrier, acceptor, donor, change, path, recurrence, observation and extension alternatives; decide all 256 forms solely from admitted Fold, aromatic and ORG-007 support laws.

Boundary: Every positive finite aromatic carrier with complete donor, recurrence, entering-acceptor and leaving supports; all one- and two-transition paths; every source record; and the complete four-target, 452-page external surface.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-aromatic-source-ordered-carrier__structural-EmptyOne-entering-acceptor-slot__complete-aromatic-donor-pair-transfer__entering-bond-formed-leaving-bond-cleaved__complete-concerted-and-addition-then-restoration-path-family__leaving-pair-restores-aromatic-incidence__value-free-aromatic-structure-and-mechanism-target-seal__fresh-aromatic-successor-no-extra-rule`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-aromatic-source-ordered-carrier	selected-product-label-or-nonaromatic-fragments	A named answer or disconnected fragments cannot reconstruct one aromatic reaction carrier.
acceptor	structural-EmptyOne-entering-acceptor-slot	incoming-pair-imported-or-acceptor-slot-filled	Giving the acceptor a pre-existing pair changes which carrier supplies the new bond.
donor	complete-aromatic-donor-pair-transfer	donor-pair-erased-created-or-collapsed-to-charge	A scalar charge or incomplete pair loses the transferred occurrences.
change	entering-bond-formed-leaving-bond-cleaved	endpoint-only-product-or-extra-support-change	An endpoint or extra edit does not prove the local exchange.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
path	complete-concerted-and-addition-then-restoration-path-family	named-rate-law-cleavage-first-or-unordered-snapshots	A conventional name, kinetic law or wrong order can select a mechanism.
recurrence	leaving-pair-restores-aromatic-incidence	aromatic-support-destroyed-or-fitted-restoration	An unclosed or fitted recurrence does not return the carrier to its exact class.
observation	value-free-aromatic-structure-and-mechanism-target-seal	substrate-product-mechanism-readable-before-seal	External structures or terminology could select the survivor.
extension	fresh-aromatic-successor-no-extra-rule	substrate-specific-exception-or-recomputed-prefix	A special aromatic substrate rule is not depth-independent.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt sha256:99f596213d121bb8742f42ada55e184ffaf133177e25320786f17090b6f40ede.

- SFT-CHEM-ORGANIC-REACTION-FAMILY-001
- SFT-CHEM-NUCLEOPHILIC-SUBSTITUTION-FAMILY-007
- SFT-CHEM-ELECTROPHILIC-SUBSTITUTION-FAMILY-008

Generated grammar. Generate the literal product of carrier, atom, support, adjacency, multiplicity, site, observation and extension alternatives; decide all 256 forms solely from admitted Fold conservation and transition laws.

Boundary: Every positive finite multicarrier source becoming one product; every exact atom and held-support occurrence; every two-adjacency cross-carrier orientation; every positive finite reduced multiplicity family; every componentwise same, adjacent and non-adjacent site class; all V1--V9 records; all 48 independent ORD payloads; and all 28 source-selected product vectors.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-multicarrier-source-and-single-product__every-reactant-atom-occurrence-retained__every-held-support-occurrence-retained__exact-two-new-cross-component-adjacencies__positive-finite-reduced-layer-family-with-base-retained__complete-componentwise-same-adjacent-and-nonadjacent-site-family__value-free-addition-product-vector-seal__fresh-unchanged-carrier-successor-no-extra-rule`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-multicarrier-source-and-single-product	selected-product-label-or-reactant-fragment-omitted	A named product or omitted reactant cannot reconstruct the complete source.
atoms	every-reactant-atom-occurrence-retained	atom-created-erased-or-collapsed-to-formula	A formula or incomplete occurrence list loses exact identity.
supports	every-held-support-occurrence-retained	support-created-erased-or-collapsed-to-order-number	A scalar order or partial support cannot reconstruct the transform.
adjacency	exact-two-new-cross-component-adjacencies	changed-support-count-confused-with-new-adjacency-count	Relocated multiplicity support is not an additional new atom adjacency.
multiplicity	positive-finite-reduced-layer-family-with-base-retained	exactly-one-layer-or-one-component-only	A fixed layer or component restriction omits complete additions.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
sites	complete-component wise-same-adjacent-and-nonadjacent-site-family	adjacent-only-or-species-selected-site	One preferred site distance omits lawful addition forms.
observation	value-free-addition-product-vector-seal	product-equation-or-database-row-readable-before-seal	An external product could select the survivor.
extension	fresh-unchanged-carrier-successor-no-extra-rule	reaction-specific-exception-or-recomputed-prefix	A species exception is not depth-independent.

Comparison records:

- complete 48-file, 12,993,815-byte non-USPTO Open Reaction Database holdout retained
- all 131,209 conventional reaction rows inspected at the source-only boundary
- all 28 independently labeled azide-alkyne/click/cycloaddition identities selected before product opening
- 28 favorable, no adverse and no unresolved complete product vectors
- 112 exact element-preserving correspondences; each has two new cross-carrier adjacencies and three multiplicity relocations
- all V1--V8 absent, adverse, unresolved and failed-universal results preserved without awarding closure
- complete result vector sha256:ea07485d76d8023f8b055420a1bc68f2ada83477c7a5208885b6836e48d28689

Falsification boundary: The claim fails if any carrier, atom, support, new adjacency, multiplicity relocation, site class, prior attempt, payload or selected reaction is omitted; if more than one of 256 forms survives; if any selected ORD reaction lacks a complete element-preserving correspondence with exactly two generated cross-carrier adjacencies and positive finite multiplicity relocation; or if any adverse or unresolved row is filtered.

Measurement receipt: sha256:1b2d67267a0b328b4cd480ab8731788664b0b2f19ffaa4781b61509f6318e3c0.

Custody certificate: sha256:f991e32d633577823c9f1a81a9e53e20dff00331c3130acb9ce7aa1c6506a82.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. The organic extension derives conjugation, resonance, aromatic recurrence and its measured stability excess, antiaromatic/nonaromatic distinction, conformer classes and populations, substitution, addition, elimination and composition-retaining rearrangement with complete adverse evidence. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no native numerical zero; structural absence is EmptyOne
- no negative irrational imaginary continuum fitted free random or imported native parameter
- no conventional addition name product database row atom map or measured outcome selects the survivor

- all V1--V8 absent adverse unresolved and failed-universal results remain preserved
- all 48 independent payloads and all 28 preselected reactions are required without post-outcome filtering

Immutable identities. Source manifest

sha256:cf29529d348e3afd8b335fba63b2659869778be7738ea111089139b14408ba7b; derivation seal sha256:4f0fcdfe3f92bf11281839185946e8d0f1160ac2f647681d6fb1acf392129667; engine receipt sha256:bcc6d8a50dce889570f775f89c2277b832be027ea697f31f1339535e1a42d118 at receipts/engine/model_admitted/SFT-CHEM-ADDITION-REACTION-FAMILY-009-bcc6d8a50dce8895.json; empirical hash sha256:2ddb1a7a2ae82118cf7bc09632d6925c7b7f2de09eb9360d02b6c7f8972009fa; measurement receipt sha256:1b2d67267a0b328b4cd480ab8731788664b0b2f19ffaa4781b61509f6318e3c0.

183. Exact complete inverse-addition elimination family law

Claim identity: SFT-CHEM-ELIMINATION-REACTION-FAMILY-010

Question and theorem. A complete elimination is the exact reversible boundary of complete addition: all atom and held-support occurrences remain, exactly two joining adjacencies are removed, and a positive finite multiplicity family returns to retained product incidences.

complete-single-source-and-multicarrier-products__every-source-atom-occurrence-retained__every-held-support-occurrence-retained__exact-two-source-adjacencies-removed-across-product-components__positive-finite-multiplicity-family-restored-with-base-retained__complete-productwise-same-adjacent-and-nonadjacent-site-family__value-free-elimination-product-vector-seal__fresh-unchanged-carrier-successor-no-extra-rule

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-FOUNDATION-MEASURED-VALUE-BOUNDARY-001
- SFT-MATH-EXACT-ARITHMETIC-001

- SFT-CHEM-ORGANIC-FUNCTIONAL-GROUP-001
- SFT-CHEM-ORGANIC-REACTION-FAMILY-001
- SFT-CHEM-ADDITION-REACTION-FAMILY-009

Generated grammar. Generate the literal product of carrier, atom, support, adjacency, multiplicity, site, observation and extension alternatives; decide every one of the 256 forms only from admitted Fold conservation, graph and reversible addition laws.

Boundary: Every positive finite complete source carrier and complete product-carrier family; every exact atom and held-support occurrence; every positive finite restored multiplicity family; every same, adjacent and non-adjacent site class; the complete IUPAC record; all 22 captured archive members; all 117 PDF pages; all 32 characterized products; all five unsuccessful rows; all seven optimization tables; and the complete 3a-prime/3a intermediate record.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-single-source-and-multicarrier-products__every-source-atom-occurrence-retained__every-held-support-occurrence-retained__exact-two-source-adjacencies-removed-across-product-components__positive-finite-multiplicity-family-restored-with-base-retained__complete-productwise-same-adjacent-and-nonadjacent-site-family__value-free-elimination-product-vector-seal__fresh-unchanged-carrier-successor-no-extra-rule`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	<code>complete-single-source-and-multicarrier-products</code>	<code>selected-alkene-or-leaving-group-fragment-omitted</code>	A selected product cannot reconstruct the complete reaction carrier.
atoms	<code>every-source-atom-occurrence-retained</code>	<code>atom-erased-created-or-collapsed-to-formula</code>	An omitted leaving atom violates exact occurrence conservation.
supports	<code>every-held-support-occurrence-retained</code>	<code>support-erased-created-or-collapsed-to-order-number</code>	A scalar bond order cannot retain the held support identity.
adjacency	<code>exact-two-source-adjacencies-removed-across-product-components</code>	<code>named-leaving-group-or-arbitrary-cleavage-count</code>	A named group or free cleavage count imports a selector.
multiplicity	<code>positive-finite-multiplicity-family-restored-with-base-retained</code>	<code>fixed-one-layer-or-product-selected-order</code>	One chosen multiplicity omits the positive finite inverse family.
sites	<code>complete-productwise-same-adjacent-and-nonadjacent-site-family</code>	<code>beta-only-or-species-selected-site</code>	A beta-only convention omits same-site and positive finite non-adjacent forms.
observation	<code>value-free-elimination-product-vector-seal</code>	<code>product-scheme-or-yield-readable-before-seal</code>	An opened product scope could choose the survivor.
extension	<code>fresh-unchanged-carrier-successor-no-extra-rule</code>	<code>reaction-specific-exception-or-recomputed-prefix</code>	A named exception is not depth-independent.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

- SFT-CHEM-ELIMINATION-REACTION-FAMILY-010

Generated grammar. Generate the literal product of carrier, atom, support, adjacency, path, alternative, observation and extension coordinates; decide all 256 forms only from admitted Fold conservation, graph and reversible laws.

Boundary: Every positive finite connected source/terminal carrier pair; every exact atom and held support; every nonoriginal target incidence; both direct and opened-reclosure paths; constitutionally degenerate traces; three complete IUPAC records; the preserved first blind surface; all 38 pages and all eight exact Claisen pairs.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-source-and-terminal-carrier__every-atom-occurrence-retained-in-source-order__every-held-support-occurrence-retained-once__positive-finite-held-support-incidence-change__complete-direct-or-opened-reclosure-path-family__all-nonoriginal-incidences-and-degenerate-traces-generated__value-free-rearrangement-product-vector-seal__fresh-unchanged-carrier-successor-no-extra-rule`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-source-and-terminal-carrier	selected-group-or-product-fragment-only	A fragment cannot prove that the same complete carrier rearranged.
atoms	every-atom-occurrence-retained-in-source-order	atom-created-erased-or-collapsed-to-formula	A changed atom inventory is a different composition, not a rearrangement.
supports	every-held-support-occurrence-retained-once	support-created-erased-or-renamed	A replaced bond label cannot be traced through the rearrangement.
adjacency	positive-finite-held-support-incidence-change	unchanged-graph-or-unregistered-edit	No change is not a rearrangement and an arbitrary edit is not forced.
path	complete-direct-or-opened-reclosure-path-family	named-mechanism-or-single-imported-order	A conventional mechanism name cannot select the native path.
alternatives	all-nonoriginal-incidences-and-degenerate-traces-generated	species-selected-target-or-degenerate-path-erased	A named product omits other lawful target incidences and constitutionally degenerate traces.
observation	value-free-rearrangement-product-vector-seal	product-scope-readable-before-seal	An opened rearrangement scope could choose the survivor.
extension	fresh-unchanged-carrier-successor-no-extra-rule	reaction-specific-exception-or-recomputed-prefix	A named exception is not depth-independent.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt `sha256:f4e8a463127ad996ea9657acc5c769dd178feca9004a539a3d4df7e19de5bee4`.

- all optimization, non-detection, signed stereochemical and spectral surfaces retained
- first incomplete blind surface preserved as unresolved without relabelling
- complete result vector sha256:e74ca9dd577cb372aedd708a584285c7a292d93377dda7691b7f264ed4e2e14b

Falsification boundary: The claim fails if more than one generated form survives; any atom, held support, alternative incidence, path, degenerate trace or successor is omitted; any of eight endpoint inventories differs; any pair lacks a positive connectivity change; any page, optimization, non-detection, signed, spectral or first-surface row is omitted; or the external record is allowed to select the law.

Measurement receipt: sha256 : 9faa4e295cc942e60e57cc63493498e8a9969bb226e49b2d9e8bf63316c588a8.
Isolation certificate: sha256 : 32d4d8b11ea6fe3b33f5e2df1e9ec6b3950669bfcf7a738773f0f18fe8449bc5.
Custody certificate: sha256 : 097ca1ec766152a2160d843af86d7992a2c050a08a5c2827c0917fe58ede93da.

Exact evidence highlight. The eight independently enumerated source/product inventories are C8H1203, C9H1403, C12H2003, C15H1803, C9H1403, C11H1803, C16H2003 and C16H2603. The printed paired mass inscriptions 179.06787, 193.08352, 235.13047, 269.1, 193.08352, 221.1, 283.1 and 289.17742 [M+Na]⁺ independently cross-check those enumerations without selecting the rearrangement law.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. The organic extension derives conjugation, resonance, aromatic recurrence and its measured stability excess, antiaromatic/nonaromatic distinction, conformer classes and populations, substitution, addition, elimination and composition-retaining rearrangement with complete adverse evidence. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no native numerical zero; structural absence is EmptyOne
- no negative irrational imaginary continuum fitted free random or imported native parameter
- no reaction name mechanism yield selectivity temperature time mass formula or measured product selects the survivor
- the first incomplete blind carrier surface remains unresolved without relabelling

Immutable identities. Source manifest

185. Exact cyclic-transition and relative-orientation law

Claim identity: SFT-CHEM-PERICYCLIC-REACTION-FAMILY-012

Question and theorem. A pericyclic Fold transition retains every carrier and support inside one generated closed cycle and exhausts four joint face assignments into exactly two relative-orientation classes without measured-product selection.

complete-source-and-terminal-carriers__complete-generated-transition-cycle__every-held-support-retained-once__positive-finite-cycle-confined-incidence-change__complete-two-fibre-face-assignment-product__two-relative-classes-under-global-complement__value-free-cycle-and-stereochemistry-seal__fresh-unchanged-successor-no-extra-rule

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-FOUNDATION-MEASURED-VALUE-BOUNDARY-001
- SFT-MATH-EXACT-ARITHMETIC-001

- SFT-CHEM-REARRANGEMENT-REACTION-FAMILY-011

Generated grammar. Generate the literal product of carrier, cycle, support, transition, phase, stereochemistry, observation and extension coordinates; decide all 256 forms only from admitted Fold conservation and composition laws.

Boundary: Every positive finite retained source/terminal carrier; every generated closed transition cycle; every moved held support; all four two-fibre face assignments; both global-complement classes; two complete IUPAC records; all 32 primary rows, 44 archive members, 12 article pages, 203 supplementary pages and the complete CIF.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-source-and-terminal-carriers__complete-generated-transition-cycle__every-held-support-retained-once__positive-finite-cycle-confined-incidence-change__complete-two-fibre-face-assignment-product__two-relative-classes-under-global-complement__value-free-cycle-and-stereochemistry-seal__fresh-unchanged-successor-no-extra-rule`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-source-and-terminal-carriers	selected-product-fragment-or-missing-reactant	A partial carrier cannot establish a closed transformation.
cycle	complete-generated-transition-cycle	open-path-or-named-reaction-assumed	An open or named path does not force cyclic support.
supports	every-held-support-retained-once	support-created-erased-or-renamed	Unretained support destroys the exact transition trace.
transition	positive-finite-cycle-confined-incidence-change	sequential-story-or-target-selected-edit	A story or observed product cannot select the native operation.
phase	complete-two-fibre-face-assignment-product	imported-orbital-sign-or-complex-scalar	An imported sign or complex value is outside native arithmetic.
stereochemistry	two-relative-classes-under-global-complement	single-preferred-product-or-erased-alternative	One preferred product omits lawful alternatives.
observation	value-free-cycle-and-stereochemistry-seal	external-stereochemistry-open-before-seal	An opened target could select the law.
extension	fresh-unchanged-successor-no-extra-rule	species-exception-or-recomputed-prefix	A reaction-specific exception is not a general law.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt sha256: 5308525a126c949bfa13a7cddbfb12b20224c957aded26e11a0bb05eb1e153447.

Generated grammar. Generate the literal product of carrier, support, initiation, propagation, recurrence, termination, observation and extension coordinates; decide all 256 forms only from admitted Fold laws.

Boundary: Every complete finite carrier, two retained radical labels, exact pair opening, every positive finite propagation recurrence, exact pair closure, all three IUPAC records, all 67 article table rows, all 24 archive members and all 29 article/supplement pages.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-retained-network-carrier__two-exact-held-radical-supports__closed-pair-opens-to-two-retained-active-sites__one-active-support-and-one-bond-layer-relocate__positive-finite-contiguous-propagation-family__two-active-supports-close-to-EmptyOne__value-free-initiation-propagation-termination-seal__fresh-unchanged-carrier-successor-no-extra-rule`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-retained-network-carrier	selected-chain-fragment-or-erased-coproduct	A fragment cannot close a radical network.
support	two-exact-held-radical-supports	created-destroyed-or-dot-only-radical	A typographic dot does not retain support identity.
initiation	closed-pair-opens-to-two-retained-active-sites	free-radical-assumed-or-randomly-created	An assumed active center is not generated.
propagation	one-active-support-and-one-bond-layer-relocate	mass-increase-story-or-measured-chain-selector	A name or observed chain length cannot select the step.
recurrence	positive-finite-contiguous-propagation-family	single-step-or-unbounded-assertion	One example does not force the chain family.
termination	two-active-supports-close-to-EmptyOne	active-support-erased-or-numerical-zero	Erasure or numerical zero destroys reversibility.
observation	value-free-initiation-propagation-termination-seal	external-chain-vector-open-before-seal	Opened outcomes could choose the law.
extension	fresh-unchanged-carrier-successor-no-extra-rule	species-exception-or-recomputed-prefix	A species exception is not a general chain law.

Adverse controls. All mandatory controls passed:

- SFT-CHEM-RADICAL-REACTION-NETWORK-013

Generated grammar. Generate the Cartesian product of the eight registered binary structural decisions exactly once.

Boundary: Eight dimensions exhaust carrier, three selectivity partitions, amount custody, complete observation, native arithmetic and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-positive-finite-product-support__exact-chemo-site-partition__exact-regio-site-partition__exact-stereo-site-partition__postseal-held-amount-record-per-reported-product__complete-registered-product-distribution__exact-partition-and-EmptyOne-absence__fresh-product-successor-preserves-all-prior-classes`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-positive-finite-product-support	major-product-only-carrier	A selected product erases the alternative support.
chemo	exact-chemo-site-partition	named-functional-group-preference	A reaction name cannot select a functional-group outcome.
regio	exact-regio-site-partition	imported-direction-rule	An imported orientation rule cannot select a site.
stereo	exact-stereo-site-partition	preferred-stereoisomer-only	A preferred stereoisomer erases lawful alternatives.
amount	postseal-held-amount-record-per-reported-product	amount-selects-product-support	A measured amount cannot choose which products are generated.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
observation	complete-registered-product-distribution	favourable-or-major-row-filter	Filtering destroys falsifiability.
arithmetic	exact-partition-and-EmptyOne-absence	signed-decimal-probability-native-law	External continuum arithmetic is outside native forcing.
extension	fresh-product-successor-preserves-all-prior-classes	reaction-specific-exception	An exception fitted to a reaction is an extra rule.

Adverse controls. All mandatory controls passed:

`sha256:c505502ee1044ae4513beda99fa7df4b031794ac957ecfc093682ba7e14ffb62`; independent certificate

sha256:845ca4787d9e8730f92804de357cf217ede94aaafc820b7dc64e145a41c769f9a; external-validation hash sha256:b4fd754800c7a55d50285133f1ecaabc29d72d503367ff316784c61f70b0ed73. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: True. All registered rows were preserved: True. The capability-isolation and custody certificates passed. External source identities:

- IUPAC-M03804
- IUPAC-M03804
- IUPAC-M03804
- IUPAC-M03804
- IUPAC-R05174
- IUPAC-R05174
- IUPAC-R05174

Comparison records:

- both complete IUPAC records retained
- five four-leaf trees and fourteen five-leaf successor trees generated exactly
- all nineteen bounded trees forward-reconstruct their exact target
- alternative mechanisms and incomplete-evidence disclosures retained

Falsification boundary: The claim fails if more than one form survives; a split or tree is omitted or duplicated; a path does not exactly reconstruct the target; either complete IUPAC record, alternatives or incomplete-evidence disclosure is omitted; or an external route selects the graph.

Measurement receipt: sha256:fa7ab759bca0a1484a7676937e44db9fa076f0cd04d18e9324336f8e97d179ab.

Isolation certificate: sha256:d1a444cec6e98fd81b898a4c5a65f277333d93fb074b1510bc514c0ca5b7dcdb.

Custody certificate: sha256:b6360800cc16a14600a5ad66346b9339e720f8abc032f8b537750111b986348a.

Registered source descriptions:

- International Union of Pure and Applied Chemistry: ()

Registered target identities:

- None.

Meaning. The organic extension derives conjugation, resonance, aromatic recurrence and its measured stability excess, antiaromatic/nonaromatic distinction, conformer classes and populations, substitution, addition, elimination and composition-retaining rearrangement with complete adverse evidence. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no numerical zero negative irrational imaginary continuum fitted free random or imported native parameter
- no external route or measured success selects a tree
- no successful-path-only filtering

Immutable identities. Source manifest

24. Quantitative electrochemistry - 13 admitted claims

Half-reactions, cell composition, transport, polarization, interfaces and storage handoff retain one-owner ledgers. This entire registered subcategory is included; no proper subset is presented as field completion.

190. Fold half-reaction identity and held transfer orientation

Claim identity: SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001

Question and theorem. A half-reaction retains complete species, phases, positive held electron occurrences, reversible source/terminal orientation and one explicit reference half-cell; no negative electron-count proof value is required.

exact-half-reaction-identity__complete-species-phase-carrier__positive-count-of-held-electron-carriers__held-source-terminal-orientation__exact-inverse-half-reaction-pair__held-reference-half-cell-identity__complete-half-reaction-record__fresh-species-successor-preserves-prior-record

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-FOUNDATION-MEASURED-VALUE-BOUNDARY-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-DISCRETE-001

- SFT-CHEM-INORGANIC-ACID-BASE-REDOX-NETWORK-017
- SFT-CHEM-RETROSYNTHETIC-DECOMPOSITION-RECONSTRUCTION-016

Generated grammar. Generate the literal product of eight registered binary half-reaction decisions.

Boundary: Eight dimensions exhaust identity, species, transfer, orientation, inverse pairing, reference, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *exact-half-reaction-identity__complete-species-phase-carrier__positive-count-of-held-electron-carriers__held-source-terminal-orientation__exact-inverse-half-reaction-pair__held-reference-half-cell-identity__complete-half-reaction-record__fresh-species-successor-preserves-prior-record*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	exact-half-reaction-identity	equation-text-only	Text cannot retain a process identity.
species	complete-species-phase-carrier	selected-or-unphased-species	Missing species or phase changes the process.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
transfer	positive-count-of-held-electron-carriers	signed-electron-count	A negative number hides carrier identity and orientation.
orientation	held-source-terminal-orientation	sign-as-direction	A sign is not a reversible direction record.
pairing	exact-inverse-half-reaction-pair	open-oxidation-or-reduction-story	An open half cannot identify its inverse.
reference	held-reference-half-cell-identity	unbound-potential-answer	Potential is relational and needs its reference.
record	complete-half-reaction-record	favourable-species-only	Deleting species destroys stoichiometric closure.
extension	fresh-species-successor-preserves-prior-record	reaction-specific-exception	An exception is an extra rule.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

- SFT-CHEM-REDOX-COUPPLING-001
- SFT-CHEM-ELECTROCHEM-CELL-001
- SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001

Generated grammar. Generate the literal product of eight registered electrode-potential decisions.

Boundary: Eight dimensions exhaust account, reference, condition, normalization, orientation, coincidence, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: complete-half-cell-transfer-account__one-held-reference-electrode__same-held-standard-condition__exact-work-per-held-transfer-carrier__held-above-below-or-coincident-orientation__structural-EmptyOne-reference-coincidence__complete-standard-potential-reference-vector__common-work-successor-preserves-order. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
account	complete-half-cell-transfer-account	voltage-answer-only	A displayed voltage does not retain the chemical transfer account.
reference	one-held-reference-electrode	unbound-electrode-number	An unbound number has no electrode reference.
condition	same-held-standard-condition	mixed-temperature-or-state	Changing conditions destroys comparability.
normalization	exact-work-per-held-transfer-carrier	unnormalized-total-work	Total work changes with carrier multiplicity.
orientation	held-above-below-or-coincident-orientation	signed-native-number	A sign imports a negative proof magnitude.
coincidence	structural-EmptyOne-reference-coincidence	numerical-zero-potential	Numerical zero is not a native magnitude.
record	complete-standard-potential-reference-vector	selected-standard-potential	A selected value can hide species, phase, uncertainty or estimates.
extension	common-work-successor-preserves-order	species-specific-offset	A fitted offset adds an unforced rule.

Adverse controls. All mandatory controls passed:

- SFT-CHEM-ELECTROCHEM-CELL-001
- SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001
- SFT-CHEM-ELECTRODE-POTENTIAL-CHEMICAL-RELATION-002

Generated grammar. Generate the literal product of eight registered full-cell composition decisions.

Boundary: Eight dimensions exhaust carriers, reference, condition, path, composition, coincidence, record and reversal.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *two-distinct-held-half-cell-carriers__one-common-held-reference__one-common-held-condition__held-source-terminal-reaction-path__exact-positive-sum-or-Take-composition__structural-EmptyOne-cell-coincidence__complete-full-cell-potential-vector__exact-cell-reversal-preserves-positive-separation*. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carriers	two-distinct-held-half-cell-carriers	anonymous-voltage-pair	Anonymous values lose the two chemical half-cells.
reference	one-common-held-reference	mixed-reference-subtraction	Different references cannot compose directly.
condition	one-common-held-condition	mixed-condition-subtraction	Different conditions destroy a cell comparison.
path	held-source-terminal-reaction-path	unordered-potential-difference	An unordered difference loses reaction direction.
composition	exact-positive-sum-or-Take-composition	signed-arithmetic-premise	Signed arithmetic imports negative proof values.
coincidence	structural-EmptyOne-cell-coincidence	numerical-zero-cell-potential	Numerical zero is not a native proof magnitude.
record	complete-full-cell-potential-vector	selected-cell-voltage	A selected voltage can conceal half-cell and condition rows.
reverse	exact-cell-reversal-preserves-positive-separation	irreversible-sign-flip	A sign flip does not reconstruct the chemical path.

Adverse controls. All mandatory controls passed:

193. Fold concentration-dependent potential law

Claim identity: SFT-CHEM-CONCENTRATION-DEPENDENT-POTENTIAL-004

Question and theorem. A generated activity quotient changes potential by an exact held direction and positive generator-layer-per-carrier ratio; exact standard-state equality is EmptyOne.

complete-half-reaction-activity-state__held-product-reactant-or-coincident-orientation__complete-generated-doubling-support__layer-count-additive-product-composition__exact-layer-per-held-carrier-ratio__structural-EmptyOne-standard-state__complete-concentration-potential-series__common-generator-successor-preserves-separation

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-FOUNDATION-MEASURED-VALUE-BOUNDARY-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-DYNAMICAL-SYSTEMS-001
- SFT-MATH-COMBINATORICS-001
- SFT-INFO-ENTROPY-UNCERTAINTY-001

- SFT-CHEM-ACTIVITY-NONIDEAL-COMPOSITION-009
- SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001
- SFT-CHEM-ELECTRODE-POTENTIAL-CHEMICAL-RELATION-002
- SFT-CHEM-CELL-POTENTIAL-COMPOSITION-003

Generated grammar. Generate the literal product of eight registered concentration-potential decisions.

Boundary: Eight dimensions exhaust state, quotient, support, composition, transfer, coincidence, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-half-reaction-activity-state__held-product-reactant-or-coincident-orientation__complete-generated-doubling-support__layer-count-additive-product-composition__exact-layer-per-held-carrier-ratio__structural-EmptyOne-standard-state__complete-concentration-potential-series__common-generator-successor-preserves-separation`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
state	complete-half-reaction-activity-state	concentration-number-only	A concentration number does not retain chemical identity or condition.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
quotient	held-product-reactant-or-coincident-orientation	signed-or-continuum-activity-coordinate	A signed continuum coordinate imports an ungenerated domain.
support	complete-generated-doubling-support	arbitrary-real-activity-premise	An arbitrary real activity is outside exact Fold arithmetic.
composition	layer-count-additive-product-composition	imported-logarithm	A logarithm cannot select the native law.
transfer	exact-layer-per-held-carrier-ratio	unscaled-electron-count	Potential displacement must retain transferred-carrier multiplicity.
coincidence	structural-EmptyOne-standard-state	numerical-zero-standard-state	Numerical zero is not a native proof value.
record	complete-concentration-potential-series	selected-concentration-point	A selected point can hide adverse curvature and uncertainty.
extension	common-generator-successor-preserves-separation	refitted-concentration-coefficient	Refitting at each scale adds free choices.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

- SFT-CHEM-STOICH-CONSERVATION-001
- SFT-CHEM-REDOX-COUPILING-001
- SFT-CHEM-CELL-POTENTIAL-COMPOSITION-003

Generated grammar. Generate the literal product of eight registered electrochemical-work decisions.

Boundary: Eight dimensions exhaust custody, carrier, potential, composition, direction, equilibrium, record and reversal.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-cell-chemical-electrical-custody__positive-counted-transfer-carriers__positive-potential-separation-with-held-direction__exact-carrier-potential-product__held-work-reaction-correspondence__structural-EmptyOne-equilibrium__complete-cell-work-equilibrium-vector__exact-path-reversal-preserves-positive-work`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
custody	complete-cell-chemical-electrical-custody	anonymous-energy-number	An anonymous energy loses its reaction and cell.
carrier	positive-counted-transfer-carriers	uncounted-charge	Uncounted charge cannot establish chemical work.
potential	positive-potential-separation-with-held-direction	signed-voltage-premise	A signed voltage imports negative proof magnitude.
composition	exact-carrier-potential-product	free-energy-postulate	A named free-energy formula does not derive work custody.
direction	held-work-reaction-correspondence	unoriented-work	Unoriented work cannot determine the reaction path.
equilibrium	structural-EmptyOne-equilibrium	numerical-zero-work	Numerical zero is not a native proof magnitude.
record	complete-cell-work-equilibrium-vector	selected-cell-result	A selected result can hide conditions and uncertainty.
reverse	exact-path-reversal-preserves-positive-work	irreversible-sign-change	A sign change cannot reconstruct both transfer paths.

Adverse controls. All mandatory controls passed:

- SFT-CHEM-STOICH-CONSERVATION-001
- SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001
- SFT-CHEM-ELECTROCHEMICAL-WORK-REACTION-DIRECTION-005

Generated grammar. Generate the literal product of eight registered electrolysis-product decisions.

Boundary: Eight dimensions exhaust custody, charge, stoichiometry, amount, remainder, absence, record and composition.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *complete-process-electrode-product-custody__positive-counted-transfer-occurrences__positive-carriers-per-product-occurrence__exact-carrier-to-product-ratio__complete-products-plus-held-remainder__structural-EmptyOne-no-complete-product__complete-charge-product-amount-vector__like-batches-compose-by-counted-addition*. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
custody	complete-process-electrode-product-custody	mass-answer-only	A mass answer loses electrolysis identity and path.
charge	positive-counted-transfer-occurrences	continuous-charge-premise	A continuum charge does not expose transferred distinctions.
stoichiometry	positive-carriers-per-product-occurrence	empirical-equivalent-factor	A fitted equivalent factor does not retain carrier demand.
amount	exact-carrier-to-product-ratio	rounded-product-count	Rounding destroys exact carrier custody.
remainder	complete-products-plus-held-remainder	discarded-incomplete-product	Discarding a remainder loses transferred distinctions.
absence	structural-EmptyOne-no-complete-product	numerical-zero-product	Numerical zero is not a native product magnitude.
record	complete-charge-product-amount-vector	selected-coulometer-result	A selected mass-per-charge value can hide experimental corrections.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
composition	like-batches-compo se-by-counted-addi tion	batch-specific-conversion	A batch-specific rule adds an unforced parameter.

Adverse controls. All mandatory controls passed:

- SFT-CHEM-ELECTROLYSIS-PRODUCT-AMOUNT-006

Generated grammar. Generate the literal product of eight registered ionic-conductivity decisions.

Boundary: Eight dimensions exhaust carrier, direction, composition, condition, path, aggregation, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *complete-species-resolved-carrier-vector__held-species-transport-direction__complete-held-electrolyte-composition__one-common-held-condition__finite-held-path-resource-account__exact-sum-of-species-responses__complete-traceable-conductivity-vector__positive-species-successor-increases-response*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	complete-species-resolved-carrier-vector	bulk-conductance-number	A bulk number loses the transporting ions.
direction	held-species-transport-direction	signed-flux-premise	Signed flux imports negative proof magnitude.
composition	complete-held-electrolyte-composition	composition-free-conductivity	Conductivity without composition is not chemically identified.
condition	one-common-held-condition	mixed-temperature-response	Mixed conditions cannot form one conductivity.
path	finite-held-path-resource-account	continuum-gradient-premise	A continuum gradient hides counted transport support.
aggregation	exact-sum-of-species-responses	fitted-mixture-coefficient	A fitted coefficient adds an unforced parameter.
record	complete-traceable-conductivity-vector	selected-conductivity-value	A selected value can hide composition, temperature and uncertainty.
extension	positive-species-successor-increases-response	fixed-species-count	A fixed count cannot extend to new admitted carriers.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt
sha256: 4d2470b93f39611dde724513f0f9eaa1108a8fa2fae6cac3dea3af630c2d8987.

197. Fold ionic mobility and transference law

Claim identity: SFT-CHEM-IONIC-MOBILITY-TRANSFERENCE-008

Question and theorem. Each ionic mobility is an exact positive traversal-per-carrier-resource ratio and each transference part is that species contribution divided by the complete total, summing exactly to One.

complete-held-ionic-species-identity__held-species-mobility-direction__exact-traversal-per-carrier-resource-ratio__common-composition-condition-path__exact-species-contribution-partition__transference-parts-sum-exactly-to-One__structural-EmptyOne-absent-species__complete-mobility-transference-vector

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-FOUNDATION-MEASURED-VALUE-BOUNDARY-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-COMBINATORICS-001

- SFT-INFO-MUTUAL-CONDITIONAL-001
- SFT-CHEM-STOICH-COMPOSITION-001
- SFT-CHEM-COUPLED-MASS-HEAT-CHARGE-TRANSPORT-019
- SFT-CHEM-IONIC-CONDUCTIVITY-RELATION-007

Generated grammar. Generate the literal product of eight registered mobility-transference decisions.

Boundary: Eight dimensions exhaust identity, direction, mobility, composition, partition, whole, absence and record.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-held-ionic-species-identity__held-species-mobility-direction__exact-traversal-per-carrier-resource-ratio__common-composition-condition-path__exact-species-contribution-partition__transference-parts-sum-exactly-to-One__structural-EmptyOne-absent-species__complete-mobility-transference-vector`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	complete-held-ionic-species-identity	anonymous-mobile-charge	Anonymous charge loses chemical carrier identity.
direction	held-species-mobility-direction	signed-mobility	A sign imports negative proof magnitude.
mobility	exact-traversal-per-carrier-resource-ratio	continuum-velocity-field-quotient	A continuum derivative is not a counted transport proof.
composition	common-composition-condition-path	isolated-ion-answer	An isolated answer loses the complete electrolyte.
partition	exact-species-contribution-partition	independent-fitted-transport-numbers	Independent fits need not conserve the whole current.
whole	transference-parts-sum-exactly-to-One	approximately-normalized-sum	Approximate normalization can hide lost current.
absence	structural-EmptyOne-absent-species	numerical-zero-absent-ion	Numerical zero conflates absence with a measured response.
record	complete-mobility-transference-vector	selected-transport-number	A selected result can hide concentration change and anomalies.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt `sha256:02f812d56ce00bd001540ab96306b436a1f31741a931b1414814944e6cf5b57a`.

198. Fold electrode reaction-rate law

Claim identity: SFT-CHEM-ELECTRODE-REACTION-RATE-009

Question and theorem. Electrode reaction rate is an exact positive count of forward and reverse reaction events per positive counted resource, retaining reaction, interface, condition, potential orientation and structural balance.

complete-reaction-interface-custody__positive-counted-forward-reverse-events__exact-events-per-counted-resource__held-potential-orientation__positive-Take-with-held-rate-direction__structural-EmptyOne-balanced-events__complete-current-potential-condition-vector__event-successor-recomputes-exact-rate

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-ORDER-LATTICE-001
- SFT-COMP-CPLX-TIME-SPACE-001
- SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001
- SFT-CHEM-ELECTROCHEMICAL-WORK-REACTION-DIRECTION-005
- SFT-CHEM-IONIC-MOBILITY-TRANSFERENCE-008

Generated grammar. Generate the literal product of eight registered electrode-rate decisions.

Boundary: Eight dimensions exhaust reaction custody, events, resource, potential, net, balance, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *complete-reaction-interface-custody__positive-counted-forward-reverse-events__exact-events-per-counted-resource__held-potential-orientation__positive-Take-with-held-rate-direction__structural-EmptyOne-balanced-events__complete-current-potential-condition-vector__event-successor-recomputes-exact-rate*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
reaction	complete-reaction-interface-custody	anonymous-current	Current alone loses reaction identity.
events	positive-counted-forward-reverse-events	continuum-current-premise	Continuum flow hides event support.
resource	exact-events-per-counted-resource	unbounded-rate	Rate without resource is undefined.
potential	held-potential-orientation	signed-overpotential-premise	Signed potential imports negative magnitude.
net	positive-Take-with-held-rate-direction	subtracted-negative-rate	Signed subtraction can produce negative proof values.
balance	structural-EmptyOne-balanced-events	numerical-zero-net-current	Numerical zero is not a native magnitude.
record	complete-current-potential-condition-vector	selected-current-point	One point hides the curve and conditions.
extension	event-successor-recomputes-exact-rate	fitted-exchange-current-exponential	A fit imports answer-producing parameters.

Adverse controls. All mandatory controls passed:

199. Fold overpotential and polarization law

Claim identity: SFT-CHEM-OVERPOTENTIAL-POLARIZATION-010

Question and theorem. Polarization is an ordered finite current-potential response about one held equilibrium reference, with anodic, cathodic and equilibrium sides separated from positive exact magnitudes.

one-held-equilibrium-reference__held-anodic-cathodic-equilibrium-side__exact-positive-potential-distance__held-current-direction-positive-magnitude__structural-EmptyOne-equilibrium-point__complete-ordered-finite-polarization-curve__common-electrode-reference-condition__complete-raw-potential-current-vector

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-ORDER-LATTICE-001
- SFT-CHEM-ELECTRODE-POTENTIAL-CHEMICAL-RELATION-002
- SFT-CHEM-ELECTRODE-REACTION-RATE-009

Generated grammar. Generate the literal product of eight registered polarization decisions.

Boundary: Eight dimensions exhaust reference, orientation, magnitude, current, equilibrium, curve, condition and record.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *one-held-equilibrium-reference__held-anodic-cathodic-equilibrium-side__exact-positive-potential-distance__held-current-direction-positive-magnitude__structural-EmptyOne-equilibrium-point__complete-ordered-finite-polarization-curve__common-electrode-reference-condition__complete-raw-potential-current-vector*. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
reference	one-held-equilibrium-reference	reference-free-voltage	Overpotential needs equilibrium reference.
orientation	held-anodic-cathodic-equilibrium-side	signed-potential-offset	A sign imports negative magnitude.
magnitude	exact-positive-potential-distance	continuum-difference-premise	A continuum difference is not an exact proof.
current	held-current-direction-positive-magnitude	anonymous-current	Current loses reaction direction.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
equilibrium	structural-EmptyOne-equilibrium-point	numerical-zero-origin	Numerical zero is not native equilibrium.
curve	complete-ordered-finite-polarization-curve	selected-polarization-point	One point hides response organization.
condition	common-electrode-reference-condition	mixed-condition-curve	Mixed conditions are incomparable.
record	complete-raw-potential-current-vector	fitted-tafel-line	A fitted line can hide deviations.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt sha256:1be55c21342f49ab2584c88a87d91f8930fa48e1aac31a663a803de84e3ede20.

200. Fold double-layer interfacial-charge organization

Claim identity: SFT-CHEM-DOUBLE-LAYER-INTERFACIAL-CHARGE-011

Question and theorem. An electric double layer is a complete finite ordered interface support with held electrolyte, carrier identities and opposed sides, exact positive potential separation and counted carrier-per-potential organization.

one-held-electrode-electrolyte-interface__complete-finite-ordered-interface-layers__held-species-resolved-charge-carriers__held-opposed-interface-sides__exact-positive-interface-potential-separation__exact-carrier-per-potential-ratio__structural-EmptyOne-interface-coincidence__complete-interface-potential-capacitance-vector

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-COMBINATORICS-001
- SFT-CHEM-IONIC-CONDUCTIVITY-RELATION-007
- SFT-CHEM-OVERPOTENTIAL-POLARIZATION-010

Generated grammar. Generate the literal product of eight registered double-layer decisions.

Boundary: Eight dimensions exhaust interface, support, carrier, orientation, potential, capacitance, coincidence and record.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: one-held-electrode-electrolyte-interface__complete-finite-ordered-interface-layers__held-species-resolved-charge-carriers__held-opposed-interface-sides__exact-positive-interface-potential-separation__exact-carrier-per-potential-ratio__structural-EmptyOne-interface-coincidence__complete-interface-potential-capacitance-vector. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
interface	one-held-electrode-electrolyte-interface	bulk-charge-number	Bulk charge loses interface identity.
support	complete-finite-ordered-interface-layers	continuum-profile-premise	Continuum profile is not finite proof support.
carrier	held-species-resolved-charge-carriers	anonymous-charge-density	Anonymous density loses carrier identity.
orientation	held-opposed-interface-sides	signed-interfacial-charge	A sign imports negative magnitude.
potential	exact-positive-interface-potential-separation	unreferenced-potential	Potential needs interfacial separation.
capacitance	exact-carrier-per-potential-ratio	fitted-capacitance-parameter	A fit does not derive charge custody.
coincidence	structural-EmptyOne-interface-coincidence	numerical-zero-charge-state	Numerical zero is not native.
record	complete-interface-potential-capacitance-vector	selected-capacitance-point	One point hides spatial and composition response.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

201. Fold coupled corrosion reaction-network law

Claim identity: SFT-CHEM-CORROSION-REACTION-NETWORK-012

Question and theorem. Corrosion is a coupled anodic-cathodic network under one retained material and environment, with exact counted path rates, synchronized support, held excess orientation and structural balance.

held-material-environment-custody__complete-anodic-cathodic-network__positive-counted-path-events__exact-events-per-resource-ratio__exact-synchronized-path-rate__held-excess-path-orientation__structural-EmptyOne-balanced-excess__complete-potential-current-rate-mass-loss-vector

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-REDOX-COUPLING-001

- SFT-CHEM-ELECTRODE-REACTION-RATE-009
- SFT-CHEM-OVERPOTENTIAL-POLARIZATION-010

Generated grammar. Generate the literal product of eight registered corrosion-network decisions.

Boundary: Eight dimensions exhaust material, network, events, resource, coupling, orientation, balance and record.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-material-environment-custody__complete-anodic-cathodic-network__positive-counted-path-events__exact-event-s-per-resource-ratio__exact-synchronized-path-rate__held-excess-path-orientation__structural-EmptyOne-balanced-excess__complete-potential-current-rate-mass-loss-vector. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
material	held-material-environment-custody	material-free-rate	A rate without material is not corrosion identity.
network	complete-anodic-cathodic-network	single-reaction-answer	Corrosion requires coupled reactions.
events	positive-counted-path-events	continuum-loss-rate	A continuum rate hides events.
resource	exact-events-per-resource-ratio	unbounded-corrosion-rate	Rate needs resource support.
coupling	exact-synchronized-path-rate	independent-fitted-rates	Independent fits need not conserve current.
orientation	held-excess-path-orientation	signed-net-current	A sign imports negative magnitude.
balance	structural-EmptyOne-balanced-excess	numerical-zero-corrosion-current	Numerical zero is not native balance.
record	complete-potential-current-rate-mass-loss-vector	selected-corrosion-rate	One rate hides potential, mass loss and adverse rows.

Adverse controls. All mandatory controls passed:

202. Fold electrochemical storage ownership and handoff law

Claim identity: SFT-CHEM-ELECTROCHEMICAL-STORAGE-HANDOFF-013

Question and theorem. Electrochemical storage retains one exact owner per coordinate: Chemistry owns species and reactions, Materials owns bulk response and degradation, and Engineering owns implementation, joined only by explicit directed claim handoffs.

complete-storage-coordinate-custody__chemistry-owns-species-reactions__materials-own-bulk-device-response__engineering-owns-implementation__exactly-one-owner-per-coordinate__explicit-directed-claim-handoff__complete-chemistry-material-record-pair__new-coordinate-requires-new-unique-owner

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-ORDER-LATTICE-001
- SFT-MATH-CATEGORY-TYPE-COMPOSITION-001
- SFT-CHEM-CELL-POTENTIAL-COMPOSITION-003
- SFT-CHEM-CORROSION-REACTION-NETWORK-012
- SFT-MAT-DEGR-CORROSION-001
- SFT-ENG-REQUIREMENT-001

Generated grammar. Generate the literal product of eight registered storage-handoff decisions.

Boundary: Eight dimensions exhaust subject, Chemistry scope, Materials scope, Engineering scope, ownership, handoff, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-storage-coordinate-custody__chemistry-owns-species-reactions__materials-own-bulk-device-response__engineering-owns-implementation__exactly-one-owner-per-coordinate__explicit-directed-claim-handoff__complete-chemistry-material-record-pair__new-coordinate-requires-new-unique-owner`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
subject	complete-storage-coordinate-custody	anonymous-storage-number	A device number loses the chemical/material subject.
chemistry	chemistry-owns-species-reactions	chemistry-owns-device-performance	Bulk response exceeds Chemistry ownership.
materials	materials-own-bulk-device-response	materials-owns-reaction-law	Reaction identity exceeds Materials ownership.
engineering	engineering-owns-implementation	engineering-owns-natural-law	Implementation does not select natural law.
ownership	exactly-one-owner-per-coordinate	overlapping-branch-ownership	Duplicate ownership destroys exact provenance.
handoff	explicit-directed-claim-handoff	untraced-cross-branch-use	An untraced use loses dependency custody.
record	complete-chemistry-material-record-pair	selected-device-summary	One summary hides chemical and material records.
extension	new-coordinate-requires-new-unique-owner	application-redefines-ownership	An application cannot change branch law.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt `sha256:5f5765463a92bc3ffc730b8ce79dbd7a3edb23052fa4bf1a057e6dd7ba1e34b1`.

Generated grammar. Generate the literal product of eight registered carrier decisions.

Boundary: Eight dimensions exhaust element, nuclide, state, species, phase, occurrence, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-element-identity__positive-nucleon-count__held-nuclear-state__held-chemical-species__held-chemical-phase__positive-counted-occurrence__complete-nuclide-species-vector__fresh-occurrence-preserves-identity*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
element	held-element-identity	anonymous-radiation	Radiation alone loses element.
nuclide	positive-nucleon-count	element-only-identity	Element alone collapses isotopes.
state	held-nuclear-state	ground-state-assumption	Nuclear state cannot be assumed.
species	held-chemical-species	bare-nuclide-answer	Chemistry requires species identity.
phase	held-chemical-phase	phase-free-species	Phase affects the chemical record.
occurrence	positive-counted-occurrence	continuum-amount-premise	Continuum amount hides occurrences.
record	complete-nuclide-species-vector	selected-nuclide-row	One row hides carrier diversity.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
extension	fresh-occurrence-p reserves-identity	lookup-table-exception	A lookup cannot define identity.

Adverse controls. All mandatory controls passed:

204. Fold radioactive chemical-transformation network

Claim identity: SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002

Question and theorem. A radioactive chemical transformation is a complete directed network retaining parent, daughter, both chemical species, channel and positive counted events, with structural absence and reconstructive extension.

*held-parent-nuclide__held-daughter-nuclide__held-parent-daughter-species__held-decay-channel__positive-counted-tr
 ansformations__complete-directed-transformation-network__structural-EmptyOne-no-edge__successor-retains-prior-n
 etwork*

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-PHYS-NUCLEAR-RADIOACTIVE-DECAY-TERMINAL-005
- SFT-CHEM-NET-REACTION-001
- SFT-CHEM-ELEM-ISOTOPE-001
- SFT-CHEM-NUCLEAR-CHEMICAL-CARRIER-001

Generated grammar. Generate the literal product of eight registered transformation decisions.

Boundary: Eight dimensions exhaust parent, daughter, chemistry, channel, events, network, absence and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-parent-nuclide__he
 ld-daughter-nuclide__held-parent-daughter-species__held-decay-channel__positive-counted
 -transformations__complete-directed-transformation-network__structural-EmptyOne-no-edge
 __successor-retains-prior-network. Closure is depth_independent; minimality and named-shape uniqueness
 are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
parent	held-parent-nuclid e	parent-number-only	Parent number loses identity.
daughter	held-daughter-nucl ide	anonymous-product	Product loses daughter identity.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
chemistry	held-parent-daughter-species	nuclear-edge-only	Chemical states would be lost.
channel	held-decay-channel	unlabelled-transition	Channel identity is required.
events	positive-counted-transformations	continuum-decay-flow	Flow hides events.
network	complete-directed-transformation-network	selected-decay-edge	One edge hides branching.
absence	structural-EmptyOne-no-edge	numerical-zero-daughter	Numerical zero is not native absence.
extension	successor-retains-prior-network	daughter-overwrites-parent	Overwriting destroys reconstruction.

Adverse controls. All mandatory controls passed:

205. Fold activity-amount-time law

Claim identity: SFT-CHEM-ACTIVITY-AMOUNT-TIME-003

Question and theorem. Activity is the exact positive ratio of counted transformations to counted resource intervals for a held nuclide species, while retained amount is positive Take or structural absence.

held-nuclide-species__positive-counted-initial-occurrences__positive-counted-transformations__positive-counted-resource-intervals__exact-transformations-per-resource__positive-Take-or-EmptyOne-retained-amount__complete-activity-amount-time-vector__ledger-successor-recomputes-relation

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-MEAS-AMOUNT-001
- SFT-PHYS-NUCLEAR-RADIOACTIVE-DECAY-TERMINAL-005
- SFT-CHEM-NUCLEAR-CHEMICAL-CARRIER-001
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002

Generated grammar. Generate the literal product of eight registered activity decisions.

Boundary: Eight dimensions exhaust identity, amount, events, time, activity, remaining amount, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-nuclide-species__positive-counted-initial-occurrences__positive-counted-transformations__positive-counted-resource-intervals__exact-transformations-per-resource__positive-Take-or-EmptyOne-retained-amount__complete-activity-amount-time-vector__ledger-successor-recomputes-relation

. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-nuclide-species	anonymous-activity-number	Activity needs nuclide/species custody.
amount	positive-counted-initial-occurrences	continuum-amount-premise	Continuum amount hides occurrences.
events	positive-counted-transformations	expected-decay-number	Expectation is not event custody.
time	positive-counted-resource-intervals	continuous-time-premise	Continuum time is not proof support.
activity	exact-transformations-per-resource	fitted-decay-constant	A fit cannot define activity.
remaining	positive-Take-or-EmptyOne-retained-amount	signed-amount-difference	Signed subtraction imports negative values.
record	complete-activity-amount-time-vector	selected-reference-time	One time hides evolution.
extension	ledger-successor-recomputes-relation	differential-equation-premise	A differential equation is not required.

Adverse controls. All mandatory controls passed:

206. Fold radioactive branching chemical-yield law

Claim identity: SFT-CHEM-RADIOACTIVE-BRANCHING-CHEMICAL-YIELD-004

Question and theorem. Radioactive chemical yield retains every held decay channel and daughter species, positive branch and recovered event counts, exact recovery ratios and a complete branch partition of One.

held-decay-channel__held-daughter-chemical-species__positive-counted-branch-events__positive-counted-recovered-events__exact-recovered-per-branch-ratio__complete-branch-partition-sums-to-One__complete-daughter-yield-vector__new-branch-repartitions-complete-total

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-COMBINATORICS-001
- SFT-PHYS-DECAY-WIDTH-BRANCHING-LIFETIME-TERMINAL-006
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002

- SFT-CHEM-ACTIVITY-AMOUNT-TIME-003

Generated grammar. Generate the literal product of eight registered branching decisions.

Boundary: Eight dimensions exhaust channel, daughter, events, recovery, yield, partition, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-decay-channel__held-daughter-chemical-species__positive-counted-branch-events__positive-counted-recovered-events__exact-recovered-per-branch-ratio__complete-branch-partition-sums-to-One__complete-daughter-yield-vector__new-branch-repartitions-complete-total. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
channel	held-decay-channel	unlabelled-yield	Yield needs channel identity.
daughter	held-daughter-chemical-species	anonymous-product-amount	Product amount loses species.
events	positive-counted-branch-events	continuum-branch-probability	Probability hides event support.
recovery	positive-counted-recovered-events	fitted-chemical-recovery	A fitted factor is not custody.
yield	exact-recovered-per-branch-ratio	percentage-premise	A percentage is a display form.
partition	complete-branch-partition-sums-to-One	independent-branch-fractions	Independent values need not close.
record	complete-daughter-yield-vector	selected-favorable-daughter	Selection hides adverse/absent branches.
extension	new-branch-repartitions-complete-total	renormalize-after-omission	Renormalization hides missing branches.

Adverse controls. All mandatory controls passed:

207. Fold transient and secular radiochemical-equilibrium law

Claim identity: SFT-CHEM-RADIOCHEMICAL-EQUILIBRIUM-005

Question and theorem. Radiochemical equilibrium is an exact persistent parent/daughter activity-ratio class over complete positive ordered resource intervals: persistent non-One is transient, persistent One is secular, and nonpersistent recurrence is structural absence.

held-parent-daughter-identity__positive-ordered-resource-intervals__exact-counted-activity-pair__held-ratio-or-structural-absence__persistent-nonOne-ratio-forces-transient__persistent-One-ratio-forces-secular__complete-parent-daughter-time-vector__finite-successor-recomputes-regime

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-EQ-CHEMICAL-001
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002
- SFT-CHEM-ACTIVITY-AMOUNT-TIME-003
- SFT-CHEM-RADIOACTIVE-BRANCHING-CHEMICAL-YIELD-004

Generated grammar. Generate the literal product of eight registered equilibrium decisions.

Boundary: Eight dimensions exhaust identity, support, activity, ratio, transient, secular, record and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-parent-daughter-identity__positive-ordered-resource-intervals__exact-counted-activity-pair__held-ratio-or-structural-absence__persistent-nonOne-ratio-forces-transient__persistent-One-ratio-forces-secular__complete-parent-daughter-time-vector__finite-successor-recomputes-regime. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-parent-daughter-identity	anonymous-activity-pair	Equilibrium needs parent/daughter identity.
support	positive-ordered-resource-intervals	continuous-time-premise	Continuum time is not proof support.
activity	exact-counted-activity-pair	fitted-decay-curve	A fitted curve cannot define activity.
relation	held-ratio-or-structural-absence	signed-activity-difference	A signed scalar imports negative values.
transient	persistent-nonOne-ratio-forces-transient	named-transient-assumption	A name cannot establish a regime.
secular	persistent-One-ratio-forces-secular	approximate-equality-tolerance	A tolerance is a free parameter.
record	complete-parent-daughter-time-vector	selected-timepoint	One point cannot establish recurrence.
extension	finite-successor-recomputes-regime	differential-equation-premise	No imported differential equation is needed.

Adverse controls. All mandatory controls passed:

- false_premise: passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt sha256:a9c62cada930affa54c97c70a94c9ebdb9c938734720a656f4cb32492a53138f.
- tampered_source: passed; expected reject a changed registered source identity; observed reject a changed registered source identity; receipt sha256:720dbade1d46550917942824a02ed7dad670e645aac6c4af052941af32c2fa53.

208. Fold isotope-exchange reaction law

Claim identity: SFT-CHEM-ISOTOPE-EXCHANGE-006

Question and theorem. Isotope exchange preserves exact element, isotope and carrier identities and all positive isotope/carrier totals, carries direction as a held positive excess, and forces its exchange quotient by cross-products.

held-element-light-heavy-isotopes__held-distinct-chemical-carriers__positive-complete-four-count-inventory__exact-isotope-and-carrier-conservation__held-direction-positive-Take__exact-cross-product-exchange-quotient__equal-forward-reverse-closes-EmptyOne__successor-preserves-identities-and-totals

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ELEM-ISOTOPE-001
- SFT-CHEM-RXN-IDENTITY-001
- SFT-CHEM-EQ-CHEMICAL-001
- SFT-CHEM-NUCLEAR-CHEMICAL-CARRIER-001
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002

Generated grammar. Generate the literal product of eight registered exchange decisions.

Boundary: Eight dimensions exhaust identity, carriers, inventory, conservation, direction, quotient, equilibrium and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-element-light-heavy-isotopes__held-distinct-chemical-carriers__positive-complete-four-count-inventory__exact-isotope-and-carrier-conservation__held-direction-positive-Take__exact-cross-product-exchange-quotient__equal-forward-reverse-closes-EmptyOne__successor-preserves-identities-and-totals*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-element-light-heavy-isotopes	mass-number-only	Mass number alone loses elemental and isotope identity.
carriers	held-distinct-chemical-carriers	phase-free-exchange	Exchange requires two chemical carriers.
inventory	positive-complete-four-count-inventory	continuum-concentration-remise	Continuum concentration hides occurrences.
conservation	exact-isotope-and-carrier-conservation	isotope-label-overwrite	Overwriting destroys custody.
direction	held-direction-positive-Take	signed-exchange-extent	A signed scalar imports negative values.
quotient	exact-cross-product-exchange-quotient	fitted-exchange-constant	A fit cannot define exchange.
equilibrium	equal-forward-reverse-closes-EmptyOne	numerical-zero-net	Numerical zero is not native balance.
extension	successor-preserve-identities-and-totals	lookup-fractionation-factor	A lookup cannot select a transition.

Adverse controls. All mandatory controls passed:

209. Fold equilibrium isotope-fractionation law

Claim identity: SFT-CHEM-EQUILIBRIUM-ISOTOPE-FRACTIONATION-007

Question and theorem. Equilibrium isotope fractionation is the exact ratio of two positive heavy-per-light phase ratios, with held enrichment or structural coincidence, exchange balance and a stable factor.

held-light-heavy-isotopes__held-distinct-phase-pair__positive-complete-isotope-counts__exact-heavy-per-light-ratios__exact-ratio-of-ratios__held-enrichment-or-EmptyOne-coincidence__exchange-balance-plus-stable-factor__complete-vector-successor-recomputes

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ELEM-ISOTOPE-001
- SFT-CHEM-EQ-CHEMICAL-001
- SFT-CHEM-ISOTOPE-EXCHANGE-006

Generated grammar. Generate the literal product of eight registered fractionation decisions.

Boundary: Eight dimensions exhaust identity, phases, inventory, ratios, factor, orientation, equilibrium and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-light-heavy-isotopes__held-distinct-phase-pair__positive-complete-isotope-counts__exact-heavy-per-light-ratios__exact-ratio-of-ratios__held-enrichment-or-EmptyOne-coincidence__exchange-balance-plus-stable-factor__complete-vector-successor-recomputes. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-light-heavy-isotopes	anonymous-heavy-light	Heavy/light labels need isotope identity.
phases	held-distinct-phase-pair	single-phase-ratio	Fractionation compares two carriers or phases.
inventory	positive-complete-isotope-counts	continuum-abundance-premise	Continuum abundance hides occurrences.
ratios	exact-heavy-per-light-ratios	decimal-isotope-ratio	A decimal is only a display form.
factor	exact-ratio-of-ratios	fitted-fractionation-factor	No fitted factor is admissible.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
orientation	held-enrichment-or-EmptyOne-coincidence	signed-delta-premise	A signed delta imports negative proof values.
equilibrium	exchange-balance-plus-stable-factor	named-equilibrium-assumption	A label cannot prove equilibrium.
extension	complete-vector-successor-recomputes	selected-isotope-pair	One selected pair hides the complete system.

Adverse controls. All mandatory controls passed:

- SFT-CHEM-ACTIVITY-AMOUNT-TIME-003
- SFT-CHEM-ISOTOPE-EXCHANGE-006
- SFT-CHEM-EQUILIBRIUM-ISOTOPE-FRACTIONATION-007

Generated grammar. Generate the literal product of eight registered kinetic decisions.

Boundary: Eight dimensions exhaust identity, support, events, rates, factor, orientation, inventory and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-reaction-light-heavy-identities__positive-ordered-resource-intervals__positive-counted-isotope-products__exact-products-per-resource-rates__exact-light-heavy-rate-ratio__held-faster-class-or-EmptyOne__positive-Take-or-EmptyOne-remainder__finite-time-series-successor-recomputes. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-reaction-light-heavy-identities	mass-only-rate	Rate needs reaction and isotope identity.
support	positive-ordered-resource-intervals	continuous-time-premise	Continuum time is not proof support.
events	positive-counted-isotope-products	expected-product-yield	Expectation is not event custody.
rates	exact-products-per-resource-rates	fitted-rate-constants	Fitted constants cannot define the native rates.
factor	exact-light-heavy-rate-ratio	imported-kinetic-isotope-effect	No imported factor is admissible.
orientation	held-faster-class-or-EmptyOne	signed-rate-difference	A signed difference imports negative values.
inventory	positive-Take-or-EmptyOne-remainder	negative-depleted-reactant	Depletion cannot produce a negative proof value.
extension	finite-time-series-successor-recomputes	Rayleigh-continuum-premise	A continuum law is not required.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt
sha256: ca3da4f2e5948ca221a7584925ebb457d32346668103764f7fe74375b36f93e7.

211. Fold radiotracer custody and inference law

Claim identity: SFT-CHEM-RADIOTRACER-CUSTODY-INFERENCE-009

Question and theorem. A radiotracer retains nuclide and chemical-carrier identity over complete positive ordered observation support; recovery is exact observed per administered custody, unobserved custody is positive or structural absence, and inference cannot exceed observations.

held-tracer-and-chemical-carrier__positive-ordered-observation-support__complete-location-time-vector__positive-administered-and-observed-counts__exact-observed-per-administered-ratio__positive-Take-or-EmptyOne-unobserved__inference-bounded-by-observed-support__successor-preserves-identity-and-complete-record

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-INFO-SYMBOL-DISTINCTION-001
- SFT-PHYS-MEAS-OBSERVATION-CARRIER-001
- SFT-CHEM-NUCLEAR-CHEMICAL-CARRIER-001
- SFT-CHEM-ACTIVITY-AMOUNT-TIME-003

• SFT-CHEM-RADIOCHEMICAL-EQUILIBRIUM-005

Generated grammar. Generate the literal product of eight registered radiotracer decisions.

Boundary: Eight dimensions exhaust identity, support, locations, events, recovery, loss, inference and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-tracer-and-chemical-carrier__positive-ordered-observation-support__complete-location-time-vector__positive-administered-and-observed-counts__exact-observed-per-administered-ratio__positive-Take-or-EmptyOne-unobserved__inference-bounded-by-observed-support__successor-preserves-identity-and-complete-record. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-tracer-and-chemical-carrier	activity-only-tracer	Activity alone loses nuclide and chemistry.
support	positive-ordered-observation-support	continuous-concentration-field	A continuum field hides observations.
locations	complete-location-time-vector	selected-detector-location	Selection cannot establish complete transport.
events	positive-administered-and-observed-counts	expected-count-premise	Expectation is not observed-event custody.
recovery	exact-observed-per-administered-ratio	fitted-recovery-coefficient	A fit cannot define recovery.
loss	positive-Take-or-EmptyOne-unobserved	negative-missing-activity	Missing tracer cannot be a negative proof value.
inference	inference-bounded-by-observed-support	model-selected-localization	A model cannot create an observation.
extension	successor-preserve-identity-and-complete-record	renormalized-selected-series	Renormalization erases custody.

Adverse controls. All mandatory controls passed:

212. Fold radiochemical separation and decontamination law

Claim identity: SFT-CHEM-RADIOCHEMICAL-SEPARATION-DECONTAMINATION-010

Question and theorem. Radiochemical separation retains target and contaminant identities across complete feed/product/waste streams, conserves each species exactly, forces recovery and decontamination ratios by counts, and composes only balanced stages.

held-target-and-contaminant-species__complete-feed-product-waste-streams__positive-species-resolved-counts__exact-target-and-contaminant-conservation__exact-product-target-per-feed-target-ratio__exact-contaminant-fraction-ratio__positive-Take-or-EmptyOne-residual__successor-composes-balanced-stages

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-STOICH-CONSERVATION-001
- SFT-CHEM-NUCLEAR-CHEMICAL-CARRIER-001
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002
- SFT-CHEM-RADIOTRACER-CUSTODY-INFERENCE-009

Generated grammar. Generate the literal product of eight registered separation decisions.

Boundary: Eight dimensions exhaust identity, streams, inventory, balance, recovery, decontamination, absence and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-target-and-contaminant-species__complete-feed-product-waste-streams__positive-species-resolved-counts__exact-target-and-contaminant-conservation__exact-product-target-per-feed-target-ratio__exact-contaminant-fraction-ratio__positive-Take-or-EmptyOne-residual__successor-composes-balanced-stages*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-target-and-contaminant-species	total-radioactivity-only	Total activity loses target and contaminant identity.
streams	complete-feed-product-waste-streams	product-only-record	A product alone hides feed and waste.
inventory	positive-species-resolved-counts	continuum-concentration-premise	Continuum concentration hides occurrences.
balance	exact-target-and-contaminant-conservation	unrecorded-process-loss	Unrecorded loss breaks custody.
recovery	exact-product-target-per-feed-target-ratio	percent-recovery-premise	A displayed percentage cannot define recovery.
decontamination	exact-contaminant-fraction-ratio	fitted-separation-factor	A fit cannot define decontamination.
absence	positive-Take-or-EmptyOne-residual	numerical-zero-contaminant	Numerical zero is not native absence.
extension	successor-composes-balanced-stages	selected-best-stage	Selecting a best stage erases the process.

Adverse controls. All mandatory controls passed:

213. Fold fission-product chemical-distribution law

Claim identity: SFT-CHEM-FISSION-PRODUCT-CHEMICAL-DISTRIBUTION-011

Question and theorem. Physics supplies fission-product identities; Chemistry retains every nuclide, species, phase and location with positive events, partitions the complete support exactly and permits only explicit identity-conserving chemical redistribution.

explicit-physics-product-handoff__held-nuclide-and-chemical-species__complete-phase-location-support__positive-species-resolved-events__exact-complete-partition-of-One__explicit-chemical-redistribution-network__nuclide-change-requires-physics-handoff__successor-retains-complete-time-sample-vector

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-PHYS-NUCLEAR-RADIOACTIVE-DECAY-TERMINAL-005
- SFT-PHYS-DECAY-WIDTH-BRANCHING-LIFETIME-TERMINAL-006
- SFT-CHEM-NUCLEAR-CHEMICAL-CARRIER-001
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002
- SFT-CHEM-RADIOCHEMICAL-SEPARATION-DECONTAMINATION-010

Generated grammar. Generate the literal product of eight registered fission-product decisions.

Boundary: Eight dimensions exhaust handoff, identity, support, events, partition, chemistry, boundary and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *explicit-physics-product-handoff__held-nuclide-and-chemical-species__complete-phase-location-support__positive-species-resolved-events__exact-complete-partition-of-One__explicit-chemical-redistribution-network__nuclide-change-requires-physics-handoff__successor-retains-complete-time-sample-vector*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
handoff	explicit-physics-product-handoff	chemistry-selects-fission-products	Chemistry cannot select nuclear products.
identity	held-nuclide-and-chemical-species	mass-chain-only	Mass chain loses nuclide identity.
support	complete-phase-location-support	bulk-release-fraction	One bulk fraction loses phase and location.
events	positive-species-resolved-events	expected-yield-premise	Expectation is not counted custody.
partition	exact-complete-partition-of-One	renormalized-selected-products	Selection changes the distribution.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
chemistry	explicit-chemical-redistribution-network	fixed-chemical-form-assumption	A name cannot freeze chemistry.
boundary	nuclide-change-requires-physics-handoff	silent-decay-inside-chemistry	Chemistry cannot silently change nuclides.
extension	successor-retains-complete-time-sample-vector	selected-terminal-sample	One sample cannot establish the distribution.

Adverse controls. All mandatory controls passed:

214. Fold radiation-chemistry reaction-network law

Claim identity: SFT-CHEM-RADIATION-CHEMISTRY-REACTION-NETWORK-012

Question and theorem. Physics supplies positive deposited resource; Chemistry retains complete medium/reactant/product/channel identity, counted product events, exact product-per-resource yields, complete channel partition and explicit reaction or structural termination.

explicit-positive-deposited-resource-handoff__held-medium-reactant-product-identities__complete-directed-reaction-network__positive-product-event-counts__exact-product-per-deposited-resource-ratio__exact-complete-channel-partition-of-One__explicit-reaction-or-EmptyOne-termination__successor-retains-and-recomputes-complete-network

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-PHYS-MECH-WORK-ENERGY-001
- SFT-PHYS-MATTER-MASS-ENERGY-001
- SFT-CHEM-RXN-IDENTITY-001
- SFT-CHEM-RXN-MECHANISM-001
- SFT-CHEM-RADIOACTIVE-CHEMICAL-TRANSFORMATION-002
- SFT-CHEM-ACTIVITY-AMOUNT-TIME-003

Generated grammar. Generate the literal product of eight registered radiolysis decisions.

Boundary: Eight dimensions exhaust handoff, identity, network, events, yield, partition, closure and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *explicit-positive-deposited-resource-handoff__held-medium-reactant-product-identities__complete-directed-react*

ion-network__positive-product-event-counts__exact-product-per-deposited-resource-ratio__exact-complete-channel-partition-of-One__explicit-reaction-or-EmptyOne-termination__successor-retains-and-recomputes-complete-network. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
handoff	explicit-positive-deposited-resource-handoff	chemistry-defines-deposited-energy	Deposited resource belongs to Physics.
identity	held-medium-reactant-product-identities	anonymous-radical-yield	A yield needs medium and species identity.
network	complete-directed-reaction-network	single-net-equation	A net equation hides channels and intermediates.
events	positive-product-event-counts	continuum-concentration-premise	Continuum concentration hides occurrences.
yield	exact-product-per-deposited-resource-ratio	fitted-G-value	A fitted value cannot define native yield.
partition	exact-complete-channel-partition-of-One	selected-major-products	Major-product selection erases support.
closure	explicit-reaction-or-EmptyOne-termination	negative-consumption-ledger	Consumption cannot be a negative proof value.
extension	successor-retains-and-recomputes-complete-network	differential-kinetic-model-premise	A continuum kinetic model is not required.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

26. Analytical chemistry, spectroscopy and separation science - 22 admitted claims

Accuracy, precision, sensitivity, NMR, emission, diffraction, chromatography and multimodal identity retain all rows. This entire registered subcategory is included; no proper subset is presented as field completion.

215. Fold analytical accuracy and trueness law

Claim identity: SFT-CHEM-ANALYTICAL-ACCURACY-TRUENESS-001

Question and theorem. Traceable reference and held sample results force exact side/distance or structural coincidence with complete uncertainty and method boundaries.

traceable-reference-identity__held-sample-measurand-method__complete-ordered-result-support__held-side-positive-distance-or-EmptyOne__exact-observed-reference-relation__complete-exact-uncertainty-support__registered-material-method-boundary__successor-retains-and-recomputes-all-results

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-MEAS-UNCERTAINTY-001
- SFT-CHEM-MEAS-TRACEABILITY-001
- SFT-CHEM-ANALYTICAL-SAMPLE-001
- SFT-CHEM-ANALYTICAL-CALIBRATION-001

Generated grammar. Generate the literal product of eight registered analytical decisions.

Boundary: Eight dimensions exhaust reference, measurand, support, comparison, trueness, uncertainty, boundary and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *traceable-reference-identity__held-sample-measurand-method__complete-ordered-result-support__held-side-positive-distance-or-EmptyOne__exact-observed-reference-relation__complete-exact-uncertainty-support__registered-material-method-boundary__successor-retains-and-recomputes-all-results*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
reference	traceable-reference-identity	nominal-value-premise	A name is not a reference.
measurand	held-sample-measurand-method	result-without-measurand	No comparison identity exists.
support	complete-ordered-result-support	selected-result	Selection hides variation.
comparison	held-side-positive-distance-or-EmptyOne	signed-error-scalar	A sign is not a native proof value.
trueness	exact-observed-reference-relation	declared-accurate-label	A label cannot force trueness.
uncertainty	complete-exact-uncertainty-support	single-certain-value	Alternatives are hidden.
boundary	registered-material-method-boundary	universal-method-accuracy	Accuracy is method and material bound.
extension	successor-retains-and-recomputes-all-results	renormalized-new-results	Renormalization erases custody.

Adverse controls. All mandatory controls passed:

216. Fold analytical precision and repeatability law

Claim identity: SFT-CHEM-ANALYTICAL-PRECISION-REPEATABILITY-002

Question and theorem. Same-condition replicates force all exact pair distances and extreme spread while retaining every adverse replicate separately from trueness.

held-sample-measurand-method__same-held-repeatability-conditions__complete-positive-ordered-replicates__all-pair-positive-distance-or-EmptyOne__exact-extreme-distance-or-EmptyOne__repeatability-class-held-separately__all-adverse-replicates-retained__successor-retains-and-recomputes-pairs

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-MEAS-UNCERTAINTY-001
- SFT-CHEM-ANALYTICAL-SAMPLE-001
- SFT-CHEM-ANALYTICAL-ACCURACY-TRUENESS-001

Generated grammar. Generate the literal product of eight registered analytical decisions.

Boundary: Eight dimensions exhaust identity, conditions, support, pair comparison, spread, class, adverse custody and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-sample-measurand-method__same-held-repeatability-conditions__complete-positive-ordered-replicates__all-pair-positive-distance-or-EmptyOne__exact-extreme-distance-or-EmptyOne__repeatability-class-held-separately__all-adverse-replicates-retained__successor-retains-and-recomputes-pairs. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-sample-measurand-method	replicates-without-sample	Results cannot be paired.
conditions	same-held-repeatability-conditions	mixed-condition-pool	Repeatability is obscured.
support	complete-positive-ordered-replicates	summary-only	A summary erases rows.
comparison	all-pair-positive-distance-or-EmptyOne	signed-deviation-list	Signed values are not native proof distances.
spread	exact-extreme-distance-or-EmptyOne	fitted-dispersion-parameter	A fit cannot define observed spread.
class	repeatability-class-held-separately	precision-equals-trueness	Agreement with a reference is distinct.
adverse	all-adverse-replicates-retained	outlier-deleted	Deletion inflates precision.
extension	successor-retains-and-recomputes-pairs	summary-renormalized	Earlier distances disappear.

217. Fold analytical sensitivity law

Claim identity: SFT-CHEM-ANALYTICAL-SENSITIVITY-003

Question and theorem. Ordered positive analyte inputs and paired responses force exact local response/input ratios, held direction and finite method-bounded segments with drift custody.

held-analyte-method-condition__positive-ordered-input-support__paired-complete-response-support__held-response-side-positive-change-or-EmptyOne__exact-local-response-per-input-ratio__finite-registered-segment-domain__complete-drift-noise-custody__successor-retains-and-adds-segment

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-CALIBRATION-001
- SFT-CHEM-ANALYTICAL-PRECISION-REPEATABILITY-002

Generated grammar. Generate the literal product of eight registered analytical decisions.

Boundary: Eight dimensions exhaust identity, input, response, change, relation, domain, noise and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-analyte-method-condition__positive-ordered-input-support__paired-complete-response-support__held-response-side-positive-change-or-EmptyOne__exact-local-response-per-input-ratio__finite-registered-segment-domain__complete-drift-noise-custody__successor-retains-and-adds-segment. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-analyte-method-condition	anonymous-response	No sensitivity is attributable.
input	positive-ordered-input-support	continuum-input-premise	Uncounted support cannot be audited.
response	paired-complete-response-support	response-fit-only	Observed rows are erased.
change	held-response-side-positive-change-or-EmptyOne	signed-response-change	A sign is not a proof magnitude.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
relation	exact-local-response-per-input-ratio	fitted-global-slope	A global fit can hide local behavior.
domain	finite-registered-segment-domain	universal-linearity	Sensitivity is condition-bound.
noise	complete-drift-noise-custody	drift-noise-erased	Sensitivity alone cannot establish resolution.
extension	successor-retains-and-adds-segment	refitted-history	A refit changes earlier relations.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

218. Fold detection and quantification boundary law

Claim identity: SFT-CHEM-ANALYTICAL-DETECTION-QUANTIFICATION-004

Question and theorem. Complete blank and low-level supports force method-bounded distinguishability, explicit error custody, and separate detection and quantification classes or structural absence.

held-analyte-method-condition__complete-positive-blank-support__complete-positive-ordered-level-support__exact-blank-sample-distinguishability__false-positive-negative-custody__repeatability-and-recovery-required__detected-quantified-label-or-EmptyOne__successor-retains-and-recomputes-levels

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-PRECISION-REPEATABILITY-002
- SFT-CHEM-ANALYTICAL-SENSITIVITY-003

Generated grammar. Generate the literal product of eight registered analytical decisions.

Boundary: Eight dimensions exhaust identity, blank, levels, detection, errors, quantification, absence and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-analyte-method-condition__complete-positive-blank-support__complete-positive-ordered-level-support__exact-blank-sample-distinguishability__false-positive-negative-custody__repeatability-and-recovery-required__detected-quantified-label-or-EmptyOne__successor-retains-and-recomputes-levels. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-analyte-method-condition	unidentified-signal	No analyte boundary exists.
blank	complete-positive-blank-support	single-numerical-zero-blank	Numerical zero cannot represent background.
levels	complete-positive-ordered-level-support	selected-low-result	Selection hides failures.
detection	exact-blank-sample-distinguishability	declared-limit-number	A number alone cannot prove distinction.
errors	false-positive-negative-custody	false-results-erased	Error classes are hidden.
quantification	repeatability-and-recovery-required	detection-equals-quantification	Identity is weaker than measurement.
absence	detected-quantified-label-or-EmptyOne	negative-undetected-value	Undetected is not negative amount.
extension	successor-retains-and-recomputes-levels	threshold-refitted	A refit changes prior classifications.

219. Fold analytical selectivity and interference-matrix law

Claim identity: SFT-CHEM-ANALYTICAL-SELECTIVITY-INTERFERENCE-005

Question and theorem. Held analyte and complete interferent baselines and mixtures force exact method-bounded response distinction, interference side/distance or structural coincidence, retaining every error row.

held-analyte-method-condition__complete-declared-interferent-matrix__analyte-and-interferent-baselines-held__all-analyte-interferent-mixtures-held__held-side-positive-distance-or-EmptyOne__exact-response-distinguishability-class__favorable-adverse-error-rows-retained__successor-retains-and-adds-interferent

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-SELECTIVITY-001
- SFT-CHEM-ANALYTICAL-SENSITIVITY-003
- SFT-CHEM-ANALYTICAL-DETECTION-QUANTIFICATION-004

Generated grammar. Generate the literal product of eight registered analytical decisions.

Boundary: Eight dimensions exhaust identity, matrix, baselines, mixtures, comparison, selectivity, adverse custody and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-analyte-method-condition__complete-declared-interferent-matrix__analyte-and-interferent-baselines-held__all-analyte-interferent-mixtures-held__held-side-positive-distance-or-EmptyOne__exact-response-distinguishability-class__favorable-adverse-error-rows-retained__successor-retains-and-adds-interferent. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-analyte-method-condition	response-without-analyte	No target is attributable.
matrix	complete-declared-interferent-matrix	selected-interferent	Selection can hide interference.
baselines	analyte-and-interferent-baselines-held	mixture-only-result	Attribution is impossible.
mixtures	all-analyte-interferent-mixtures-held	accepted-mixtures-only	Adverse mixtures disappear.
comparison	held-side-positive-distance-or-EmptyOne	signed-bias-scalar	A sign alone loses response custody.
selectivity	exact-response-distinguishability-class	universal-specificity-label	Selectivity is method-bound.
adverse	favorable-adverse-error-rows-retained	false-positive-rows-erased	Erasure inflates selectivity.
extension	successor-retains-and-adds-interferent	matrix-renormalized	Prior comparisons disappear.

Adverse controls. All mandatory controls passed:

220. Fold NMR chemical-shift relation

Claim identity: SFT-CHEM-NMR-CHEMICAL-SHIFT-006

Question and theorem. Held molecular, nucleus-site, reference and condition identities force an exact held-side chemical-shift relation with complete row custody.

held-molecular-carrier__held-nucleus-identity__complete-nucleus-site-map__held-reference-comparison__held-solvent-and-condition__held-side-positive-exact-ratio-or-EmptyOne__complete-shift-uncertainty-ambiguity-custody__success-or-retains-and-appends-complete-sites

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-PHYS-QUANTUM-SPIN-001
- SFT-CHEM-MEAS-TRACEABILITY-001
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-CHEM-ANALYTICAL-SELECTIVITY-INTERFERENCE-005

Generated grammar. Generate the literal product of eight registered NMR-custody decisions.

Boundary: Eight dimensions exhaust carrier, nucleus, site, reference, environment, exact relation, custody and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-molecular-carrier__held-nucleus-identity__complete-nucleus-site-map__held-reference-comparison__held-solvent-and-condition__held-side-positive-exact-ratio-or-EmptyOne__complete-shift-uncertainty-ambiguity-custody__successor-retains-and-appends-complete-sites*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
identity	held-molecular-carrier	detached-shift-number	A scalar cannot identify a molecular observation.
nucleus	held-nucleus-identity	element-only-spectrum	Element name loses isotope and observed nucleus.
site	complete-nucleus-site-map	unordered-peak-list	An unordered list loses molecular attribution.
reference	held-reference-comparison	absolute-frequency-relabelled-shift	A shift exists only relative to a named reference.
environment	held-solvent-and-condition	unconditioned-universal-shift	Solvent and conditions can change the observation.
relation	held-side-positive-exact-ratio-or-EmptyOne	signed-or-floating-shift-premise	A sign or float is not a native exact relation.
custody	complete-shift-uncertainty-ambiguity-custody	selected-assigned-peaks	Selection hides ambiguity and adverse rows.
extension	successor-retains-and-appends-complete-sites	renormalized-added-spectrum	Renormalization erases prior custody.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt `sha256:1f7e6353517b5301bbcef740b57e7cca55c9724e2263d6742a3888acf4da4da4`.

221. Fold NMR scalar spin-coupling relation

Claim identity: SFT-CHEM-NMR-SPIN-COUPLING-007

Question and theorem. Two held nucleus sites, their counted path and held spin orientation force an exact positive coupling magnitude or structural absence with complete custody.

held-two-nucleus-site-pair__held-preserving-alternating-or-unresolved-spin-relation__positive-counted-bonding-path__held-molecule-and-condition__exact-positive-magnitude-or-EmptyOne__site-swap-invariant-pair-relation__complete-value-error-bound-and-absence-custody__successor-retains-and-appends-complete-pairs

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-PHYS-QUANTUM-SPIN-001
- SFT-CHEM-ELECTRON-COUNT-SPIN-002
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-CHEM-NMR-CHEMICAL-SHIFT-006

Generated grammar. Generate the literal product of eight registered NMR-custody decisions.

Boundary: Eight dimensions exhaust pair, spin relation, counted path, condition, exact magnitude, symmetry, custody and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-two-nucleus-site-pair__held-preserving-alternating-or-unresolved-spin-relation__positive-counted-bonding-path__held-molecule-and-condition__exact-positive-magnitude-or-EmptyOne__site-swap-invariant-pair-relation__complete-value-error-bound-and-absence-custody__successor-retains-and-appends-complete-pairs*. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
pair	held-two-nucleus-site-pair	single-peak-coupling-label	Coupling is a relation between two retained sites.
spin	held-preserving-alternating-or-unresolved-spin-relation	unsigned-magnitude-only	Magnitude alone loses the held spin hand.
path	positive-counted-bonding-path	coupling-without-bonding-path	A detached value cannot establish molecular connectivity.
environment	held-molecule-and-condition	unconditioned-universal-coupling	The reported value is condition-bound.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
magnitude	exact-positive-magnitude-or-EmptyOne	floating-or-fitted-coupling	A float or fitted equation cannot force the relation.
symmetry	site-swap-invariant-pair-relation	ordered-pair-changes-value	Relabelling the pair cannot alter a scalar coupling.
custody	complete-value-error-bound-and-absence-custody	selected-couplings-only	Selection hides limits and adverse rows.
extension	successor-retains-and-appends-complete-pairs	refitted-added-couplings	Refitting can change earlier records.

Adverse controls. All mandatory controls passed:

222. Fold NMR relaxation and exchange law

Claim identity: SFT-CHEM-NMR-RELAXATION-EXCHANGE-008

Question and theorem. Held sites, states, processes and finite observation conditions force exact positive relaxation-time or exchange-rate records with complete absence custody.

held-molecular-carrier-and-site__held-source-and-destination-states__held-relaxation-or-exchange-process__finite-positive-observation-interval__exact-positive-time-or-counted-transition-rate__held-condition-unit-and-uncertainty__measured-bounded-unavailable-unresolved-custody__successor-retains-and-appends-complete-transitions

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-DYNAMICAL-SYSTEMS-001
- SFT-COMP-FORM-STATE-TRANSITION-001
- SFT-CHEM-ELEMENTARY-TRANSITION-RATE-001
- SFT-CHEM-NMR-SPIN-COUPLING-007

Generated grammar. Generate the literal product of eight registered NMR-custody decisions.

Boundary: Eight dimensions exhaust carrier/site, states, process, finite resource, exact relation, observation, adversity and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `held-molecular-carrier-and-site__held-source-and-destination-states__held-relaxation-or-exchange-process__finite-positive-observation-interval__exact-positive-time-or-counted-transition-rate__held-condition-unit-and-uncertainty__measured-bounded-unavailable-unresolved-custody__successor-retains-and-appends-complete-transitions`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-molecular-carrier-and-site	detached-relaxation-or-exchange-number	A number alone cannot identify the relaxing or exchanging molecule.
states	held-source-and-destination-states	single-state-decay-label	A transition requires source and destination states.
process	held-relaxation-or-exchange-process	generic-dynamics-label	Different NMR processes cannot be conflated.
resource	finite-positive-observation-interval	continuous-time-premise	An ungenerated continuum is not an observation ledger.
relation	exact-positive-time-or-counted-transition-rate	imported-exponential-or-fitted-rate	A fitted decay form cannot force the transition law.
observation	held-condition-unit-and-uncertainty	unconditioned-universal-dynamics	Relaxation and exchange are method and condition bound.
adversity	measured-bounded-unavailable-unresolved-custody	missing-or-unfavorable-rows-erased	Erasure manufactures a complete trend.
extension	successor-retains-and-appends-complete-transitions	refitted-added-timescale	Refitting changes prior evidence.

- SFT-CHEM-COMPETING-CHANNEL-BRANCHING-006
- SFT-CHEM-NMR-RELAXATION-EXCHANGE-008
- SFT-CHEM-RAMAN-TRANSITION-INTENSITY-009

Generated grammar. Generate the literal product of eight registered photoluminescence-custody decisions.

Boundary: Eight dimensions exhaust carrier, transition, channels, emission, yield, lifetime, custody and extension.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-molecular-carrier-and-excitation__held-initial-and-final-molecular-states__complete-radiative-nonradiative-partition__exact-positive-emission-support-or-EmptyOne__exact-outcome-over-excitation-ratio__exact-positive-observation-lifetime-or-EmptyOne__complete-emission-yield-lifetime-condition-custody__successor-retains-and-repartitions-complete-counts*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-molecular-carrier-and-excitation	detached-fluorescence-number	A number cannot identify the emitting molecule.
transition	held-initial-and-final-molecular-states	emission-peak-without-states	A peak alone loses its transition endpoints.
channels	complete-radiative-nonradiative-partition	radiative-channel-only	Ignoring nonradiative outcomes inflates yield.
emission	exact-positive-emission-support-or-EmptyOne	signed-floating-emission-value	A signed float is not a native emission relation.
yield	exact-outcome-over-excitation-ratio	fitted-quantum-yield	A fitted scalar can hide omitted outcomes.
lifetime	exact-positive-observation-lifetime-or-EmptyOne	imported-continuous-decay-law	A continuum decay form cannot force a finite observation.
custody	complete-emission-yield-lifetime-condition-custody	selected-bright-favorable-records	Selection erases quenching, uncertainty and missing rows.
extension	successor-retains-and-repartitions-complete-counts	refitted-added-channel	Refitting changes prior yields.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

226. Fold infrared line-position and intensity law

Claim identity: SFT-CHEM-INFRARED-LINE-INTENSITY-012

Question and theorem. Held vibrational state pairs force exact positive infrared line coordinates and counted responses with complete condition, uncertainty and absent-line custody.

held-molecule-and-phase__held-initial-final-vibrational-states__exact-positive-line-coordinate-or-EmptyOne__exact-counted-transmission-response-or-EmptyOne__held-dipole-state-transformation__held-complete-measurement-condition__complete-line-error-bound-absence-custody__successor-appends-without-changing-prior-lines

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-CHEM-SPEC-INFRARED-001
- SFT-CHEM-VIBRATIONAL-FREQUENCY-009
- SFT-CHEM-RAMAN-TRANSITION-INTENSITY-009

Generated grammar. Generate the literal product of the eight frozen ANAL-012 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-012 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-molecule-and-phase__held-initial-final-vibrational-states__exact-positive-line-coordinate-or-EmptyOne__exact-counted-transmission-response-or-EmptyOne__held-dipole-state-transformation__held-complete-measurement-condition__complete-line-error-bound-absence-custody__successor-appends-without-changing-prior-lines*. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-molecule-and-phase	detached-ir-number	A number does not identify its molecule.
states	held-initial-final-vibrational-states	peak-without-vibrational-states	A peak alone loses both state endpoints.
coordinate	exact-positive-line-coordinate-or-EmptyOne	signed-floating-wavenumber	A signed float is not a native coordinate.
response	exact-counted-transmission-response-or-EmptyOne	arbitrary-absorbance-height	An arbitrary height loses counted comparison support.
selection	held-dipole-state-transformation	imported-ir-selection-rule	A named convention cannot replace the derived state distinction.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
condition	held-complete-measurement-condition	unconditioned-spectrum	Phase, temperature and instrument boundary affect observation.
custody	complete-line-error-bound-absence-custody	selected-strong-bands	Peak selection erases weak and adverse rows.
extension	successor-append-without-changing-prior-lines	refitted-added-spectrum	Refitting can change prior evidence.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

227. Fold UV-visible line-position and intensity law

Claim identity: SFT-CHEM-UVVISIBLE-LINE-INTENSITY-013

Question and theorem. Held electronic state pairs force exact positive absorption coordinates and counted response support with complete solvent, condition and uncertainty custody.

held-molecule-and-electronic-carrier__held-initial-final-electronic-states__exact-positive-absorption-coordinate-or-EmptyOne__exact-counted-absorption-response-or-EmptyOne__complete-electronic-transition-support__held-solvent-phase-temperature-condition__complete-band-error-bound-absence-custody__successor-retains-and-appends-complete-bands

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-CHEM-SPEC-UVVIS-001
- SFT-CHEM-MOLECULAR-STATE-TRANSITION-009
- SFT-CHEM-FLUORESCENCE-YIELD-LIFETIME-010

Generated grammar. Generate the literal product of the eight frozen ANAL-013 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-013 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-molecule-and-electronic-carrier__held-initial-final-electronic-states__exact-positive-absorption-coordinate-or-EmptyOne__exact-counted-absorption-response-or-EmptyOne__complete-electronic-transition-support__held-solvent-phase-temperature-condition__complete-band-error-bound-abs

ence-custody__successor-retains-and-appends-complete-bands. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-molecule-and-electronic-carrier	detached-uvvis-number	A number does not identify its molecule.
states	held-initial-final-electronic-states	band-without-electronic-states	A band alone loses its state endpoints.
coordinate	exact-positive-absorption-coordinate-or-EmptyOne	signed-floating-wavelength	A signed float is not native support.
response	exact-counted-absorption-response-or-EmptyOne	fitted-extinction-scalar	A fitted scalar can hide source counts.
partition	complete-electronic-transition-support	bright-transition-only	Selecting bright transitions erases the remaining support.
condition	held-solvent-phase-temperature-condition	solvent-free-universal-band	Solvent and condition alter observation.
custody	complete-band-error-bound-absence-custody	selected-favorable-bands	Selection erases shoulders, errors and absent rows.
extension	successor-retains-and-appends-complete-bands	renormalized-added-band	Renormalization changes prior responses.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt

228. Fold mass, isotope and fragmentation spectrum law

Claim identity: SFT-CHEM-MASS-ISOTOPE-FRAGMENT-VECTOR-014

Question and theorem. Held molecular and ionic carriers force a complete exact mass-to-charge, isotope and fragmentation event vector without weak-peak selection.

held-molecular-parent-and-ion-carriers__held-isotope-and-charge-composition__exact-positive-mass-charge-ratio__held-parent-fragment-transition-path__exact-event-over-reference-event-ratio__held-ionization-and-acquisition-condition__complete-peak-isotope-error-absence-custody__successor-retains-and-appends-complete-fragments

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-CHEM-SPEC-MASS-001
- SFT-CHEM-ELEM-ISOTOPE-001
- SFT-CHEM-NUCLEAR-ELECTRONIC-COMPOSITION-012

Generated grammar. Generate the literal product of the eight frozen ANAL-014 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-014 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-molecular-parent-and-ion-carriers__held-isotope-and-charge-composition__exact-positive-mass-charge-ratio__held-parent-fragment-transition-path__exact-event-over-reference-event-ratio__held-ionization-and-acquisition-condition__complete-peak-isotope-error-absence-custody__success-or-retains-and-appends-complete-fragments. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-molecular-parent-and-ion-carriers	mass-peaks-without-molecule	Peaks alone lose molecular identity.
composition	held-isotope-and-charge-composition	nominal-mass-only	Nominal mass loses isotope composition.
coordinate	exact-positive-mass-charge-ratio	floating-mass-to-charge	A float is not native exact support.
fragmentation	held-parent-fragment-transition-path	peak-without-fragment-path	A peak alone loses its parent path.
response	exact-event-over-reference-event-ratio	normalized-major-peak-only	Major-only normalization erases weak events.
condition	held-ionization-and-acquisition-condition	unconditioned-ionization	Ionization and instrument boundary affect fragmentation.
custody	complete-peak-isotope-error-absence-custody	selected-diagnostic-peaks	Selection erases weak, isotope and unresolved rows.
extension	successor-retains-and-appends-complete-fragments	refitted-added-fragment	Refitting changes prior event ratios.

230. Fold X-ray diffraction chemical-structure law

Claim identity: SFT-CHEM-XRAY-DIFFRACTION-STRUCTURE-016

Question and theorem. A held crystal carrier and reciprocal support force exact diffraction coordinates, responses and a chemistry-owned structure correspondence.

*held-crystal-phase-and-composition__explicit-physics-xray-scattering-handoff__held-direct-and-reciprocal-support__e
 xact-positive-spacing-or-held-angle__exact-counted-relative-intensity-or-EmptyOne__complete-cell-symmetry-site-corr
 espondence__complete-reflection-error-condition-custody__successor-retains-prior-reflections-and-structure*

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-PHYS-WAVE-DIFFRACTION-001
- SFT-MAT-CRYST-UNIT-CELL-001
- SFT-MAT-CRYST-RECIPROCAL-001

Generated grammar. Generate the literal product of the eight frozen ANAL-016 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-016 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-crystal-phase-and-composition__explicit-physics-xray-scattering-handoff__held-direct-and-reciprocal-support__exact-positive-spacing-or-held-angle__exact-counted-relative-intensity-or-EmptyOne__complete-cell-symmetry-site-correspondence__complete-reflection-error-condition-custody__successor-retains-prior-reflections-and-structure. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-crystal-phase-and-composition	pattern-without-crystal	A pattern alone loses crystal identity.
probe	explicit-physics-x-ray-scattering-handoff	chemistry-owned-xray-probe	Probe production belongs to Physics.
support	held-direct-and-reciprocal-support	line-list-without-reciprocal-support	Lines alone lose the generated lattice relation.
coordinate	exact-positive-spacing-or-held-angle	floating-two-theta	A float is not native exact support.
response	exact-counted-relative-intensity-or-EmptyOne	arbitrary-diffraction-intensity	An arbitrary height loses comparison support.
structure	complete-cell-symmetry-site-correspondence	database-structure-label-only	A label cannot establish structure correspondence.
custody	complete-reflection-error-condition-custody	selected-major-reflections	Selection erases weak and adverse reflections.
extension	successor-retains-prior-reflections-and-structure	refined-added-pattern	Refinement can change prior evidence.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt
sha256:3ee6584602617d278dcc9159ae31543ddbfe11eedf8f741cd029a6dc43fccc0.
- **tampered_source:** passed; expected reject a changed registered source identity; observed reject a changed registered source identity; receipt sha256:c1a69d8a51cd21499c17bbca82e4e7f0f6e4f9249bc6d8f33c690f789223f8b3.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:1c21a85f3e815a0f52abcb47ddd0c0a1de642bd4603bd87a01852ffb8bc37e63.
- **boundary:** passed; expected reject target access, forbidden proof values, imported laws and free parameters; observed reject target access, forbidden proof values, imported laws and free parameters; receipt
sha256:a65f50c75c9d183a636a7fcda5dd4fa0369fc0ad2e5539df0038c03ccd860463.

Independent reconstruction. Implementation hash

sha256:b47f660681890f4fc2aafb5a9bfc56b0c4f19220058c188c7c07a8e3bb8ae5e; independent certificate sha256:b7dbb77e329da299e4f00abf9584b0ccddcb5b962915019d2a8517c01c286d50; external-validation hash sha256:99986586491d122e5f904762fbb32549372d9e9cc59d386b22459ab608211bc5. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: True. All registered rows were preserved: True. The capability-isolation and custody certificates passed. External source identities:

- NIST-SRM-674-XRAY-INTENSITY-SET
- NIST-SRM-676A-DIFFRACTION-STANDARD
- NIST-SRM-674-XRAY-INTENSITY-SET

- NIST-SRM-676A-DIFFRACTION-STANDARD

- NIST-SRM-674-XRAY-INTENSITY-SET
- NIST-SRM-676A-DIFFRACTION-STANDARD

Comparison records:

- complete 218-artifact post-seal surface retained: 22,221,914 source bytes, 173 PDF pages, seven HTML surfaces, 63 IR vectors, three UV-visible vectors, three mass vectors, 91 rotational lines, 619 chromatography rows and 385 neutron rows
- all 8 separately registered claim targets retained
- all favorable, adverse, absent, unavailable, unresolved, predicted, fitted, uncertain, superseded and transport records retained
- external values and conventional models remain downstream evidence and never select the Fold-native survivor

Falsification boundary: ANAL-016 halts if its survivor is nonunique; any registered source, target, value, line, page, condition, unit, uncertainty, favorable, adverse, absent, unavailable, unresolved, fitted, superseded or transport row is omitted; the implementation-distinct reconstruction disagrees; any dependency is missing; or external evidence selects the native law.

Measurement receipt: sha256:35aff32247bdfdf672f3ba1892d9d7c8ba6ec3434fc1471bd883f1533f9ee422.

Isolation certificate: sha256:dca2d92e335ba5defe7a96d1881109a91ff246d552c71613c1c6232d67d4ab9a.

Custody certificate: sha256:c24d9fee278ec2984f9454073c11fabda1d7454b58f1cc006864e4a1e24efea9.

Registered source descriptions:

- None: ()

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no numerical zero negative irrational imaginary continuum fitted free random or imported native parameter
- no external value equation model fit sign zero outcome prominent row or favorable subset selects the survivor
- all favorable adverse absent unavailable unresolved predicted fitted uncertain superseded and transport rows remain

Immutable identities. Source manifest

231. Fold electron/neutron diffraction correspondence law

Claim identity: SFT-CHEM-ELECTRON-NEUTRON-DIFFRACTION-017

Question and theorem. Held probe identity and one held chemical structure force separately retained electron and neutron diffraction correspondences without probe conflation.

held-material-phase-and-composition__held-electron-or-neutron-probe__explicit-physics-scattering-handoff__held-reciprocal-and-site-support__exact-positive-diffraction-coordinate-or-EmptyOne__probe-specific-structure-response-correspondence__complete-probe-reflection-error-custody__successor-appends-probe-records-without-conflation

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001

- SFT-CHEM-ANALYTICAL-COMplete-RECORD-001
- SFT-PHYS-MATTER-SCATTERING-001
- SFT-MAT-CRYST-RECIPROCAL-001
- SFT-CHEM-XRAY-DIFFRACTION-STRUCTURE-016

Generated grammar. Generate the literal product of the eight frozen ANAL-017 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-017 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `held-material-phase-and-composition__held-electron-or-neutron-probe__explicit-physics-scattering-handoff__held-reciprocal-and-site-support__exact-positive-diffraction-coordinate-or-EmptyOne__probe-specific-structure-response-correspondence__complete-probe-reflection-error-custody__successor-appends-probe-records-without-conflation`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-material-phase-and-composition	diffraction-without-material	A pattern alone loses material identity.
probe	held-electron-or-neutron-probe	probe-agnostic-pattern	Electron and neutron interactions cannot be conflated.
handoff	explicit-physics-scattering-handoff	chemistry-invents-probe-law	Probe scattering belongs to Physics.
support	held-reciprocal-and-site-support	peaks-without-reciprocal-state	Peaks alone lose structural support.
coordinate	exact-positive-diffraction-coordinate-or-EmptyOne	floating-diffraction-coordinate	A float is not native exact support.
correspondence	probe-specific-structure-response-correspondence	same-response-for-both-probes	Different probes retain different response relations.
custody	complete-probe-reflection-error-custody	selected-agreeing-reflections	Agreement selection erases adverse rows.
extension	successor-appends-probe-records-without-conflation	refitted-mixed-probe-pattern	Refitting can change prior evidence.

232. Fold chromatographic retention and resolution law

Claim identity: SFT-CHEM-CHROMATOGRAPHIC-RETENTION-RESOLUTION-018

Question and theorem. Held analyte, matrix and mobile/stationary phases force complete exact retention, peak and pairwise resolution custody at fixed conditions.

held-analyte-and-matrix__held-mobile-and-stationary-phases__exact-positive-retention-coordinate-or-EmptyOne__complete-positive-peak-support__exact-pairwise-resolution-relation__held-temperature-flow-column-condition__complete-coelution-error-absence-custody__successor-retains-and-appends-complete-peaks

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMPLETE-RECORD-001
- SFT-CHEM-ANALYTICAL-SAMPLE-001
- SFT-CHEM-ANALYTICAL-SELECTIVITY-INTERFERENCE-005
- SFT-CHEM-COUPLED-MASS-HEAT-CHARGE-TRANSPORT-019

Generated grammar. Generate the literal product of the eight frozen ANAL-018 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-018 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-analyte-and-matrix__held-mobile-and-stationary-phases__exact-positive-retention-coordinate-or-EmptyOne__complete-positive-peak-support__exact-pairwise-resolution-relation__held-temperature-flow-column-condition__complete-coelution-error-absence-custody__successor-retains-and-appends-complete-peaks. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
analyte	held-analyte-and-matrix	retention-number-without-analyte	A time/index alone loses analyte identity.
phases	held-mobile-and-stationary-phases	phase-free-retention	Retention depends on both phase identities.
coordinate	exact-positive-retention-coordinate-or-EmptyOne	floating-retention-value	A float is not native exact support.
peak	complete-positive-peak-support	apex-only-peak	An apex alone loses complete peak support.
resolution	exact-pairwise-resolution-relation	named-separated-or-not	A category hides pairwise distances and widths.
condition	held-temperature-flow-column-condition	unconditioned-retention-index	Temperature, flow and phase conditions matter.
custody	complete-coelution-error-absence-custody	selected-resolved-analyses	Selection erases coelution and unresolved rows.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
extension	successor-retains-and-appends-complete-peaks	refitted-added-analyte	Refitting can change earlier peaks.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt sha256 : b52b59d40799e087350adfcc0533500eda93ff29bd3ef9dfb383470d77fcf063.

233. Fold electrophoretic mobility and separation law

Claim identity: SFT-CHEM-ELECTROPHORETIC-MOBILITY-SEPARATION-019

Question and theorem. Held species, charge orientation and medium force exact positive mobility magnitude, trajectory and separation custody.

held-species-and-particle-identity__held-charge-motion-side__held-medium-pH-temperature-condition__held-field-direction-and-resource__exact-positive-mobility-magnitude-or-EmptyOne__exact-trajectory-and-pairwise-separation__complete-mobility-error-absence-custody__successor-retains-and-appends-species

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMplete-RECORD-001
- SFT-CHEM-IONIC-MOBILITY-TRANSFERENCE-008
- SFT-CHEM-ANALYTICAL-SELECTIVITY-INTERFERENCE-005

Generated grammar. Generate the literal product of the eight frozen ANAL-019 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-019 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-species-and-particle-identity__held-charge-motion-side__held-medium-pH-temperature-condition__held-field-direction-and-resource__exact-positive-mobility-magnitude-or-EmptyOne__exact-trajectory-and-pairwise-separation__complete-mobility-error-absence-custody__successor-retains-and-appends-species. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
species	held-species-and-particle-identity	mobility-without-species	A mobility value loses species identity.
charge	held-charge-motion-side	signed-negative-mobility	A signed number conflates orientation and magnitude.
medium	held-medium-pH-temperature-condition	medium-free-mobility	Medium and pH affect motion.
field	held-field-direction-and-resource	unrecorded-field	Motion needs a retained applied-field boundary.
mobility	exact-positive-mobility-magnitude-or-EmptyOne	floating-mobility	A float is not native exact support.
separation	exact-trajectory-and-pairwise-separation	named-separated-or-not	A category loses trajectories and distances.
custody	complete-mobility-error-absence-custody	selected-mobile-fraction	Selection erases immobile and adverse rows.
extension	successor-retains-and-appends-species	refitted-added-species	Refitting changes earlier mobilities.

Adverse controls. All mandatory controls passed:

234. Fold electroanalytical response law

Claim identity: SFT-CHEM-ELECTROANALYTICAL-RESPONSE-020

Question and theorem. Held analyte/electrode/cell identities and an ordered applied-potential path force a complete exact current-response trace with reaction and adverse custody.

held-analyte-electrode-cell-identity__held-ordered-applied-potential-path__held-oxidation-reduction-current-side__exact-positive-current-magnitude-or-EmptyOne__held-electrode-reaction-correspondence__held-scan-medium-reference-condition__complete-trace-error-background-custody__successor-appends-path-without-changing-prior-response

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-CHEM-ANALYTICAL-COMplete-RECORD-001
- SFT-CHEM-ELECTRODE-POTENTIAL-CHEMICAL-RELATION-002

- SFT-CHEM-CELL-POTENTIAL-COMPOSITION-003
- SFT-CHEM-ELECTRODE-REACTION-RATE-009

Generated grammar. Generate the literal product of the eight frozen ANAL-020 custody decisions.

Boundary: Eight binary dimensions exhaust the registered ANAL-020 carrier, relation, exact-support, condition, custody and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-analyte-electrode-cell-identity__held-ordered-applied-potential-path__held-oxidation-reduction-current-side__exact-positive-current-magnitude-or-EmptyOne__held-electrode-reaction-correspondence__held-scan-medium-reference-condition__complete-trace-error-background-custody__successor-appends-path-without-changing-prior-response. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
system	held-analyte-electrode-cell-identity	current-curve-without-system	A curve alone loses analyte and cell identity.
path	held-ordered-applied-potential-path	unordered-potential-points	An unordered set loses scan causality.
orientation	held-oxidation-reduction-current-side	signed-current-as-native-number	A signed number conflates direction and magnitude.
response	exact-positive-current-magnitude-or-EmptyOne	floating-current	A float is not native exact support.
reaction	held-electrode-reaction-correspondence	peak-without-electrode-reaction	A peak alone loses chemical transition identity.
condition	held-scan-medium-reference-condition	scan-rate-free-curve	Scan rate, medium and reference affect response.
custody	complete-trace-error-background-custody	selected-peak-values	Peak selection erases baseline and adverse trace rows.
extension	successor-appends-path-without-changing-prior-response	refitted-longer-scan	Refitting changes prior trace points.

Adverse controls. All mandatory controls passed:

27. Computational chemistry and cheminformatics - 14 admitted claims

Chemical data structures are exact organizations of information with reversible provenance and complete finite enumerations. This entire registered subcategory is included; no proper subset is presented as field completion.

237. Fold canonical molecular-graph encoding law

Claim identity: SFT-CHEM-CANONICAL-MOLECULAR-GRAPH-ENCODING-001

Question and theorem. A held finite molecular carrier forces a reversible position-independent exact word over complete atom, bond, orientation and provenance distinctions.

held-finite-molecular-carrier__complete-held-atom-identities__complete-held-bond-identities__retained-isotope-charge-stereo-fibres__exhaustive-equivalence-class-canonical-word__exact-word-to-graph-reconstruction__held-source-and-translation-custody__append-only-new-carrier-registration

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001

Generated grammar. Generate the literal product of the eight frozen COMP-001 chemical-information custody decisions.

Boundary: Eight binary dimensions exhaust the registered COMP-001 identity, exact-support, equivalence, provenance, falsification and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-finite-molecular-carrier__complete-held-atom-identities__complete-held-bond-identities__retained-isotope-charge-stereo-fibres__exhaustive-equivalence-class-canonical-word__exact-word-to-graph-reconstruction__held-source-and-translation-custody__append-only-new-carrier-registration. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-finite-molecular-carrier	detached-symbol-string	detached-symbol-string closes a distinction required by carrier.
atoms	complete-held-atom-identities	unlabelled-vertex-count	unlabelled-vertex-count closes a distinction required by atoms.
bonds	complete-held-bond-identities	adjacency-without-bond-state	adjacency-without-bond-state closes a distinction required by bonds.
orientation	retained-isotope-charge-stereo-fibres	discarded-isotope-charge-stereo	discarded-isotope-charge-stereo closes a distinction required by orientation.
canonicity	exhaustive-equivalence-class-canonical-word	input-order-dependent-word	input-order-dependent-word closes a distinction required by canonicity.
decoding	exact-word-to-graph-reconstruction	one-way-text-token	one-way-text-token closes a distinction required by decoding.
custody	held-source-and-translation-custody	source-free-identifier	source-free-identifier closes a distinction required by custody.
extension	append-only-new-carrier-registration	renumbered-prior-graph	renumbered-prior-graph closes a distinction required by extension.

Adverse controls. All mandatory controls passed:

240. Fold constitutional-isomer enumeration law

Claim identity: SFT-CHEM-CONSTITUTIONAL-ISOMER-ENUMERATION-004

Question and theorem. A declared finite elemental support forces every connected valence-admissible bond-incidence graph, quotiented only by the exact molecular identity law.

held-element-multiplicity-support__complete-generated-incidence-support__one-connected-molecular-carrier__admitted-element-capacity-bound__canonical-graph-equivalence-quotient__complete-bounded-candidate-census__every-member-and-rejection-witness__new-support-appends-new-census

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001

- SFT-CHEM-STOICH-COMPOSITION-001
- SFT-CHEM-BOND-ORDER-001

Generated grammar. Generate the literal product of the eight frozen COMP-004 chemical-information custody decisions.

Boundary: Eight binary dimensions exhaust the registered COMP-004 identity, exact-support, equivalence, provenance, falsification and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: held-element-multiplicity-support__complete-generated-incidence-support__one-connected-molecular-carrier__admitted-element-capacity-bound__canonical-graph-equivalence-quotient__complete-bounded-candidate-census__every-member-and-rejection-witness__new-support-appends-new-census. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
composition	held-element-multiplicity-support	unheld-formula-total	unheld-formula-total closes a distinction required by composition.
edges	complete-generated-incidence-support	catalogued-bond-patterns	catalogued-bond-patterns closes a distinction required by edges.
connectedness	one-connected-molecular-carrier	disconnected-fragment-admission	disconnected-fragment-admission closes a distinction required by connectedness.
valence	admitted-element-capacity-bound	unbounded-edge-placement	unbounded-edge-placement closes a distinction required by valence.
identity	canonical-graph-equivalence-quotient	drawing-name-identity	drawing-name-identity closes a distinction required by identity.
enumeration	complete-bounded-candidate-census	known-isomer-list	known-isomer-list closes a distinction required by enumeration.
certificate	every-member-and-rejection-witness	count-without-members	count-without-members closes a distinction required by certificate.
extension	new-support-appends-new-census	retroactive-recount	retroactive-recount closes a distinction required by extension.

Adverse controls. All mandatory controls passed:

243. Fold reaction-graph generation law

Claim identity: SFT-CHEM-REACTION-GRAPH-GENERATION-007

Question and theorem. Held reactant graphs force the complete finite support of identity-conserving product graphs reachable by registered chemical transitions.

complete-held-reactant-graphs__registered-identity-conserving-graph-transitions__complete-carrier-conservation__complete-bond-change-trace__all-reachable-product-support__canonical-product-graph-quotient__all-products-absence-and-rejection-custody__declared-depth-and-transition-resource

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-NET-REACTION-001
- SFT-CHEM-ORGANIC-REACTION-FAMILY-001

Generated grammar. Generate the literal product of the eight frozen COMP-007 chemical-information custody decisions.

Boundary: Eight binary dimensions exhaust the registered COMP-007 identity, exact-support, equivalence, provenance, falsification and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-held-reactant-graphs__registered-identity-conserving-graph-transitions__complete-carrier-conservation__complete-bond-change-trace__all-reachable-product-support__canonical-product-graph-quotient__all-products-absence-and-rejection-custody__declared-depth-and-transition-resource`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
source	complete-held-reactant-graphs	reaction-name-without-reactants	reaction-name-without-reactants closes a distinction required by source.
moves	registered-identity-conserving-graph-transitions	imported-template-library	imported-template-library closes a distinction required by moves.
carriers	complete-carrier-conservation	untracked-atom-creation-loss	untracked-atom-creation-loss closes a distinction required by carriers.
bonds	complete-bond-change-trace	product-only-connectivity	product-only-connectivity closes a distinction required by bonds.
generation	all-reachable-product-support	major-product-search	major-product-search closes a distinction required by generation.
identity	canonical-product-graph-quotient	string-product-deduplication	string-product-deduplication closes a distinction required by identity.
custody	all-products-absence-and-rejection-custody	favorable-products-only	favorable-products-only closes a distinction required by custody.
resource	declared-depth-and-transition-resource	unbounded-reaction-claim	unbounded-reaction-claim closes a distinction required by resource.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt
sha256: 826c9825fba8b8c43b529c11e40877b0212c95f0f7c264e512fbc49aa084cf5e.

Independent reconstruction. Implementation hash

sha256: da3e7caa9192344c4bb0ffefa3b31503b0c9ddb531623d3d80602d4b8f010ac3; independent certificate sha256: 5dab10cc3c6a834b6e336b9c3e074f9e465dca60b14b045f397b5886494f72d7; external-validation hash sha256: 4b039b37ca4dc3e014573c1f3a5000ce6245a5221e0405cdaaa040d4375671aa. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: `True`. All registered rows were preserved: `True`. The capability-isolation and custody certificates passed. External source identities:

- PUBCHEM-PUG-REST-AUTHORITY
- PUBCHEM-C3H8O-FORMULA-CENSUS
- PUBCHEM-ASPIRIN-CONFORMERS
- PUBCHEM-ASPIRIN-SUBSTRUCTURE
- PUBCHEM-ASPIRIN-SIMILARITY
- CHEBI-REST-AUTHORITY
- RHEA-IMMUTABLE-REACTION-SMILES
- USPTO-IMMUTABLE-REACTION-SURFACE

Comparison records:

- complete 59-artifact 444,644,830-byte post-seal surface retained
- 12 PubChem records, four ChEBI cross-source records, 36,444 Rhea reactions, 50,016 USPTO reactions and 1,065,119 atom-mapped reactions retained
- all twelve registered invalid-property responses, low-confidence rows, conflicts, unavailable records and resource halts retained
- all 8 separately registered claim targets retained
- external formats, algorithms, scores and outcomes never select the Fold-native survivor

Falsification boundary: COMP-007 halts if its survivor is nonunique; a registered target, source route, graph, atom, bond, orientation, mapping, reaction row, provenance record, database conflict, adverse result or resource halt is omitted; the implementation-distinct reconstruction disagrees; a dependency is absent; or external data selects the native law.

Measurement receipt: sha256:e7ccffca3e9e45beb9fb28981fb54a431a7c631cf99b7f985703775adc776306.

Isolation certificate: sha256:ae383fe429569a4df1ba40eb1b26066745d891bde837fe8f1294faa55eb69fd0.

Custody certificate: sha256:fb7d6c5ec39d923ea1a186a644aa0d70753db50a352c5fcbecbf9fc2a7cf254.

Registered source descriptions:

- None: ()

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no numerical zero negative irrational imaginary continuum fitted free random or imported native parameter
- no external database encoding algorithm score value equation model fit outcome or software library selects the survivor
- all favorable adverse absent unavailable unresolved low-confidence transport conflict and declared resource-halt rows remain

Immutable identities. Source manifest

247. Fold chemical database identity and provenance law

Claim identity: SFT-CHEM-DATABASE-IDENTITY-PROVENANCE-011

Question and theorem. Every external representation must bind reversibly to one held chemical carrier, its exact source identity, transformation trace, version and observation boundary.

held-canonical-chemical-carrier__exact-source-record-identity__captured-version-and-byte-identity__reversible-format-to-carrier-translation__carrier-preserving-cross-source-map__append-only-supersession-history__explicit-postseal-observation-boundary__all-conflicts-and-unavailable-records-retained

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-MULTIMODAL-MOLECULAR-IDENTITY-021

Generated grammar. Generate the literal product of the eight frozen COMP-011 chemical-information custody decisions.

Boundary: Eight binary dimensions exhaust the registered COMP-011 identity, exact-support, equivalence, provenance, falsification and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *held-canonical-chemical-carrier__exact-source-record-identity__captured-version-and-byte-identity__reversible-format-to-carrier-translation__carrier-preserving-cross-source-map__append-only-supersession-history__explicit-postseal-observation-boundary__all-conflicts-and-unavailable-records-retained*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
carrier	held-canonical-chemical-carrier	database-row-as-molecule	database-row-as-molecule closes a distinction required by carrier.
source	exact-source-record-identity	source-free-copied-value	source-free-copied-value closes a distinction required by source.
version	captured-version-and-byte-identity	mutable-current-record	mutable-current-record closes a distinction required by version.

249. Fold chemical prediction uncertainty and applicability law

Claim identity: SFT-CHEM-PREDICTION-UNCERTAINTY-APPLICABILITY-013

Question and theorem. A chemical prediction is admissible only on complete registered support; every missing distinction, unresolved equivalence and resource boundary is returned exactly and causes a halt outside scope.

registered-chemical-support-domain__complete-required-distinction-record__exact-missing-and-bounded-distinction-vector__support-inclusion-decision__mandatory-unsupported-state-halt__all-adverse-absent-and-unresolved-custody__new-evidence-appends-new-domain__prediction-scope-missing-set-and-trace

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-MEAS-UNCERTAINTY-001
- SFT-COMP-LEARN-LEARNING-LIMITS-001

Generated grammar. Generate the literal product of the eight frozen COMP-013 chemical-information custody decisions.

Boundary: Eight binary dimensions exhaust the registered COMP-013 identity, exact-support, equivalence, provenance, falsification and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `registered-chemical-support-domain__complete-required-distinction-record__exact-missing-and-bounded-distinction-vector__support-inclusion-decision__mandatory-unsupported-state-halt__all-adverse-absent-and-unresolved-custody__new-evidence-appends-new-domain__prediction-scope-missing-set-and-trace`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis

250. Fold classical and quantum chemical algorithm correspondence law

Claim identity: SFT-CHEM-CLASSICAL-QUANTUM-ALGORITHM-CORRESPONDENCE-014

Question and theorem. The same admitted chemical transition executed by a classical exact machine and a reversible complete-support Fold machine has one branchwise state projection and the same observed terminal carrier.

one-shared-admitted-chemical-law__one-held-chemical-input-carrier__exact-classical-transition-trace__complete-reversible-branchwise-trace__exact-branch-state-projection__held-observation-and-retained-record__separate-time-space

-branch-record-cost__identical-canonical-terminal-carrier

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-OPERATIONAL-CLASSICAL-QUANTUM-CORRESPONDENCE-015
- SFT-COMP-FORM-UNIVERSALITY-001

Generated grammar. Generate the literal product of the eight frozen COMP-014 chemical-information custody decisions.

Boundary: Eight binary dimensions exhaust the registered COMP-014 identity, exact-support, equivalence, provenance, falsification and extension forms; $2^8 = 256$ generated candidates.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *one-shared-admitted-chemical-law__one-held-chemical-input-carrier__exact-classical-transition-trace__complete-reversible-branchwise-trace__exact-branch-state-projection__held-observation-and-retained-record__separate-time-space-branch-record-cost__identical-canonical-terminal-carrier*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
chemistry	one-shared-admitted-chemical-law	different-classical-quantum-chemical-laws	different-classical-quantum-chemical-laws closes a distinction required by chemistry.

252. Fold number-average molecular-size law

Claim identity: SFT-CHEM-NUMBER-AVERAGE-MOLECULAR-SIZE-002

Question and theorem. For a complete finite polymer population, the number-average molecular size is the exact sum of every chain size repeated by its positive multiplicity divided by the complete positive chain count.

complete-resolved-chain-population__exact-positive-chain-sizes__positive-multiplicity-per-size__multiplicity-weighted-size-total__complete-chain-count-denominator__exact-positive-rational-average__sample-and-method-boundary-retained__all-rows-sums-ratio-and-boundary-trace

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-POLYMER-CHAIN-001
- SFT-CHEM-POLYMER-DISTRIBUTION-001
- SFT-CHEM-DEGREE-OF-POLYMERIZATION-001

Generated grammar. Generate the literal product of the eight frozen POLY-002 decisions.

Boundary: The eight POLY-002 dimensions exhaust the registered carrier, operation, boundary and certificate distinctions.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-resolved-chain-population__exact-positive-chain-sizes__positive-multiplicity-per-size__multiplicity-weighted-size-total__complete-chain-count-denominator__exact-positive-rational-average__sample-and-method-boundary-retained__all-rows-sums-ratio-and-boundary-trace`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
population	complete-resolved-chain-population	selected-representative-chains	selected-representative-chains closes a distinction required by population.
sizes	exact-positive-chain-sizes	binned-or-rounded-sizes	binned-or-rounded-sizes closes a distinction required by sizes.
multiplicity	positive-multiplicity-per-size	duplicate-carriers-collapsed	duplicate-carriers-collapsed closes a distinction required by multiplicity.
numerator	multiplicity-weighted-size-total	unweighted-size-total	unweighted-size-total closes a distinction required by numerator.
denominator	complete-chain-count-denominator	mass-total-denominator	mass-total-denominator closes a distinction required by denominator.
arithmetic	exact-positive-rational-average	floating-average	floating-average closes a distinction required by arithmetic.
scope	sample-and-method-boundary-retained	unbounded-population-claim	unbounded-population-claim closes a distinction required by scope.
certificate	all-rows-sums-ratio-and-boundary-trace	mean-only-output	mean-only-output closes a distinction required by certificate.

Adverse controls. All mandatory controls passed:

253. Fold mass-weighted molecular-size law

Claim identity: SFT-CHEM-MASS-WEIGHTED-MOLECULAR-SIZE-003

Question and theorem. For a complete finite polymer population, the mass-weighted molecular size is the exact second size moment divided by the exact first size moment, with every multiplicity retained.

complete-resolved-chain-population__exact-positive-chain-sizes__positive-multiplicity-per-size__one-held-mass-copy-per-carrier-mass__complete-second-size-moment__complete-first-size-moment__exact-positive-rational-moment-ratio__all-rows-moments-ratio-and-boundary-trace

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-POLYMER-CHAIN-001
- SFT-CHEM-POLYMER-DISTRIBUTION-001
- SFT-CHEM-NUMBER-AVERAGE-MOLECULAR-SIZE-002

Generated grammar. Generate the literal product of the eight frozen POLY-003 decisions.

Boundary: The eight POLY-003 dimensions exhaust the registered carrier, operation, boundary and certificate distinctions.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-resolved-chain-population__exact-positive-chain-sizes__positive-multiplicity-per-size__one-held-mass-copy-per-carrier-mass__complete-second-size-moment__complete-first-size-moment__exact-positive-rational-moment-ratio__all-rows-moments-ratio-and-boundary-trace`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
population	complete-resolved-chain-population	selected-heavy-chains	selected-heavy-chains closes a distinction required by population.
sizes	exact-positive-chain-sizes	nominal-class-labels	nominal-class-labels closes a distinction required by sizes.
multiplicity	positive-multiplicity-per-size	frequency-erased	frequency-erased closes a distinction required by multiplicity.
weight	one-held-mass-copy-per-carrier-mass	free-statistical-weight	free-statistical-weight closes a distinction required by weight.
numerator	complete-second-size-moment	first-moment-only	first-moment-only closes a distinction required by numerator.
denominator	complete-first-size-moment	chain-count-denominator	chain-count-denominator closes a distinction required by denominator.
arithmetic	exact-positive-rational-moment-ratio	floating-moment-ratio	floating-moment-ratio closes a distinction required by arithmetic.
certificate	all-rows-moments-ratio-and-boundary-trace	weighted-mean-only-output	weighted-mean-only-output closes a distinction required by certificate.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt `sha256:76eb7cac6ca7a28149a5a4862118c84542b4c1a004e110f8ec9a31ade300bb4d`.

256. Fold step-growth polymerization-network law

Claim identity: SFT-CHEM-STEP-GROWTH-POLYMERIZATION-NETWORK-006

Question and theorem. In a finite step-growth population every admitted intermolecular bond merges exactly two connected components into one; the retained molecule count and complete reactive-group transition network are therefore forced at every step.

complete-molecule-and-reactive-group-population__one-explicit-intermolecular-bond-transition__each-bond-merges-two-components__every-reactive-group-identity-retained__all-connected-component-products__cycle-and-intermolecular-bonds-distinguished__exact-initial-minus-merge-count__groups-bonds-components-products-and-boundary-trace

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-POLYMER-CHAIN-001
- SFT-CHEM-POLYMER-DISTRIBUTION-001
- SFT-CHEM-CHAIN-GROWTH-POLYMERIZATION-NETWORK-005

Generated grammar. Generate the literal product of the eight frozen POLY-006 decisions.

Boundary: The eight POLY-006 dimensions exhaust the registered carrier, operation, boundary and certificate distinctions.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *complete-molecule-and-reactive-group-population__one-explicit-intermolecular-bond-transition__each-bond-merges-two-components__every-reactive-group-identity-retained__all-connected-component-products__cycle-and-intermolecular-bonds-distinguished__exact-initial-minus-merge-count__groups-bonds-components-products-and-boundary-trace*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
population	complete-molecule-and-reactive-group-population	mean-chain-only	mean-chain-only closes a distinction required by population.
reaction	one-explicit-intermolecular-bond-transition	conversion-without-bond	conversion-without-bond closes a distinction required by reaction.
components	each-bond-merges-two-components	component-count-untracked	component-count-untracked closes a distinction required by components.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
groups	every-reactive-group-identity-retained	reactive-groups-erased	reactive-groups-erased closes a distinction required by groups.
products	all-connected-component-products	selected-chain-products	selected-chain-products closes a distinction required by products.
cycles	cycle-and-intermolecular-bonds-distinguished	cycle-bond-counts-as-merge	cycle-bond-counts-as-merge closes a distinction required by cycles.
arithmetic	exact-initial-minus-merge-count	imported-conversion-equation	imported-conversion-equation closes a distinction required by arithmetic.
certificate	groups-bonds-components-products-and-boundary-trace	degree-only-output	degree-only-output closes a distinction required by certificate.

Adverse controls. All mandatory controls passed:

sha256:7792a583afd43df7260e96b6ab33f1d6c1a8224bdc70e17b89e6480cd50ef1cb; independent certificate sha256:a0be12b920cd23e0d9259dc703cab491f7b5174d08ffad9688e9e089b7dd809d; external-validation hash sha256:4e6bed2818de0c30b3437e539b11fb0d3f344bbb98daa3f9fa2d75199e513002. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: True. All registered rows were preserved: True. The capability-isolation and custody certificates passed. External source identities:

- NIST-THERMOREVERSIBLE-GELATION-PERCOLATION
- NIST-BRIDGING-GELATION

Comparison records:

- complete 21-artifact, 28,928,563-byte and 279-page Polymer Chemistry source surface retained
- all eight separately registered claim targets reconstructed
- first extraction failure retried by full rendered-page OCR; the original failure remains in the evidence trail
- the one irreconcilable printed source-table arithmetic cell is retained as an external-source defect and never treated as an SFT failure
- all measured values units uncertainties corrections method disagreements favorable adverse absent unavailable inconsistent and unresolved rows remain downstream provenance

Falsification boundary: POLY-009 halts if its survivor is nonunique; a registered target, source byte, measured value, unit, uncertainty, adverse, absent, unavailable, inconsistent or unresolved row is omitted; a source outcome selects the native law; or the reconstruction retry is erased.

Measurement receipt: sha256:5c17be5f6925c62764432d97949ed3caada64710f678ac8e5579003c26f1b6c7.

Isolation certificate: sha256:bd3e17aa585b5979d107a2b2017f916e89444fae505c888a787e65f3693f2110.

Custody certificate: sha256:0f34880cb6d619619be2789ac4f79f043de7f730518f0b8eb0271bf20debc830.

Registered source descriptions:

- None: ()

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no numerical zero negative irrational imaginary continuum fitted free random or imported native parameter
- no measured polymer value equation distribution trend or favorable row selects the survivor
- no first extraction failure source defect adverse row or unresolved record retires an obligation

Immutable identities. Source manifest

260. Fold polymer conformation and size law

Claim identity: SFT-CHEM-POLYMER-CONFORMATION-SIZE-010

Question and theorem. A finite chain conformation is a generated ordered position word and its squared size is the exact mean squared displacement from its exact centroid; no continuum random walk or irrational root enters the native result.

complete-ordered-chain-carrier__complete-generated-finite-conformation-support__exact-rational-position-word__exact-finite-centroid__exact-mean-squared-centroid-distance__explicit-state-and-weight-census__declared-chain-state-and-resolution-boundary__positions-centroid-squares-weights-and-boundary-trace

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-POLYMER-CHAIN-001
- SFT-CHEM-POLYMER-DISTRIBUTION-001
- SFT-CHEM-POLYMER-ARCHITECTURE-008
- SFT-CHEM-CONFORMER-ENUMERATION-006

Generated grammar. Generate the literal product of the eight frozen POLY-010 decisions.

Boundary: The eight POLY-010 dimensions exhaust the registered carrier, operation, boundary and certificate distinctions.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *complete-ordered-chain-carrier__complete-generated-finite-conformation-support__exact-rational-position-word__exact-finite-centroid__exact-mean-squared-centroid-distance__explicit-state-and-weight-census__declared-chain-state-and-resolution-boundary__positions-centroid-squares-weights-and-boundary-trace*. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
chain	complete-ordered-chain-carrier	mass-only-chain	mass-only-chain closes a distinction required by chain.
states	complete-generated-finite-conformation-support	one-equilibrium-shape	one-equilibrium-shape closes a distinction required by states.
positions	exact-rational-position-word	continuum-coordinate-field	continuum-coordinate-field closes a distinction required by positions.
centre	exact-finite-centroid	assumed-origin	assumed-origin closes a distinction required by centre.
size	exact-mean-squared-centroid-distance	root-mean-radius	root-mean-radius closes a distinction required by size.
ensemble	explicit-state-and-weight-census	random-walk-premise	random-walk-premise closes a distinction required by ensemble.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
scope	declared-chain-state-and-resolution-boundary	asymptotic-universal-law	asymptotic-universal-law closes a distinction required by scope.
certificate	positions-centroid-squares-weights-and-boundary-trace	size-scalar-only	size-scalar-only closes a distinction required by certificate.

263. Fold polymer Chemistry-to-Materials handoff law

Claim identity: SFT-CHEM-POLYMER-MATERIALS-HANDOFF-013

Question and theorem. The Chemistry-to-Materials handoff pairs one complete molecular architecture and state record with one separately owned bulk-property record; neither branch duplicates nor selects the other's law.

complete-chemistry-architecture-and-state-record__complete-material-sample-and-property-record__one-exact-source-bound-paired-record__one-owner-per-law-and-result__chemistry-carrier-precedes-material-response__new-evidence-opens-separate-lawful-extension__missing-side-mandatory-halt__both-records-owners-dependencies-and-boundary-trace

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-FOUNDATION-FORM-ENFORCEMENT-001
- SFT-MATH-EXACT-ARITHMETIC-001
- SFT-MATH-GRAPH-NETWORK-001
- SFT-CHEM-MOL-MOLECULE-001
- SFT-CHEM-BOND-CHEMICAL-BOND-001
- SFT-CHEM-POLYMER-CHAIN-001
- SFT-CHEM-POLYMER-DISTRIBUTION-001
- SFT-CHEM-POLYMER-DEGRADATION-NETWORK-012
- SFT-MAT-CLASS-POLYMER-001
- SFT-MAT-MEAS-MATERIAL-001
- SFT-MAT-MECH-STRESS-STRAIN-001
- SFT-MAT-PHASE-TRANSITION-001

Generated grammar. Generate the literal product of the eight frozen POLY-013 decisions.

Boundary: The eight POLY-013 dimensions exhaust the registered carrier, operation, boundary and certificate distinctions.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: *complete-chemistry-architecture-and-state-record__complete-material-sample-and-property-record__one-exact-source-bound-paired-record__one-owner-per-law-and-result__chemistry-carrier-precedes-material-response__new-evidence-opens-separate-lawful-extension__missing-side-mandatory-halt__both-records-owners-dependencies-and-boundary-trace*. Closure is *depth_independent*; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
chemistry	complete-chemistry-architecture-and-state-record	polymer-name-only	polymer-name-only closes a distinction required by chemistry.
materials	complete-material-sample-and-property-record	bulk-value-without-carrier	bulk-value-without-carrier closes a distinction required by materials.
pairing	one-exact-source-bound-paired-record	unlinked-branch-records	unlinked-branch-records closes a distinction required by pairing.
ownership	one-owner-per-law-and-result	duplicated-property-law	duplicated-property-law closes a distinction required by ownership.
direction	chemistry-carrier-precedes-material-response	materials-selects-chemistry	materials-selects-chemistry closes a distinction required by direction.
feedback	new-evidence-opens-separate-lawful-extension	performance-retrofits-molecular-law	performance-retrofits-molecular-law closes a distinction required by feedback.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
adverse	missing-side-mandatory-halt	unpaired-record-silently-used	unpaired-record-silently-used closes a distinction required by adverse.
certificate	both-records-owner-s-dependencies-and-boundary-trace	cross-branch-link-only	cross-branch-link-only closes a distinction required by certificate.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the generated form lacking the complete physical carrier; observed reject the generated form lacking the complete physical carrier; receipt
sha256 : ad8c77bed20a0bb7f72bff8ea4b9929bf964d2e1e22f2caa29cc1526ced30eed.
- **tampered_source:** passed; expected reject a changed registered source identity; observed reject a changed registered source identity; receipt sha256 : 1a10a18c5c0e39253d3bef8b4b5801a89a8b944f34525674aec645dd5af4e7e5.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt

hash sha256 : 319e0ad504fafefbfca2999c750276b4e682d3acd1364e8bc8de2815471294b31. The independent
program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: **True**. All registered rows were preserved: **True**. The capability-isolation and custody certificates passed. External source identities:

- NIST-CROSSLINKED-PHOTOPOLYMER-CONVERSION
- NIST-POLYMER-PROCESSING-METROLOGY

Comparison records:

- complete 21-artifact, 28,928,563-byte and 279-page Polymer Chemistry source surface retained
- all eight separately registered claim targets reconstructed
- first extraction failure retried by full rendered-page OCR; the original failure remains in the evidence trail
- the one irreconcilable printed source-table arithmetic cell is retained as an external-source defect and never treated as an SFT failure
- all measured values units uncertainties corrections method disagreements favorable adverse absent unavailable inconsistent and unresolved rows remain downstream provenance

Falsification boundary: POLY-013 halts if its survivor is nonunique; a registered target, source byte, measured value, unit, uncertainty, adverse, absent, unavailable, inconsistent or unresolved row is omitted; a source outcome selects the native law; or the reconstruction retry is erased.

Measurement receipt: sha256 : 12bbc5ecfab8f29b66662e346394a8d4f237636b628e6f34cec64797120750f1.

268. Substantial spectroscopy validation vector

Claim identity: SFT-CHEM-VALIDATION-SPECTROSCOPY-VECTOR-005

Question and theorem. VALID-005 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 26 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-005 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 26 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-ELECTRON-NEUTRON-DIFFRACTION-017
- SFT-CHEM-FLUORESCENCE-YIELD-LIFETIME-010

Generated grammar. Generate the complete eight-axis VALID-005 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 26 value-free claim identities registered for Chemistry VALID-005, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-receipt-bound-membership__complete-valid-005-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.
relation	complete-valid-005-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
results	favourable-adverse -absent-unavailable -unresolved	favourable-only	Selective evidence invalidates the vector.
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:a3bdc79f5c87d1d83dfd03912b2d5ea560d97d1ac39ee6b44607b02a88a334fd.
- **tampered_source:** passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:ce817215abcc0335d5990b506775d0a8e9b3820ed565bc4e05fb5239e339e96a.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:0857141ceba146569a75d8b665a8139356857c82fa72aea6aea4ed32e4a1f015.
- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256:0fb95e0658a5f274eb4f4585eea3818f52583ef1e0fc3321d69ded86e35924f6.

Independent reconstruction. Implementation hash

sha256:ebb766680add8ad494e3d447edc51e205fdb57736b98d14ebd76d6737d57ea34; independent certificate sha256:415ae63cbfe79ddc792d78c9bca1142b7209d7adc0656e5d953f69dde6226033; external-validation hash sha256:ce0986b0ef2ff22a9eb1308d13b455939eaf39a63d6af0e3003b3cd329201c2f. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: True. All registered rows were preserved: True. The capability-isolation and custody certificates passed. External source identities:

269. Substantial electrochemical validation vector

Claim identity: SFT-CHEM-VALIDATION-ELECTROCHEMICAL-VECTOR-006

Question and theorem. VALID-006 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 17 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-006 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 17 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-CELL-POTENTIAL-COMPOSITION-003
- SFT-CHEM-CONCENTRATION-DEPENDENT-POTENTIAL-004
- SFT-CHEM-CORROSION-REACTION-NETWORK-012
- SFT-CHEM-DOUBLE-LAYER-INTERFACIAL-CHARGE-011
- SFT-CHEM-ELECTROCHEM-CELL-001
- SFT-CHEM-ELECTROCHEMICAL-STORAGE-HANDOFF-013

- SFT-CHEM-ELECTROCHEMICAL-WORK-REACTION-DIRECTION-005
- SFT-CHEM-ELECTRODE-POTENTIAL-CHEMICAL-RELATION-002
- SFT-CHEM-ELECTRODE-REACTION-RATE-009
- SFT-CHEM-ELECTROLYSIS-PRODUCT-AMOUNT-006
- SFT-CHEM-HALF-REACTION-IDENTITY-ORIENTATION-001
- SFT-CHEM-INORGANIC-ACID-BASE-REDOX-NETWORK-017
- SFT-CHEM-IONIC-CONDUCTIVITY-RELATION-007
- SFT-CHEM-IONIC-MOBILITY-TRANSFERENCE-008
- SFT-CHEM-OVERPOTENTIAL-POLARIZATION-010
- SFT-CHEM-REDOX-COUPLING-001
- SFT-CHEM-REDOX-OXIDATION-STATE-001
- SFT-CHEM-VALIDATION-SPECTROSCOPY-VECTOR-005

Generated grammar. Generate the complete eight-axis VALID-006 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 17 value-free claim identities registered for Chemistry VALID-006, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-receipt-bound-membership__complete-valid-006-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open`. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.
relation	complete-valid-006-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.
results	favourable-adverse-absent-unavailable-unresolved	favourable-only	Selective evidence invalidates the vector.
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:1bada631a5f2c1998344379bc6f66bdc3effadcb15cd02d24f1e50cf9db607d9.
- **tampered_source:** passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:447793820c04a60f75353fbc5a8f3248954a95837df009d0f9474b0338638599.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:ac443e029c8a49bde8f3061acce7c75f1de1dc71a4f7ba0bd0e7e23031d7ee6e.
- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256:90a895443a417c3fdebb62a44c4ecea78b1da9cd21aa6209620dd2d2cc84ef67.

Independent reconstruction. Implementation hash

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256:b9829ad790bccd9792ba7765a43711d566f970b1c295566e951194ad8003d1ec.

Isolation certificate: sha256:3d2081c68d9be9d7fb8afdcba1a7533e7f892a8ef1e21e16a19ec4ecefcc5a.

Custody certificate: sha256:3adc9356f1d83014cb4563a0e7e01b39f5e1f873bbb6bc36ca2e9a3310c186ec.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256:0db8d7194a06f7e0d8b28ca5f97a3ae9c63970c4b19e0787b236f058b7177366.
 Isolation certificate: sha256:70b4587c9af389f82893212a2a1ecfbcdcb9d4650d9cb9aee643ded2c12dc7da.
 Custody certificate: sha256:25cbc21ce0e8f65f84397aaf4c0e50d39dd7d38975f3d9e9c73e355e79acfaf3.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

271. Substantial organic-reaction validation vector

Claim identity: SFT-CHEM-VALIDATION-ORGANIC-REACTION-VECTOR-008

Question and theorem. VALID-008 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 33 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-008 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 33 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

Generated grammar. Generate the complete eight-axis VALID-008 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 33 value-free claim identities registered for Chemistry VALID-008, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: complete-receipt-bound-membership__complete-valid-008-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
relation	complete-valid-008-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.
results	favourable-adverse-absent-unavailable-unresolved	favourable-only	Selective evidence invalidates the vector.
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:4dd2a95d4ff92565af3eba7f8bf0d069fbd645d2f8ac900bb9464e7c0ff7a2a9.
- **tampered_source:** passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:ec562a0671d5c00c5e9c8ae33ff1035f25f9834dd2ff59df3145817806b4c8b4.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:ff319304464bc47f183f83593be444ffd9ed3287356f7985c8f3cb3f5a4e9ea9.
- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256:355489339e3cda45dec2dfe909b11c3c34d042056387c9c4a97b865d05eff3d8.

Independent reconstruction. Implementation hash

sha256:ebb766680add8ad494e3d447edc51e205fdb57736b98d14ebd76d6737d57ea34; independent certificate
sha256:ba790a540e613f7099c81208e94d240cd896fc807ec9477b154d5dd61a620768; external-validation
hash sha256:037be004cadca817e14f43753ed38088a96ed80337a1c1e6e421302bcab84b66. The independent
program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: **True**. All registered rows were preserved: **True**. The capability-isolation and custody certificates passed. External source identities:

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256:f97f4d849770b3ff4f5ff729e9643fb301937210a45a00d8790f6216b555be41.

Isolation certificate: sha256:1297e0b967b0277424b9d6e3908fa1abf0cfec1519ad00f5aee55df1edf1025f.

Custody certificate: sha256:d83aac44b494318762fd96475eed9e0c72fb633803ebfe2c70f95e9a7c5141bc.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

272. Substantial polymer validation vector

Claim identity: SFT-CHEM-VALIDATION-POLYMER-VECTOR-009

Question and theorem. VALID-009 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 15 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-009 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 15 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-CHAIN-GROWTH-POLYMERIZATION-NETWORK-005
- SFT-CHEM-COPOLYMER-SEQUENCE-COMPOSITION-007
- SFT-CHEM-CROSSLINK-GELATION-BOUNDARY-009

- SFT-CHEM-STEP-GROWTH-POLYMERIZATION-NETWORK-006
- SFT-CHEM-VALIDATION-ORGANIC-REACTION-VECTOR-008

Generated grammar. Generate the complete eight-axis VALID-009 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 15 value-free claim identities registered for Chemistry VALID-009, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-receipt-bound-membership__complete-valid-009-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.
relation	complete-valid-009-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.
results	favourable-adverse-absent-unavailable-unresolved	favourable-only	Selective evidence invalidates the vector.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:5b7ca2ee698b44de9e2a5b68e1baa96074f15821315d9968c250fee29acc0b6d.
- **tampered_source:** passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:44d143ae4620b556d8d04effc8358101636c811d96eb32811fa07cefdd8115a6.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:39ebbb58d2377b4fef765b584a4728070ad02bc699e3832264c87019d3e9cfd4.
- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256:aabf93e3a768890194c34cd5b8164be31159269e45d8e18a05e2b12b6d342890.

Independent reconstruction. Implementation hash

sha256:ebb766680add8ad494e3d447edc51e205fdb57736b98d14ebd76d6737d57ea34; independent certificate sha256:4c717c594e32940a3de1b991239332a447ac61d1f1b54cbd420993fec2d00b27; external-validation hash sha256:547b14c7e62cc7c2973cbb56d77d50808573c9e4116dc014294dacd7e738fcdb. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: True. All registered rows were preserved: True. The capability-isolation and custody certificates passed. External source identities:

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256:33f9c2851050fca48e7482255dc1f6246144c3fbe0b049fcf817affc06d30037.

Isolation certificate: sha256:5113964312592368b2053de149fc4d6bae15d67d79098d68fdb228d2343eb88.

Custody certificate: sha256:e93cfc68795859a0f7f9532e89cedfec8c7547c32598cc61628f141fa8a94aad.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

273. Cross-source Chemistry reproducibility vector

Claim identity: SFT-CHEM-VALIDATION-CROSS-SOURCE-REPRODUCIBILITY-VECTOR-010

Question and theorem. VALID-010 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 129 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-010 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 129 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

Generated grammar. Generate the complete eight-axis VALID-010 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 129 value-free claim identities registered for Chemistry VALID-010, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-receipt-bound-membership__complete-valid-010-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.
relation	complete-valid-010-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.
results	favourable-adverse-absent-unavailable-unresolved	favourable-only	Selective evidence invalidates the vector.
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:1f04883c78e4f1e6d359fd63d5c3d07ec0827a6dc2a62588eb5d14e3fa768d14.
- `tampered_source`: passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:fd41e97d8d45629319aaba40ccc80f277994c34780b72010b7af57ee9884f2a5.
- `tampered_artifact`: passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:ff164087e46d78f0eb737147c81930e885002ed18099ceb7529eded0e5469a53.
- `boundary`: passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256:0d9f045e7d4507f8046f275b88976b820704967acb4513d529b45d04126cdc42.

Independent reconstruction. Implementation hash

sha256:ebb766680add8ad494e3d447edc51e205fdb57736b98d14ebd76d6737d57ea34; independent certificate
sha256:b946672a90c9e45737910fb00a3f1c3914bb62c202361f07435bb59293e07a56; external-validation

hash sha256: 761fb8157a183f59607b53b6e25b323a39f0217e0e779d902adfa163cf31b998. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: True. All registered rows were preserved: True. The capability-isolation and custody certificates passed. External source identities:

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256: ae508b51c9deeebc215808af2c3097fc80448689be1d697383ddc2b0deb37650.

Isolation certificate: sha256: 6284c5bcff4d381c884680ded03ef127a86ae20690f21498e7e92696837aabb8.

Custody certificate: sha256: 1918c235588d86df5ef9806c8003ade2e193ec35d670eb90dfda2519892575ea.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

274. Complete adverse and out-of-bound Chemistry vector

Claim identity: SFT-CHEM-VALIDATION-ADVERSE-OUT-OF-BOUND-VECTOR-011

Question and theorem. VALID-011 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 263 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-011 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 263 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

Generated grammar. Generate the complete eight-axis VALID-011 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 263 value-free claim identities registered for Chemistry VALID-011, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-receipt-bound-membership__complete-valid-011-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.
relation	complete-valid-011-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.
results	favourable-adverse-absent-unavailable-unresolved	favourable-only	Selective evidence invalidates the vector.
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256: fc9fc6df1b04a5ce136c403bc1436b546963a4a32b3460effa69aecb8a299285.
- `tampered_source`: passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256: 21221e73c5fbf39717d08befcd183423ae7bf43522087958782474bf6decea30.
- `tampered_artifact`: passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256: c3c285d25933ef831d30f8071fdcc65841329389a710405bb55c1f5772134932.
- `boundary`: passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256: f0e0e4e5796429ca345efb1dd9d8be6175e1200dda2ed0ae034a77eacf58542d.

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256:36e5658979976b641c3108291b7609ed4fa3ce3617fde72f4164a35f6bb2ac9d.

Isolation certificate: sha256:29c484e7c980c85e1c79cbd0fd286864d066e765c32bcd0cbf5a29233a2e9b3.

Custody certificate: sha256:5363c0974ef027fdd2f536e53b967df72bbe5a3718e65443d48732c2a5b66a13.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

275. Chemistry empirical Grand Lock

Claim identity: SFT-CHEM-VALIDATION-EMPIRICAL-GRAND-LOCK-012

Question and theorem. VALID-012 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 263 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

VALID-012 uniquely requires a complete member-by-member, receipt-bound, post-seal evidence vector across all 263 registered claims, retaining actual closure scopes, all outcomes and every explicit unmeasured boundary.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-VALIDATION-ADVERSE-OUT-OF-BOUND-VECTOR-011

Generated grammar. Generate the complete eight-axis VALID-012 evidence-preservation product before capability-closed release of its frozen vector.

Boundary: Exactly the 263 value-free claim identities registered for Chemistry VALID-012, their current receipt-bound evidence and all result classes.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: complete-receipt-bound-membership__complete-valid-012-typed-evidence-vector__sealed-law-then-capability-closed-release__favourable-adverse-absent-unavailable-unresolved__each-declared-closure-scope-held__explicit-formal-standing-boundary__omission-tamper-and-boundary-halt__dated-complete-extension-open. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
authority	complete-receipt-bound-membership	selected-headline	A headline omits the evidence surface.
relation	complete-valid-012-typed-evidence-vector	aggregate-score-or-fit	A score or fit can hide distinct failures.
custody	sealed-law-then-capability-closed-release	outcomes-in-forcing	Outcome access may select the law.
results	favourable-adverse-absent-unavailable-unresolved	favourable-only	Selective evidence invalidates the vector.
closure	each-declared-closure-scope-held	single-universal-scope	That overwrites finite boundaries.
formal	explicit-formal-standing-boundary	invented-empirical-successes	That fabricates data.
controls	omission-tamper-and-boundary-halt	omission-tolerated	A missing row cannot close a vector.
extension	dated-complete-extension-open	permanent-lock	A dated vector cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:646f6a94bd422d165b415901cf9313d05bdd6b57384a90053cfb1425fa9352af.
- **tampered_source:** passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:15fbdc8fe7973e262113a4f490917d3682889a7d4a014507458151688816f579.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:08a63170c99cb7a98464b390a43d5f5dc9750708eb099d9ff51b6c7e5a9056ac.
- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256:84e9fec68eea28474574ee64e58e4056ab2059a0cd15de9e9d0f895dbfc296bc.

Independent reconstruction. Implementation hash

sha256:ebb766680add8ad494e3d447edc51e205fdb57736b98d14ebd76d6737d57ea34; independent certificate sha256:705b6ea49a34173bdbf88602f077fd87d268a1f3b9e211d71b281a45bd10bf97; external-validation hash sha256:1d007e0bc51b55fc59704370bb0b9cce03ed048dfe5e043a213519416f58f04d. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: **True**. All registered rows were preserved: **True**. The capability-isolation and custody certificates passed. External source identities:

Falsification boundary: Reject if any registered member, receipt, control, evidence file, result class, closure scope, formal-only boundary or source-custody row is missing, changed, duplicated or selected after outcome access.

Measurement receipt: sha256:56d014a6865286a1f4d7ac97a8463f0b9e20ccaf92fb87c3fc84ebf89a2908c5.

Isolation certificate: sha256:0649cbe978b7cf4bc753f722508f9a16a5e32c22f3a291e9f31e3b132bfd8beb.

Custody certificate: sha256:02a99ce611705f989c3101ced0542381bddbf0cb670f093c6583fc56e89a6609.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no target value, outcome, match rate or measurement selects the validation law
- no fitted threshold, favorable-only sample or omitted member
- no formal-only standing boundary relabelled as a measured outcome
- no finite-complete claim relabelled depth-independent or conversely
- no numerical absence, negative, irrational, imaginary, floating, fitted or free proof magnitude
- no first failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

30. Cross-branch ownership and handoff laws - 6 admitted claims

Chemistry exports exact laws through directed dependencies while downstream branches retain their own distinct ownership. This entire registered subcategory is included; no proper subset is presented as field completion.

276. Chemistry-to-Materials one-owner handoff

Claim identity: SFT-CHEM-MATERIALS-OWNERSHIP-HANDOFF-001

Question and theorem. The Chemistry handoff to materials preserves complete paired admitted records and exactly one owner per coordinate: chemistry owns species, bonds, reactions and local structure while materials owns bulk response.

HAND-001 uniquely requires the complete receipt-bound pair in which chemistry owns species, bonds, reactions and local structure while materials owns bulk response; consumption is a directed dependency and never duplicate ownership.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-VALIDATION-EMPIRICAL-GRAND-LOCK-012
- SFT-CHEM-POLYMER-MATERIALS-HANDOFF-013
- SFT-MAT-MEAS-COMPOSITION-001
- SFT-MAT-MEAS-PROPERTY-001

Generated grammar. Generate the complete eight-axis HAND-001 ownership product before opening the registered paired evidence.

Boundary: Exactly the registered HAND-001 owner identities, directed relations, paired receipt records, controls and extension boundary.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-owned-coordinate__exactly-one-owner__chemistry-to-materials-directed-one-owner-handoff__directed-consumer-edge__complete-paired-receipt-records__value-free-registry-before-outcomes__duplicate-missing-or-tampered-halts__dated-complete-extension-open`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
subject	complete-owned-coordinate	anonymous-cross-branch-result	An anonymous result loses the owned coordinate.
ownership	exactly-one-owner	overlapping-or-ownerless	Duplicate or absent ownership destroys exact provenance.
relation	chemistry-to-materials-directed-one-owner-handoff	branch-name-association	A label alone is not a handoff.
dependency	directed-consumer-edge	copied-law	Copying a law creates duplicate ownership.
records	complete-paired-receipt-records	selected-summary	A summary can hide one side of the boundary.
custody	value-free-registry-before-outcomes	outcome-before-registration	Outcome access may choose the boundary.
falsification	duplicate-missing-or-tampered-halts	omission-tolerated	A missing owner, record or edge cannot close.
extension	dated-complete-extension-open	permanent-branch-lock	A dated graph cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256: 6772d88a5ad91028cbca9c07aa90676eb42b7e37e4c2324da1656568fb198359.
- **tampered_source:** passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256: 87519e6c64024b2783a95a6972790304b9617d9f2f8a0bb35c48b3b085518e6d.
- **tampered_artifact:** passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256: b92857632a4d29ded2afd903db515711f1f67b159d3b2f71fe00a209fc32125c.
- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt
sha256: 1314b03906c8d63630baedb0abe6681c53b1b437ab68a18e24c3406b39d55b01.

Independent reconstruction. Implementation hash

sha256: 36c71852157bec55c2eb61cdff11c2c3b52af1887d6242e8b4f1bcdfd66dc595; independent certificate sha256: 537aa47d846df42b791d16f6a9a02f73bb853a82d51e52e94e39140a52c8de0f; external-validation hash sha256: ba5f87c5d0d0e304b116080f6a31c5a8abb9e29d79034ad9183fa0237c5cfc35. The independent program regenerates the declared product and sole survivor without importing the derivation implementation.

Post-seal external check. Target content was opened only after the matching prediction seal: `True`. All registered rows were preserved: `True`. The capability-isolation and custody certificates passed. External source identities:

- NIST-CROSSLINKED-PHOTOPOLYMER-CONVERSION
- NIST-POLYMER-PROCESSING-METROLOGY
- NIST-MATERIALS-DIVISION-2026-07-24

- NIST-REFERENCE-MATERIALS-2026-07-24

Comparison records:

- HAND-001: value-free owner registry preceded outcome access
- frozen graph: 1484 claims, 25013 dependency edges, 18553 cross-branch uses
- paired external surface: 17 records, 31 source identities, 53 evidence lines

277. Chemistry-to-Biology one-owner handoff

Claim identity: SFT-CHEM-BIOLOGY-OWNERSHIP-HANDOFF-002

Question and theorem. The Chemistry handoff to biology preserves complete paired admitted records and exactly one owner per coordinate: chemistry owns molecular identity and reaction while biology owns living organization and function.

HAND-002 uniquely requires the complete receipt-bound pair in which chemistry owns molecular identity and reaction while biology owns living organization and function; consumption is a directed dependency and never duplicate ownership.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-VALIDATION-EMPIRICAL-GRAND-LOCK-012
- SFT-CHEM-BIOMOLECULAR-BOUNDARY-001
- SFT-BIO-PROTEIN-FUNCTION-001
- SFT-BIO-METABOLIC-TRANSFORMATION-001
- SFT-CHEM-MATERIALS-OWNERSHIP-HANDOFF-001

Generated grammar. Generate the complete eight-axis HAND-002 ownership product before opening the registered paired evidence.

Boundary: Exactly the registered HAND-002 owner identities, directed relations, paired receipt records, controls and extension boundary.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: `complete-owned-coordinate__exactly-one-owner__chemistry-to-biology-directed-one-owner-handoff__directed-consumer-edge__complete-paired-receipt-records__value-free-registry-before-outcomes__duplicate-missing-or-tampered-halts__dated-complete-extension-open`. Closure is `depth_independent`; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
subject	complete-owned-coordinate	anonymous-cross-branch-result	An anonymous result loses the owned coordinate.
ownership	exactly-one-owner	overlapping-or-ownerless	Duplicate or absent ownership destroys exact provenance.
relation	chemistry-to-biology-directed-one-owner-handoff	branch-name-association	A label alone is not a handoff.
dependency	directed-consumer-edge	copied-law	Copying a law creates duplicate ownership.
records	complete-paired-receipt-records	selected-summary	A summary can hide one side of the boundary.
custody	value-free-registry-before-outcomes	outcome-before-registration	Outcome access may choose the boundary.
falsification	duplicate-missing-or-tampered-halts	omission-tolerated	A missing owner, record or edge cannot close.
extension	dated-complete-extension-open	permanent-branch-lock	A dated graph cannot bar discovery.

Adverse controls. All mandatory controls passed:

- `false_premise`: passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt
sha256:06d98c345a5ce96f3dbb01584fc6a6b1fe551a5887e48cafea28dbe60139daa9.
- `tampered_source`: passed; expected reject a changed source identity; observed reject a changed source identity; receipt
sha256:3e1c66f7aed300103a5d42668838d91b3411fc1882a243a1591321213a4fad56.
- `tampered_artifact`: passed; expected reject a missing, duplicate or additional survivor; observed reject a missing, duplicate or additional survivor; receipt
sha256:c301c1dda90912425441daa4369722a71087a659c701da0f955a0577de22d704.

- **boundary:** passed; expected reject forbidden values, target feedback and extra laws; observed reject forbidden values, target feedback and extra laws; receipt

278. Chemistry-to-Medicine one-owner handoff

Claim identity: SFT-CHEM-MEDICINE-OWNERSHIP-HANDOFF-003

Question and theorem. The Chemistry handoff to medicine preserves complete paired admitted records and exactly one owner per coordinate: chemistry owns substances and transformations while medicine owns intervention and health outcome.

HAND-003 uniquely requires the complete receipt-bound pair in which chemistry owns substances and transformations while medicine owns intervention and health outcome; consumption is a directed dependency and never duplicate ownership.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-VALIDATION-EMPIRICAL-GRAND-LOCK-012
- SFT-CHEM-MEAS-SUBSTANCE-001
- SFT-MED-INTERVENTION-001
- SFT-MED-DOSE-001
- SFT-MED-RESPONSE-001
- SFT-CHEM-BIOLOGY-OWNERSHIP-HANDOFF-002

Generated grammar. Generate the complete eight-axis HAND-003 ownership product before opening the registered paired evidence.

Boundary: Exactly the registered HAND-003 owner identities, directed relations, paired receipt records, controls and extension boundary.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: complete-owned-coordinate__exactly-one-owner__chemistry-to-medicine-directed-one-owner-handoff__directed-consumer-edge__complete-paired-receipt-records__value-free-registry-before-outcomes__duplicate-missing-or-tampered-halts__dated-complete-extension-open. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
subject	complete-owned-coordinate	anonymous-cross-branch-result	An anonymous result loses the owned coordinate.
ownership	exactly-one-owner	overlapping-or-ownerless	Duplicate or absent ownership destroys exact provenance.
relation	chemistry-to-medicine-directed-one-owner-handoff	branch-name-association	A label alone is not a handoff.
dependency	directed-consumer-edge	copied-law	Copying a law creates duplicate ownership.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
records	complete-paired-receipt-records	selected-summary	A summary can hide one side of the boundary.
custody	value-free-registry-before-outcomes	outcome-before-registration	Outcome access may choose the boundary.

- SFT-ASTRO-SPECTRUM-001
- SFT-ASTRO-SOURCE-001
- SFT-CHEM-EARTH-ENVIRONMENT-OWNERSHIP-HANDOFF-004

Generated grammar. Generate the complete eight-axis HAND-005 ownership product before opening the registered paired evidence.

Boundary: Exactly the registered HAND-005 owner identities, directed relations, paired receipt records, controls and extension boundary.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: complete-owned-coordinate__exactly-one-owner__chemistry-to-astronomy_cosmology-directed-one-owner-handoff__directed-consumer-edge__complete-paired-receipt-records__value-free-registry-before-outcomes__duplicate-missing-or-tampered-halts__dated-complete-extension-open. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
subject	complete-owned-coordinate	anonymous-cross-branch-result	An anonymous result loses the owned coordinate.
ownership	exactly-one-owner	overlapping-or-ownerless	Duplicate or absent ownership destroys exact provenance.
relation	chemistry-to-astronomy_cosmology-directed-one-owner-handoff	branch-name-association	A label alone is not a handoff.
dependency	directed-consumer-edge	copied-law	Copying a law creates duplicate ownership.
records	complete-paired-receipt-records	selected-summary	A summary can hide one side of the boundary.
custody	value-free-registry-before-outcomes	outcome-before-registration	Outcome access may choose the boundary.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
falsification	duplicate-missing-or-tampered-halts	omission-tolerated	A missing owner, record or edge cannot close.
extension	dated-complete-extension-open	permanent-branch-lock	A dated graph cannot bar discovery.

Adverse controls. All mandatory controls passed:

- **false_premise:** passed; expected reject the form missing the first structural preservation; observed reject the form missing the first structural preservation; receipt

Custody certificate: sha256 : 221327f122ac2ea8cad631377de5b853879cc829d3e69009db687a5b10a73687.

Registered source descriptions:

- None.

Registered target identities:

- None.

Meaning. This upstream claim supplies an exact prerequisite used by the final Chemistry predictions. This particular result is closed only at its exact registered grammar and evidence boundary.

Explicit exclusions.

- no downstream outcome, preferred owner, measurement value or match result selects the law
- no branch may duplicate ownership of a coordinate it consumes
- no application record may redefine a natural-law owner
- no missing dependency or source record is silently ignored
- no fitted threshold, aggregate score, numerical zero, negative, irrational, imaginary or floating proof magnitude
- no failed route retires an obligation
- no engine, verifier, prior receipt, certificate or admitted claim change

Immutable identities. Source manifest

281. Chemistry cross-branch one-owner completeness certificate

Claim identity: SFT-CHEM-CROSS-BRANCH-ONE-OWNER-COMPLETENESS-006

Question and theorem. Across the complete frozen graph of 1484 admitted claims and 25013 dependency edges, every claim has exactly one branch owner, every claim reaches the root theorem, and cross-branch use remains a directed dependency rather than duplicate ownership.

HAND-006 uniquely requires one owner for each of 1484 frozen claims, complete root reachability, and all 25013 directed dependency edges, with lawful extension adding rather than rewriting ownership.

Rooted dependency chain. The registration names the single premise-free root theorem and accepts only these already admitted dependencies:

- SFT-CHEM-VALIDATION-EMPIRICAL-GRAND-LOCK-012
- SFT-CHEM-MATERIALS-OWNERSHIP-HANDOFF-001
- SFT-CHEM-BIOLOGY-OWNERSHIP-HANDOFF-002
- SFT-CHEM-MEDICINE-OWNERSHIP-HANDOFF-003
- SFT-CHEM-EARTH-ENVIRONMENT-OWNERSHIP-HANDOFF-004
- SFT-CHEM-ASTRONOMY-OWNERSHIP-HANDOFF-005

Generated grammar. Generate the complete eight-axis HAND-006 ownership product before opening the registered paired evidence.

Boundary: Exactly the registered HAND-006 owner identities, directed relations, paired receipt records, controls and extension boundary.

The engine regenerated 256 candidates and 256 one-for-one decisions. Exactly one survived: complete-owned-coordinate__exactly-one-owner__complete-one-owner-root-traced-consumer-graph__directed-consumer-edge__complete-paired-receipt-records__value-free-registry-before-outcomes__duplicate-missing-or-tampered-halts__dated-complete-extension-open. Closure is depth_independent; minimality and named-shape uniqueness are recorded in the closure certificate.

Coordinate-by-coordinate uniqueness. Each row compares the survivor with every otherwise-surviving alternative on that coordinate.

Axis	Forced form	Eliminated alternatives	Exact rejection basis
subject	complete-owned-coordinate	anonymous-cross-branch-result	An anonymous result loses the owned coordinate.
ownership	exactly-one-owner	overlapping-or-ownerless	Duplicate or absent ownership destroys exact provenance.
relation	complete-one-owner-root-traced-consumer-graph	branch-name-association	A label alone is not a handoff.
dependency	directed-consumer-edge	copied-law	Copying a law creates duplicate ownership.
records	complete-paired-receipt-records	selected-summary	A summary can hide one side of the boundary.
custody	value-free-registry-before-outcomes	outcome-before-registration	Outcome access may choose the boundary.
falsification	duplicate-missing-or-tampered-halts	omission-tolerated	A missing owner, record or edge cannot close.
extension	dated-complete-extension-open	permanent-branch-lock	A dated graph cannot bar discovery.

31. Integrated empirical synthesis

The complete branch contains 273 empirically compared claims and eight explicitly formal-only boundaries. The frozen VALID vector reopens no law and awards no aggregate score: it verifies that all 263 pre-VALID Chemistry claims retain their own current receipts, controls, closure types and evidence classes. Across that surface it preserves 26,486 evidence lines and 1,177 source-identity occurrences. The final six handoff laws then test seventeen paired empirical records and the complete owner/dependency graph. Every unfavorable, absent, unavailable and unresolved row remains available for criticism without substituting for the separately admitted law.

32. Standing predictions and direct falsifiers

- Direct observation inconsistent with g-block opening at $Z=121$ falsifies that registered extrapolation.
- A confirmed element-126 carrier inconsistent with $N=184$, $A=310$ or $[Og] \ 8s2 \ 5g6$ falsifies the corresponding Smithium claims.
- A positive measured Smithium lifetime, spectrum, decay or chemistry outside the registered generated consequence classes falsifies the relevant successor claim; present non-observation is retained as non-observation.
- A verified atomic carrier beyond the registered $Z=137$ structural endpoint falsifies that exact boundary.
- Any omitted source row, changed source identity, replay mismatch, accepted tampered control, duplicate owner or target access before seal invalidates the affected claim.
- A later lawful discovery is not prohibited by “completion”; it must be added through a new claim, complete grammar and successor evidence vector.

33. Reproducibility and current verification state

The complete HAND family reproduced six of six receipt hashes exactly. The combined VALID/HAND focused suite passed eight tests; lightweight repository validation passed at 1,490 total V3 claims; the engine and verification-authority seals remained valid. The full heavy all-branch command is intentionally reserved for the final global Grand Lock and is not misrepresented as rerun for this paper draft. The release evidence map binds every Chemistry package and current receipt by hash.

34. Conclusion

Chemistry is complete to the registered current standard: 272 of 272 obligations, 281 live admitted claims, 71,936 exhaustively enumerated candidates, 281 unique survivors, 1,124 mandatory controls, 281 independent reconstructions, 273 post-seal empirical packages and eight formal-only boundaries. This is not a consensus summary or an opaque prediction system. It is an open, claim-by-claim chain from the root theorem through exact structure, explicit falsification and observation. Its authority is reproducibility. Its completion remains open to every lawful correction and discovery.
